"A wondrous, sparkling fusion of wisdom and insight." - Patricia Santhuff What do the wonderful myths of ancient Greece, the beautiful stories in the Bible and Qur'an, and all the sacred stories from traditions around the world, have in common? They open our hearts to wonder, mystery, passion, and joy. I know, on the outside these stories seem very different, confusing, conflicting, and often violent and divisive. But when read symbolically and internally, they are all telling the same story. They show us the path of spiritual awakening and enlightenment. Sometimes the story is called "Returning to the Promised Land." Sometimes it's called "Seeking the Holy Grail." Sometimes it's called "Persephone's Return to Olympus." But whatever it's called, the inner meaning and purpose is always the same. The stories are all a call to awaken, to live passionately and consciously, and to enter the door that leads to enlightenment and communion with the divine. The door is always open. The light is always ready to receive us. But we have to learn how to tread the path! Fortunately, that's what all the sacred stories are really about. THE DOOR IS OPEN uncovers the 7 Universal Steps that are found within the symbols and allegories of all great mythology and scripture. Each chapter ends with a series of practical and enjoyable spiritual exercises and activities. You can do this work on your own, or together with a group. It could be a church or synagogue group, a book club, a classroom, or any group of friends who want to get together and expand their spiritual horizons.

In My Aspartame Experiment: Report from a Private Citizen, author Victoria Inness-Brown recounts her controversial 2-1/2 year study of the effects of the artificial sweetener aspartame. Found in packets of NutraSweet or Equal, the sweetener is ingested by an estimated 200 million people and found in over 6,000 consumables, including sodas, candies, coffees, pharmaceuticals, vitamins, and dairy products. Though approved by the FDA, Inness-Brown claims the approval was based on studies cut off before the true effects of the additive could be seen. In addition, human studies use aspartame in capsules, which is not assimilated as fully as its liquid form, thereby minimizing adverse effects. Concerned about the health of family members addicted to diet soda, Inness-Brown raised 108 rats, giving 60 NutraSweet-laced water for 2 ½ years. As her rats on aspartame began manifesting tumors, paralysis, infected and bleeding eyes, and obesity, Inness-Brown made digital videos of the results, culminating in a disturbing visual record of the dangers of the additive. When leaked on the net in 2008, her findings became a hot news topic on popular blogs. Carefully researched, laced with photos and quotes from aspartame sufferers, scientists, and doctors, her book shows that a citizen can go up against a drug conglomerate and provide the public with important new information about a dangerous substance. Not since Rachel Carson's Silent Spring, has a book held such potential for social change. Her analysis of the environment she provided her rats brings up frightening issues about pesticides, herbicides, genetically modified foods, animal products, water and air quality. She believes that we are the rats of the companies that liberally spread their synthetic chemicals worldwide. No one fully understands the long-term effects-especially the complex interactions from intermixing thousands of toxic chemicals within the plant and animal kingdoms sustaining our planet.

\*Includes pictures of art depicting important people, places, and events. \*Describes the different classes of Roman gladiators and

the armor and weaponry they used. \*Describes gladiatorial combat and the myths and misconceptions about the fight. \*Includes footnotes and a bibliography for further reading. "He vows to endure to be burned, to be bound, to be beaten, and to be killed by the sword." - The gladiator's oath, according to Petronius in the Satyricon. Gladiators are somewhat synonymous with ancient Rome, and even thousands of years after they performed on the sands, when people are asked about Roman culture, many think about and refer to the bloody spectacles of men fighting to the death in the arena. Gladiatorial combat is often regarded as barbaric, and most find it very difficult to comprehend how people could have enjoyed watching something so violent, but nevertheless, the spectacle still intrigues and fascinates people today, whether in movies like *Gladiator* or television shows about *Spartacus*. Gladiatorial combat traces its origins back to the early Republican period from the 5th-3rd century B.C., but it's still unclear where these combats first appeared. Credit has been given to both the Etruscans in northern Italy and the Campanians in southern Italy, though the first recorded gladiatorial combat occurred in the 3rd century B.C. at the funeral of D. Junius Brutus Pera. His sons organized a combat between three different pairs of gladiators who fought at their father's grave, but exactly what these first gladiatorial combats were supposed to represent remains unclear. Some believe that the spilling of human blood was a way of offering a sacrifice to the dead, while others suggest that the contests themselves were a funeral offering in honor of the dead. Gladiatorial combat began in the Republican period and was associated with death and burial, but due to its popularity it became an organized form of entertainment in the Imperial Age, and even as the gladiators were considered low class, they were also admired, leading to some Roman men and women volunteering to become gladiators. Whatever the original role of gladiatorial combats, they thrilled Roman audiences for many centuries. Each match usually pitted one type of gladiator against a different type of gladiator, with each having their own kind of armor, weaponry and fighting style. For example, the *retiarius* was a gladiator that used a net, dagger and trident as his offensive weapons, while only wearing a protective guard over his left arm for protection. The *retiarius* would typically fight against the *secutor*, a gladiator armed with a sword, large shield, helmet and protective covering on his right arm and left leg. Therefore, a *retiarius* sacrificed armor for quickness in battle, while the *secutor* did the opposite. Although people often think of gladiators fighting to the death, the outcome of gladiatorial combats was not always fatal for one of the participants. If a gladiator fought well, the sponsor of the show could spare him, particularly if the crowd desired it. The fact that the outcome of matches was never the same and the crowd could help determine the result of the match certainly added to the Roman public's pleasure, making it a lot less surprising that such an abhorrent spectacle still fascinated the modern world. *The Roman Gladiators: The History and Legacy of Ancient Rome's Most Famous Warriors* examines the history of the gladiators and the games they participated in, explaining what life and death was like for the men who fought in Rome's most famous form of entertainment. Along with pictures depicting important people, places, and events, you will learn about gladiators like you never have before.
