Welding Technology Processes and Applications Technical Publications

VK Global Publications Pvt. Ltd. is a household name now. Established in 1979, with more than three decades of leadership in the area of Economics and Commerce, we take pride in claiming that we continue with the unstirred readership in the country.

Specialising in the area of Economics and Commerce, we are not averse to the idea of diversification. Keeping this in view, more than a decade ago, a series of 'Xam idea' was launched in all the subjects for classes IX -X However, success of our publication is admittedly due to prudent prolific writers. We have resource-pool of reputed authors, who leave no stone unturned in bringing out the best of study material, which makes our readers versatile in their thought processes and equips them with the exam-oriented acumen. Thousands of acknowledgments and accolades that we receive every year from our readers are a good testimony to the genuine efforts and trustworthy endeavours of our authors.

Welding is a fabrication process that joins materials usually metals by using high heat to melt the parts together and allowing them to cool causing fusing. Many different energy sources can be used for welding including gas flame, electric arc, a laser and electron beam, friction and ultrasonic. This book includes various methods of welding and design of weld joints, weldability and testing of weldments. Welding technology also includes latest and newer techniques for welding. Our hope is that this book, through its careful explanations of concepts and its use of numerous examples, sketches and figures, bridges the gap between knowledge and proper application of that knowledge.
