A Seattle Times selection for one of Best Non-Fiction Books of 2010 Winner of the New England Historical Association's 2010 James P. Hanlan Award Winner of the Outdoor Writers Association of America 2011 Excellence in Craft Award, Book Division, First Place "A compelling and well-annotated tale of greed, slaughter and geopolitics." —Los Angeles Times As Henry Hudson sailed up the broad river that would one day bear his name, he grew concerned that his Dutch patrons would be disappointed in his failure to find the fabled route to the Orient. What became immediately apparent, however, from the Indians clad in deer skins and "good furs" was that Hudson had discovered something just as tantalizing. The news of Hudson's 1609 voyage to America ignited a fierce competition to lay claim to this uncharted continent, teeming with untapped natural resources. The result was the creation of an American fur trade, which fostered economic rivalries and fueled wars among the European powers, and later between the United States and Great Britain, as North America became a battleground for colonization and imperial aspirations. In *Fur, Fortune, and Empire*, best-selling author Eric Jay Dolin chronicles the rise and fall of the fur trade of old, when the rallying cry was "get the furs while they last." Beavers, sea otters, and buffalos were slaughtered, used for their precious pelts that were tailored into extravagant hats, coats, and sleigh blankets. To read *Fur, Fortune, and Empire* then is to understand how North America was explored, exploited, and settled, while its native Indians were alternately enriched and exploited by the trade. As Dolin demonstrates, fur, both an economic elixir and an agent of destruction, became inextricably linked to many key events in American history, including the French and Indian War, the American Revolution, and the War of 1812, as well as to the relentless pull of Manifest Destiny and the opening of the West. This work provides an international cast beyond the scope of any Hollywood epic, including Thomas Morton, the rabble-rouser who infuriated the Pilgrims by trading guns with the Indians; British explorer Captain James Cook, whose discovery in the Pacific Northwest helped launch America's China trade; Thomas Jefferson who dreamed of expanding the fur trade beyond the Mississippi; America's first multimillionaire John Jacob Astor, who built a fortune on a foundation of fur; and intrepid mountain men such as Kit Carson and Jedediah Smith, who sliced their way through an awe inspiring and unforgiving landscape, leaving behind a mythic legacy still resonates today. Concluding with the virtual extinction of the buffalo in the late 1800s, *Fur, Fortune, and Empire* is an epic history that brings to vivid life three hundred years of the American experience, conclusively demonstrating that the fur trade played a seminal role in creating the nation we are today. *Gentlemen Bankers* focuses on the social and economic circles of one of America's most renowned and influential financiers, J. P. Morgan, to tell a closely focused story of how economic and political interests intersected with personal rivalries and friendships among the Wall Street aristocracy during the first half of the twentieth century.

One of the most successful public relations campaigns in history, featuring heroic astronauts, press-savvy rocket scientists, enthusiastic reporters, deep-pocketed defense contractors, and Tang. In July 1969, ninety-four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon. How did space exploration, once the purview of rocket scientists, reach a larger audience than *My Three Sons*? Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience? In *Marketing the Moon*, David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history: the selling of the Apollo program. Primed by science fiction, magazine articles, and appearances by Wernher von Braun on the "Tomorrowland" segments of the Disneyland prime time television show, Americans were a receptive audience for NASA's pioneering "brand journalism." Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel—through press releases, bylined articles, lavishly detailed background materials, and fully produced radio and television features—rather than push an agenda. American astronauts, who signed exclusive agreements with Life magazine, became the heroic and patriotic faces of the program. And there was some judicious product placement: Hasselblad was the "first camera on the moon"; Sony cassette recorders and supplies of Tang were on board the capsule; and astronauts were equipped with the Exer-Genie personal exerciser. Everyone wanted a place on the bandwagon. Generously illustrated with vintage photographs, artwork, and advertisements, many never published before, *Marketing the Moon* shows that when Neil Armstrong took that giant leap for mankind, it was a triumph not just for American engineering and rocketry but for American marketing and public relations.

From New York Times bestselling historian Douglas Brinkley comes a sweeping historical narrative and eye-opening look at the pioneering environmental policies of President Theodore Roosevelt, avid bird-watcher, naturalist, and the founding father of America's conservation movement. In this groundbreaking epic biography, Douglas Brinkley draws on never-before-published materials to examine the life and achievements of our "naturalist president." By setting aside more than 230 million acres of wild America for posterity between 1901 and 1909, Theodore Roosevelt made conservation a universal endeavor. This crusade for the American wilderness was perhaps the greatest U.S. presidential initiative between the Civil War and World War I. Roosevelt's most important legacies led to the creation of the U.S. Fish and Wildlife Service and passage of the Antiquities Act in 1906. His executive orders saved such treasures as Devils Tower, the Grand Canyon, and the Petrified Forest.

