Physician-Assisted Death James M. Humber,Robert F. Almeder,Gregg A. Kasting,1994-02-04 Physician-Assisted Death is the eleventh volume of Biomedical Ethics Reviews. We, the editors, are pleased with the response to the series over the years and, as a result, are happy to continue into a second decade with the same general purpose and zeal. As in the past, contributors to projected volumes have been asked to summarize the nature of the literature, the prevailing attitudes and arguments, and then to advance the discussion in some way by staking out and arguing forcefully for some basic position on the topic targeted for discussion. For the present volume on Physician-Assisted Death, we felt it wise to enlist the services of a guest editor, Dr. Gregg A. Kasting, a practicing physician with extensive clinical knowledge of the various problems and issues encountered in discussing physician assisted death. Dr. Kasting is also our student and just completing a graduate degree in philosophy with a specialty in biomedical ethics here at Georgia State University. Apart from a keen interest in the topic, Dr. Kasting has published good work in the area and has, in our opinion, done an excellent job in taking on the lion's share of editing this well-balanced and probing set of essays. We hope you will agree that this volume significantly advances the level of discussion on physician-assisted euthanasia. Incidentally, we wish to note that the essays in this volume were all finished and committed to press by January 1993.

Approaching Death Committee on Care at the End of Life,Institute of Medicine,1997-10-30 When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an overtreated dying is feared, untreated pain or emotional abandonment are equally frightening. *Approaching Death* reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. *Approaching Death*

considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom nothing can be done.

Management of Animal Care and Use Programs in Research, Education, and Testing Robert H. Weichbrod, Gail A. (Heidbrink) Thompson, John N. Norton, 2017-09-07 AAP Prose Award Finalist 2018/19 Management of Animal Care and Use Programs in Research, Education, and Testing, Second Edition is the extensively expanded revision of the popular Management of Laboratory Animal Care and Use Programs book published earlier this century. Following in the footsteps of the first edition, this revision serves as a first line management resource, providing for strong advocacy for advancing quality animal welfare and science worldwide, and continues as a valuable seminal reference for those engaged in all types of programs involving animal care and use. The new edition has more than doubled the number of chapters in the original volume to present a more comprehensive overview of the current breadth and depth of the field with applicability to an international audience. Readers are provided with the latest information and resource and reference material from authors who are noted experts in their field. The book: - Emphasizes the importance of developing a collaborative culture of care within an animal care and use program and provides information about how behavioral management through animal training can play an integral role in a veterinary health program - Provides a new section on Environment and Housing, containing chapters that focus on management considerations of housing and enrichment delineated by species - Expands coverage of regulatory oversight and compliance, assessment, and assurance issues and processes, including a greater discussion of globalization and harmonizing cultural and regulatory issues - Includes more in-depth treatment throughout the book of critical topics in program management, physical plant, animal health, and husbandry. Biomedical research using animals requires administrators and managers who are knowledgeable and highly skilled. They must adapt to the complexity of rapidly-changing technologies, balance research goals with a thorough understanding of regulatory requirements and guidelines, and know how to work with a multi-generational, multi-cultural workforce. This book is the ideal resource for these professionals. It also serves as an indispensable resource text for certification exams and credentialing boards for a multitude of professional societies Co-publishers on the second edition are: ACLAM (American College of Laboratory Animal Medicine); ECLAM (European College of Laboratory Animal Medicine); IACLAM (International Colleges of Laboratory Animal Medicine); JCLAM (Japanese College of Laboratory Animal Medicine); KCLAM (Korean College of Laboratory Animal Medicine); CALAS (Canadian Association of Laboratory Animal Medicine); LAMA (Laboratory Animal Management Association); and IAT (Institute of Animal Technology).

The Future of Assisted Suicide and Euthanasia Neil M. Gorsuch, 2009-04-12 After assessing the strengths and

weaknesses of arguments for assisted suicide and euthanasia, Gorsuch builds a nuanced, novel, and powerful moral and legal argument against legalization, one based on a principle that, surprisingly, has largely been overlooked in the debate; the idea that human life is intrinsically valuable and that intentional killing is always wrong. At the same time, the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life-sustaining care, permitting intervention only in cases where an intention to kill is present.

