**The American Aircraft Factory in World War II** Bill Yenne, 2010-09-10 Few industrial phenomena have been as dramatic as the United States' mid-20th-century shift from peacetime to wartime production. The American Aircraft Factory in World War II documents the production of legendary warbirds by companies like Boeing, North American, Curtiss, Consolidated, Douglas, Grumman, and Lockheed. It was a production unmatched by any other country and a crucial part of why the allies won the war. Author Bill Yenne considers the prewar governmental acts that got the plants rolling, as well as the gender shift that occurred as women entered the work force like never before. He also describes the construction of megafactories like Willow Run, factory design considerations, and the postwar conversion back to peacetime production. Illustrated with 175 period photographs—including 50 rare color photos never before seen in print.

**The Concise Guide to American Aircraft of World War II** David Mondey, 1996-07-01 Over 130 American warplanes profiled alphabetically, illustrated with full specifications and a brief history of each plane.

*Fighter Planes of World War II* Nancy Robinson Masters, 1998 Introduces various kinds of fighter planes used by the Army Air Force and by the Navy and Marines during World War Two, their missions, and the weapons employed. Also includes information on the German and Japanese fighters used in World War 2.

**Complete Book of World War II Combat Aircraft** Enzo Angelucci, Paolo Matricardi, 2001 This is a large format A-Z encyclopedia of every Allied and Axis fighting plane from 1933-1945 - from the famous to the lesser known - in all theatres of war from Europe to Asia and the Pacific.

**Picture History of World War II American Aircraft Production** Joshua Stoff, 2013-01-03 Over 250 rare photographs depict one of the greatest industrial feats of all time: America's massive production of World War II fighters and bombers. An introduction and captions outline the history.

**Yanks Over Europe** Jerome Klinkowitz, 2021-12-14 Contrasts between fighter combat and the bombers' war support Klinkowitz's belief that notions of the air war were determined by one's position in it. He extends his thesis by showing the vastly different style of air war described by veterans of the North African and Mediterranean campaigns and concludes by studying the effects of such combat on adversaries and victims. Air combat, Klinkowitz writes, offers a unique perspective on

the nature of war. The experience of combat has inspired authors to combine exquisite descriptions with probing thoughtfulness, covering the full range of human expression from exultation to heartbreak. Here is a tightly drawn, highly readable account of the European air war.

**American Aircraft of World War II** David Mondey,1998-11-07 This illustrated guide looks at major American aircraft of World War II, showing the design of 133 fighter bombers used in the war. It describes how the aircraft were deployed in bombing missions, their pilots, the firepower they were capable of, and how they survived the conflict.

The Hamlyn Concise Guide to American Aircraft of World War II David Mondey,2006

*Thunder in the Heavens* Martin W. Bowman,1994 America produced over 200,000 B-17 Flying Fortresses, B-24 Liberators, and B-29 Super Fortresses. Out of this massive total, only one B-24 remains today. Thunder in the Heavens is a photographic tribute to the Big Friends, the bombers, the Little Friends, their fighter escort, Low and Below the ground support aircraft, and the planes that flew off of the aircraft carriers.

**America's Hundred Thousand** Francis H. Dean,1997 America's Hundred Thousand covers in detail the eleven U.S. fighter aircraft types produced just before and during World War II - with a combined production total of just over 100,000 aircraft. Covered are the Army Lockheed P-38 Lightning, P-39 Airacobra, Curtiss P-40 Tomahawk/Kittyhawk/Warhawk, P-47 Thunderbolt, North American P-51 Mustang, Northrop P-61 Black Widow, and the Navy F2A - Buffalo, F4F - Wildcat, F4U - Corsair, and F6F - Hellcat fighters. The text is supplemented by more than 650 photographs, and 200 tables and graphs. Fighter production figures are also included. After an introduction of each type, a heavily illustrated overview of earlier inter-war production from 1920-on, along with a discussion and illustration of wartime experimental types, is provided. A lengthy section considering several technical factors affecting fighter performance follows. These include engine models, supercharger types, propellers, aerodynamic thrust, lift and drag, aircraft weight, balance, stability and control, and armament. America's Hundred Thousand also provides details of each U.S. World War II production fighter in terms of models and changes, numbers produced, and major engine and aircraft performance aspects - in tabular and graphical form - details of weights, discussion of handling qualities and general comments, along with detailed descriptions containing many illustrations of aircraft structures and systems showing the technology of that time. In addition a comprehensive week-to-week and month-to-month chronology of development and wartime combat operational life for each fighter is provided, including many photos. This study concludes with comparisons of the eleven types in terms of program milestones, aircraft drag, power available at various altitudes, speed, climb, rolling and turning, acceleration, and diving performance, as well as general evaluations by World War II pilots.

