Personal Note from the Author- I am a hardware enthusiast and love to play with devices. In fact, figuring out all kinds of mechanical and electronic devices and understanding how they work has been a lifelong passion for me. Five years ago, I came across this new revolutionary set of voice controlled Alexa Devices and love the freedom it gives me. I have done a lot of research on Echo devices and this prompted me to put down my learning in the form of a series of books. This Essential User Guide for the Amazon Echo Show 5 is the 6th in the series of books I have written on Alexa Devices. I hope that this guide helps you in setting up and using your Echo Show 5.

Amazon Echo Show From Beginner To Advanced The Amazon Echo Show is the next upgrade for Alexa - you'll hear a lot of people saying it's Alexa with a screen. That being said, you can say that this is a visual upgrade so to speak. Now Alexa can provide you with some visuals. Of course, if you're a fan of the Echo and other previous products in this line, you may have already figured out that there are controls and commands that are easier to access with something visual or on-screen, right? And that is what the Echo Show gives you and more. Some have said that the experience with this "version" of Alexa is that you now let her see you and you in a way see her. So what should you expect from this device? Here's a little sneak peak: For one thing it is easy to use. There are features from Alexa that are definitely a lot better with some visual displays such as lists and timers for instance. It can play video. Now, that's something you can't do with a smart speaker. You also get visual search results. Are there things that the boys from the Amazon think tank should improve on? The answer is yes. Note

that the Echo Show has tons of potential, which is why the competition is hard at work trying to match it.

However, here are a few downsides that everyone should know about: It has no privacy shutter - that means people can Drop on you and of course you can't deny access to the person calling (aka see what you're up to at the moment when they start the video conference). Some of the skills that come with this Show are good but there are a few kinks that do need some work. We all know that Amazon's smart digital assistant is always improving and the Echo Show is proof of that. Here in this book we'll cover everything you need to know about it and we're unabashedly going to include both what's to like about it and what not. Get Your Copy Right Now!

commands to have great fun -Tips and Tricks for Echo Show-How to make a Call or send a Message -How to Use the Drop in Function-And More of Other Familiarize Yourself More With The Book.Take a Deeper LookHere is a Paragraph from The Book about making voice call or send messageYou can use Echo Show to make a voice call or send a message. However, the person you intend to call or send a message to must have a compatible device such as a tablet, Echo, or smartphone and the Alexa app installed.When it comes to video calling, you can only call someone who has an Echo Show device, or someone who has a video enable phone with the Alexa app installed. Further, you can only call people in your contact list. To make a video call, all you have to do is tap on the onscreen icon for video call. If the person is in your contact list, Alexa will connect you (you can also command Alexa to connect you to the person by saying the person's name).The same applies to a voice call and messaging. To access the feature, tap the "speech" bubble somewhere at the middle of the toolbar. From here, tap the contacts icon that should be somewhere at the top right corner. The feature shall ask for access to your contact (if you're using the feature for the first time-you may also need to enter and validate a phone number).Once you allow the feature access, it will show you a list of contacts you can call with your Echo Show. When you tap a contact's information, you will note an icon underneath the contact's name. This icon will allow you to send a message or start a voice and voice call. On the Echo Show, if the person you are calling has an Echo Show device, the default call made will be a video,

which you can turn off by commanding Alexa to turn the video off. THE REST OF THE PARAGRAPH IS IN THE