Euthanasia: Searching for the Full Story Timothy Devos, 2021-03-17 This open access book has been written by ten Belgian health care professionals, nurses, university professors and doctors specializing in palliative care and ethicists who, together, raise questions concerning the practice of euthanasia. They share their experiences and reflections born out of their confrontation with requests for euthanasia and end-of-life support in a country where euthanasia has been decriminalized since 2002 and is now becoming a trivial topic. Far from evoking any militancy, these stories of life and death present the other side of a reality needs to be evaluated more rigorously. Featuring multidisciplinary perspectives, this thought-provoking and original book is intended not only for caregivers but also for anyone who questions the meaning of death and suffering, as well as the impact of a law passed in 2002. Presenting real-world cases and experiences, it highlights the complexity of situations and the consequences of the euthanasia law. This book appeals to palliative care providers, hematologists, oncologists, psychiatrists, nurses and health professionals as well as researchers, academics, policy-makers, and social scientists working in health care. It is also a unique resource for those in countries where the decriminalization of euthanasia is being considered. Sometimes shocking, it focuses on facts and lived experiences to challenge readers and offer insights into euthanasia in Belgium.

Assisted Dying for the Terminally Ill Bill (HL) Great Britain: Parliament: House of Lords: Select Committee on the Assisted Dying for the Terminally Ill Bill, 2005-04-28 The Bill was published as HLB 4, session 2004-05 (ISBN 01084188390). This volume contains a selection of the 14,000 personal letters and other submissions received by the Committee with regards to their inquiry into the Bill.

Physician-Assisted Death National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, 2018-09-29 The question of whether and under what circumstances terminally ill patients should be able to access life-ending medications with the aid of a physician is receiving increasing attention as a matter of public opinion and of public policy. Ethicists, clinicians, patients, and their families debate whether physician-assisted death ought to be a legal option for patients. While public opinion is divided and public policy debates include moral, ethical, and policy considerations, a demand for physician-assisted death persists among some patients, and the inconsistent legal terrain leaves a number of questions and challenges for health care providers to navigate when presented with patients

considering or requesting physician-assisted death. To discuss what is known and not known empirically about the practice of physician-assisted death, the National Academies of Sciences, Engineering, and Medicine convened a 2-day workshop in Washington, DC, on February 12-13, 2018. This publication summarizes the presentations and discussions from the workshop.

Killing and Letting Die Bonnie Steinbock, Alastair Norcross, 1994 This collection contains twenty-one thought-provoking essays on the controversies surrounding the moral and legal distinctions between euthanasia and letting die. Since public awareness of this issue has increased this second edition includes nine entirely new essays which bring the treatment of the subject up-to-date. The urgency of this issue can be gauged in recent developments such as the legalization of physician-assisted suicide in the Netherlands, how-to manuals topping the bestseller charts in the United States, and the many headlines devoted to Dr. Jack Kevorkian, who has assisted dozens of patients to die. The essays address the range of questions involved in this issue pertaining especially to the fields of medical ethics, public policymaking, and social philosophy. The discussions consider the decisions facing medical and public policymakers, how those decisions will affect the elderly and terminally ill, and the medical and legal ramifications for patients in a permanently vegetative state, as well as issues of parent/infant rights. The book is divided into two sections. The first, Euthanasia and the Termination of Life-Prolonging Treatment includes an examination of the 1976 Karen Quinlan Supreme Court decision and selections from the 1990 Supreme Court decision in the case of Nancy Cruzan. Featured are articles by law professor George Fletcher and philosophers Michael Tooley, James Rachels, and Bonnie Steinbock, with new articles by Rachels, and Thomas Sullivan. The second section, Philosophical Considerations, probes more deeply into the theoretical issues raised by the killing/letting die controversy, illustrating exceptionally well the dispute between two rival theories of ethics, consequentialism and deontology. It also includes a corpus of the standard thought on the debate by Jonathan Bennet, Daniel Dinello, Jeffrie Murphy, John Harris, Philipa Foot, Richard Trammell, and N. Ann Davis, and adds articles new to this edition by Bennett, Foot, Warren Quinn, Jeff McMahan, and Judith Lichtenberg.

A Merciful End Ian Robert Dowbiggin, 2003 This is the first full history of the euthanasia movement in the U.S. It tells for the first time the dramatic story of those reformers who struggled throughout the twentieth century to change the nation's attitudes towards mercy-killing and assisted suicide. Original, wide-ranging in scope, but sensitive to the personal dimensions of euthanasia. A Merciful End is an illuminating and cautionary account of tension between motives and methods within twenty-century social reform, providing a refreshingly new perspective on an old debate.

