pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences. The text is written in an appropriate 'bullet-point' style to allow easy reading rapid exam preparation. The contents concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific important areas of knowledge. The book is illustrated with clear line drawings which are clearly annotated to aid learning. Now available on StudentConsult with a downloadable ebook version included. 250 new online single-best answer questions in the format of the MRCS Part A examination will give the reader valuable experience in assessing their knowledge. Each answer will refer back to text for further reading as required. New and updated OSCE 'Clinical scenarios' will be included at the end of every chapter.

Instant Anatomy presents anatomy and anatomical relationships in a simple, unique, schematic manner to aid the speedy understanding and retrieval of anatomical facts. It shows structures such as nerves and blood vessels in their entirety, unlike the partial, regional presentations given in most textbooks. Covering the major aspects of anatomy, each section presents the relevant structures in double page spreads, with clear, full-colour diagrams on the left and concise text for each structure on the right. This new fifth edition includes more surface anatomy such as new myotome maps, bones of the hands and feet, principles of movement at shoulder and hip and images to clarify the understanding of the inguinal region and the lesser sac of the stomach. Ideal for use alongside a core anatomy textbook, Instant Anatomy is the perfect quick reference guide for medical students, surgeons, radiologists and those in many other specialties. The companion website at www.instantanatomy.net with its

Features dedicated chapters describing anatomy of lumbar puncture, epidural anaesthesia, peripheral nerve blocks, echocardiographic anatomy of the heart, and endoscopic anatomy of the gastrointestinal tract – as well as a unique overview of human factors and minimizing error in the operating room, essential non-technical skills for improving patient outcomes and safety.

The viva component of the MRCS examination is traditionally the most feared and elusive part of the whole exam.

Contained within the syllabus of core and system modules there are favourite examination topics which are more commonly asked than others. This new book covers all these popular subjects and illustrates them with sample viva-style questions. The answers give the candidate guidance on how to respond to these effectively and on what is required to pass the exam. This new book has been written to aid any candidate in preparing to sit a surgical viva, and will be of value to MRCS candidates as well as students for undergraduate surgical finals and surgical registrars prior to the exit examination. Covers the six major subject areas of the MRCS viva exam: applied surgical anatomy, operative surgery, clinical pathology, principles of surgery, applied physiology, and critical care. Includes coverage of the new communication skills section, designed to test the candidate's ability to communicate with patients and supply information to colleagues. Provides over 160 viva topics with subsidiary questions in the style of the exam. Targets the hardest part of the exam which has the lowest pass rate.

Cracking the MRCS Viva is an outstanding guide to the MRCS Viva examination. Its unique approach recreates the structure and content of each individual viva, allowing the

reader to self-test, or two students to recreate mock viva sessions for themselves. Divided into six sections to mirror the exam - applied surgical anatomy, operative surgery, applied surgical pathology, principles of surgery, applied surgical physiology, and critical care - each section covers a range of topics, listed alphabetically, and contains all the information required to pass the exam using concise, bullet-point text, helpful tables and easy to reproduce diagrams. Written by registrars who have all recently passed the MRCS, plus an MRCS examiner, this comprehensive and user-friendly revision guide also contains considerable input from other senior specialists.

SBA and EMQs for the MRCS Part A is an invaluable guide to sitting and passing the examination, which tests the candidates in their knowledge of the basic sciences as applied to surgical practice. Based on the highly successful Insider Medical MRCS Examination Clinical Course, this book facilitates the pathway for a novice clinician to pass this ch Focuses on the application of the basic sciences (anatomy, physiology, pathology, microbiology and pharmacology) to the management of surgical patients. This book emphasises on the physiological and pharmacological basis of post-operative care, ITU care, as well as the anatomical basis of commonly undertaken ward procedures and surgical operations.

FRCR Part 1 Anatomy Mock MCQ Examinations provides essential practice for the new anatomy examination introduced by the Royal College of Radiologists. the discussion of anatomy relevant to surgical practice. It is rare for junior doctors to receive adequate exposure to radiology in their day-to-day surgical practice, which makes preparation for this part of the examination difficult. For many, examinations are stressful. The last thing a candidate needs is to be faced with unfamiliar radiological images. This review of surgically relevant radiological imaging aims to prevent initial uncertainties and will allow candidates to discuss relevant anatomy and score valuable points. An invaluable addition to any revision plan, this title also:

- highlights typical anatomy viva questions
- familiarizes candidates with a range of images of differing modalities (plain film, fluoroscopy, computed tomography and magnetic resonance imaging)
- introduces different planes of imaging, enabling candidates to deal with unusual coronal or sagittal views with confidence
- gives concise but detailed notes for quick consultation