**Forge of Freedom** V. Dennis Wrynn,1995 Forge of FreedomWrynnGo behind the scenes and witness the extraordinary

efforts put forth by millions of Americans as they geared up for war. Wrynn describes how US industry rose to the occasion by designing, producing, and ferrying aircraft by the thousands. Take this nostalgic look back at the factories, the people, and the production of the greatest achievement in American production history. Sftbd., 8 1/4x 1 5/8, 28 pgs., 475 bandw ill.

**Flying American Combat Aircraft of World War II** Robin Higham, Abigail T. Siddall, Carol Williams, 2021-08-01

Riveting, first-person accounts that put the reader in the cockpit. Dozens of photographs of the planes and the pilots that flew and fought in the skies from Tokyo to Berlin. Find out what it was like to fly some of the all-time classic aircraft of World War II, including the P-51 Mustang, B-17 Flying Fortress, P-47 Thunderbolt, P-38 Lightning, P-40 Kittyhawk, and many more!

*Wings of Gold* Gerald Astor, 2007-12-18 From critically acclaimed military historian Gerald Astor comes *Wings of Gold*, the first account of how the airplane transformed the U.S. Navy and paved the way to victory in the Pacific in World War II. Astor tracks that fateful journey from its humble beginnings in 1910 when Eugene Ely flew the very first plane off the deck of a U.S. Navy ship to the unprecedented air combat missions that helped defeat the Japanese. Few naval aviators in World War II realized that when they earned their wings of gold they were about to become test pilots for a whole new kind of combat. In their own words, these courageous fliers describe the life-and-death air battles that defined the revolution in naval strategy that rose from the ashes of Pearl Harbor, when fighter pilots watched in horror as Japanese carrier-launched aircraft bombed their planes and airfields into smoking rubble. While following the pilots' firsthand reports of air strikes and blazing dogfights across the islands and atolls of the Pacific, Astor explores the ways the U.S. Navy began its momentous transformation before the war. Later, the critical role of aircraft carriers in the stunning U.S. victory at Midway sounded the death knell for conventional naval warfare, yet the public, the press, the Army, and even the president's advisors refused to recognize the new reality. In fact, only a few in the Navy understood that a new era had begun that would change the face of war forever. The young Americans who fought the deadly duels against Imperial Japanese forces high over the Pacific gave everything they had to the war effort, and many made the supreme sacrifice. *Wings of Gold* pays tribute to their courage, daring, and selfless dedication. Vividly told, thoroughly researched, and filled with stirring accounts of the Pacific War's greatest air battles, *Wings of Gold* is an important addition to the annals of World War II aerial combat.

*American Aircraft Development of the Second World War* William Norton, 2019-07-06 This book presents a little-known aspect of America's aircraft development of World War II in emphasizing unique and non-production aircraft or modifications for the purpose of research and experimentation in support of aircraft development, advancing technology, or meeting narrow combat needs. It describes some important areas of American aviation weapons maturation under the pressure of war with emphasis on advanced technology and experimental aircraft configurations. The great value of the work is illumination of little known or minimally documented projects that significantly advanced the science of aeronautics, propulsion, aircraft systems, and ordnance, but did not go into production. Each chapter introduces another topic by examining the state-of-the-

art at the beginning of the war, advantages pursued, and results achieved during the conflict. This last is the vehicle to examine the secret modifications or experiments that are little known. Consequently, this is an important single-source for a fascinating and diverse collection of wartime efforts never before brought together under a single cover. The war stories are those of military staffs, engineering teams, and test pilots struggling against short schedules and tight resource constraints to push the bounds of technology. These epic and sometimes life-threatening endeavors were as vital as actual combat operations.

*Warbird Factory* John M. Fredrickson, 2015-09-10 Explore the WWII history of the company that later became a part of Boeing and made more aircraft from 1938 to 1944 than any other company in the United States. During World War II, Los Angeles was the ultimate boom town. By the end of the war, the L.A. area had produced 17 percent of all of America's war needs. North American Aviation, Inc. (NAA), operating out of their main Inglewood, California, plant, which is south of and adjacent to the city, was a key player in that work. From 1938 to 1944, NAA built over 40,000 aircraft, more than any other company in the United States. The bulk of them were of three iconic types designed by NAA: - The P-51 Mustang, arguably the best fighter of WWII. - B-25 Mitchell medium bombers, which saw worldwide combat. - Two-seat military pilot trainers, such as the AT-6 Texan. This is a fascinating story of a remarkable time in aviation history, when American businesses helped fund the arsenal of democracy that helped defeat the Axis powers. *Warbird Factory* tells this story with over 200 photographs, many of which come directly from the NAA/Boeing archives, where they have resided since WWII. This is an essential book for anyone interested in warbirds, aviation, Boeing/NAA, WWII, and/or the history of Southern California!

*The Concise Guide to American Aircraft of World War II* David Mondey, 1994-08-01 A detailed sourcebook covers 133 different types of American aircraft that were used during the second World War, and includes 170 color drawings, 177 photographs, eighty-seven diagrams, and thorough descriptions.

*American Fighters of World War II* David A. Anderton, 1982