Death with Dignity Robert Orfali, 2011 In this book the author makes a case for legalized physician-assisted dying. Using the latest data from Oregon and the Netherlands, he puts a new slant on perennial debate topics such as slippery slopes, the integrity of medicine, and sanctity of life. This book provides an in-depth look at how we die in America today. It

examines the shortcomings of our end-of-life system. You will learn about terminal torture in hospital ICUs and about the alternatives: hospice and palliative care. The author scrutinizes the good, the bad, and the ugly. He provides a critique of the practice of palliative sedation. The book makes a strong case that assisted dying complements hospice. By providing both, Oregon now has the best palliative-care system in America. This book, above all, may help you or someone you care about navigate this strange landscape we call end of life. It can be an informed guide to a good death in the age of hospice and high-tech medical intervention.

Ethics for A-Level Mark Dimmock, Andrew Fisher, 2017-07-31 What does pleasure have to do with morality? What role, if

any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

Euthanasia, Ethics and Public Policy John Keown, 2002-04-25 Whether the law should permit voluntary euthanasia or physician-assisted suicide is one of the most vital questions facing all modern societies. Internationally, the main obstacle to legalisation has proved to be the objection that, even if they were morally acceptable in certain 'hard cases', voluntary euthanasia and physician-assisted suicide could not be effectively controlled; society would slide down a 'slippery slope' to the killing of patients who did not make a free and informed request, or for whom palliative care would have offered an alternative. How cogent is this objection? This book provides the general reader (who need have no expertise in philosophy, law or medicine) with a lucid introduction to this central question in the debate, not least by reviewing the Dutch euthanasia experience. It will interest all in any country whether currently for or against legalisation, who wish to ensure that their opinions are better informed.

Debating Euthanasia Emily Jackson, John Keown, 2011-12-02 In this new addition to the 'Debating Law' series, Emily Jackson and John Keown re-examine the legal and ethical aspects of the euthanasia debate. Emily Jackson argues that we owe it to everyone in society to do all that we can to ensure that they experience a 'good death'. For a small minority of patients who experience intolerable and unrelievable suffering, this may mean helping them to have an assisted death. In a liberal society, where people's moral views differ, we should not force individuals to experience deaths they find intolerable. This is not an argument in favour of dying. On the contrary, Jackson argues that legalisation could extend and enhance the lives of people whose present fear of the dying process causes them overwhelming distress. John Keown argues that voluntary euthanasia and physician-assisted suicide are gravely unethical and he defends their continued prohibition by law. He analyses the main arguments for relaxation of the law - including those which invoke the experience of jurisdictions which

permit these practices - and finds them wanting. Relaxing the law would, he concludes, be both wrong in principle and dangerous in practice, not least for the dying, the disabled and the disadvantaged.

Euthanasia and Law in the Netherlands John Griffiths, Alex Bood, Heleen Weyers, 1998 The Netherlands is the only country in the world in which euthanasia, under narrow-defined circumstances, is legally permissible. Considerable attention has been paid over a number of years to the problem of regulating it and information has been systematically collected concerning actual practice. Therefore the Dutch experience is of interest not only to the Dutch, but to anyone who is considering whether or not to make euthanasia a legal practice. This book is written for a reader without specific knowledge of law. The central focus of the book is on Dutch law pertaining to euthanasia, but it also considers the moral and legal principles that have played a role in the Dutch debate, the available evidence bearing on actual practice and on the effectiveness of legal control. It ends with some reflections on the problem of the 'slippery slope' and the question whether the Dutch experience is 'exportable'. It includes translations of the relevant legislation (including proposed reforms) and of three leading cases.

Euthanasia and Other Medical Decisions Concerning the End of Life P. J. van der Maas, J. J. M. van Delden, L. Pijnenborg, 1992

Euthanasia in the Netherlands R. Cohen-Almagor, 2008-04-08 The Dutch experience has influenced the debate on euthanasia and death with dignity around the globe, especially with regard to whether physician-assisted suicide and euthanasia should be legitimized or legalized. A review of the literature reveals complex and often contradictory views about the Dutch experience. Some claim that the Netherlands offers a model for the world to follow; others believe that the Netherlands represents danger, rather than promise, and that the Dutch experience is the definitive answer regarding why we should not make active euthanasia and physician-assisted suicide part of our lives. Given these contradictory views, it has become clear that fieldwork is essential to developing a more informed opinion. Having investigated the Dutch experience for a number of years, and after thoroughly reading the vast literature published in English, I went to the Netherlands for one month in the summer of 1999 to get a feel for the local situation. I felt that this would provide the basis on which I could better interpret the findings of the available literature. I visited the major centers of medical ethics, as well as some research hospitals, and spoke with leading figures in the euthanasia policy and practice. The time spent was extremely beneficial and enriching. I followed in the footsteps of Carlos Gomez, who published a book following one month of extensive research in the Netherlands.