Instant New York Times Bestseller As the fiftieth anniversary of the first lunar landing approaches, the award winning historian and perennial New York Times bestselling author takes a fresh look at the space program, President John F. Kennedy's inspiring challenge, and America's race to the moon. "We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win."—President John F. Kennedy On May 25, 1961, JFK made an astonishing announcement: his goal of putting a man on the moon by the end of the decade. In this engrossing, fast-paced epic, Douglas Brinkley returns to the 1960s to recreate one of the most exciting and ambitious achievements in the history of humankind. American Moonshot brings together the extraordinary political, cultural, and scientific factors that fueled the birth and development of NASA and the Mercury, Gemini and Apollo projects, which shot the United States to victory in the space race against the Soviet Union at the height of the Cold War. Drawing on new primary source material and major interviews with many of the surviving figures who were key to America's success, Brinkley brings this fascinating history to life as never before. American Moonshot is a portrait of the brilliant men and women who made this giant leap possible, the technology that enabled us to propel men beyond earth's orbit to the moon and return them safely, and the geopolitical tensions that spurred Kennedy to commit himself fully to this audacious dream. Brinkley's ensemble cast of New Frontier characters include rocketeer Wernher von Braun, astronaut John Glenn and space booster Lyndon Johnson. A vivid and enthralling chronicle of one of the most thrilling, hopeful, and turbulent eras in the nation's history, American Moonshot is an homage to scientific ingenuity, human curiosity, and the boundless American spirit.

The young president who brought vigor and glamour to the White House while he confronted cold war crises abroad and calls for social change at home John Fitzgerald Kennedy was a new kind of president. He redefined how Americans came to see the nation's chief executive. He was forty-three when he was inaugurated in 1961—the youngest man ever elected to the office—and he personified what he called the "New Frontier" as the United States entered the 1960s. But as Alan Brinkley shows in this incisive and lively assessment, the reality of Kennedy's achievements was much more complex than the legend. His brief presidency encountered significant failures—among them the Bay of Pigs fiasco, which cast its shadow on nearly every national-security decision that followed. But Kennedy also had successes, among them the Cuban Missile Crisis and his belated but powerful stand against segregation. Kennedy seemed to live on a knife's edge, moving from one crisis to another—Cuba, Laos, Berlin, Vietnam, Mississippi, Georgia, and Alabama. His controversial public life mirrored his hidden private life. He took risks that would seem reckless and even foolhardy when they emerged from secrecy years later. Kennedy's life, and his violent and sudden death, reshaped our view of the presidency. Brinkley gives us a full picture of the man, his times, and his enduring legacy.

China and the United States, two massive economic and military powers, cannot avoid engaging with each other. Enjoying what is often termed "the most important bilateral relationship in the world", the two sometimes cooperate, but often compete, as their interests come into conflict. Both countries are separated not just by the Pacific Ocean, but also by their very different histories, experiences, societies, customs, and outlooks. Non-governmental, unofficial relationships and exchanges are often as important as formal dealings in determining the climate of Sino-American relations. For several decades in the mid-twentieth century, Chinese and Americans were virtually isolated from each other, trapped in icy hostility. Chinese scholars are now making up for lost time. This assortment of essays, most by mainland Chinese academics and students, focuses upon the role of culture – very broadly defined – in Sino-American affairs. Taking a holistic approach, in this collection over thirty authors focus on such topics as the influence of ideology, the impact of geopolitics, the use of rhetoric, soft power, educational

encounters and exchanges, immigration, gender, race, identity, literature, television, movies, music, and the press. Cultural factors are, as the authors demonstrate, enormously significant in affecting how Chinese and Americans think about and approach each other, both as individuals and at the state level.

In the aftermath of the Constitutional Convention of 1787, three of its most gifted participants--Alexander Hamilton, James Madison, and John Jay--wrote a series of 85 essays--the "Federalist Papers"--which were published in newspapers throughout the nation, defending the proposed new government against its opponents. In the "New Federalist Papers", three prominent writers confront the threats posed by current challenges to the American Constitution.

American History: Connecting with the Past McGraw-Hill Education

Discusses the impact of Franklin Roosevelt, Robert Penn Warren, T. Harry Williams, Huey Long, Allard Lowenstein, and Oral Roberts upon American political culture

\*Finalist for the Pulitzer Prize and the National Book Critics Circle Award\* \*A New York Times Notable Book\* \*Winner of the Texas Book Award and the Oklahoma Book Award\* This New York Times bestseller and stunning historical account of the forty-year battle between Comanche Indians and white settlers for control of the American West "is nothing short of a revelation...will leave dust and blood on your jeans" (The New York Times Book Review). Empire of the Summer Moon spans two astonishing stories. The first traces the rise and fall of the Comanches, the most powerful Indian tribe in American history. The second entails one of the most remarkable narratives ever to come out of the Old West: the epic saga of the pioneer woman Cynthia Ann Parker and her mixed-blood son Quanah, who became the last and greatest chief of the Comanches. Although readers may be more familiar with the tribal names Apache and Sioux, it was in fact the legendary fighting ability of the Comanches that determined when the American West opened up. Comanche boys became adept bareback riders by age six; full Comanche braves were considered the best horsemen who ever rode. They were so masterful at war and so skillful with their arrows and lances that they stopped the northern drive of colonial Spain from Mexico and halted the French expansion westward from Louisiana. White settlers arriving in Texas from the eastern United States were surprised to find the frontier being rolled backward by Comanches incensed by the invasion of their tribal lands. The war with the Comanches lasted four decades, in effect holding up the development of the new American nation. Gwynne's exhilarating account delivers a sweeping narrative that encompasses Spanish colonialism, the Civil War, the destruction of the buffalo herds, and the arrival of the railroads, and the amazing story of Cynthia Ann Parker and her son Quanah—a historical feast for anyone interested in how the United States came into being. Hailed by critics, S. C. Gwynne's account of these events is meticulously researched, intellectually provocative, and, above all, thrillingly told. Empire of the Summer Moon announces him as a major new writer of American history.
