Stop Motion: Craft Skills for Model Animation Susannah Shaw,2012-09-10 To make great animation, you need to know how to control a whole world: how to make a character, how to make that character live and be happy or sad. You need to create four walls around them, a landscape, the sun and moon - a whole life for them. You have to get inside that puppet and first make it live, then make it perform. Susannah Shaw provides the first truly practical introduction to the craft skills of model animation. This is a vital book in the development of model animation which, following the success of Aardman's first full-length film 'Chicken Run', is now at the forefront of modern animation. Illustrated in full colour throughout you are shown step by step how to create successful model animation. Starting with some basic exercises, readers will learn about developing a story, making models, creating sets and props, the mechanics of movement, filming, post production and how to set about finding that elusive first job in a modern studio.

Claymates Dev Petty,2017-06-20 Meet the claymates: two balls of clay that can become anything--even best friends! What can you do with two blobs of clay? Create something amazing! But don't leave them alone for too long. Things might get a little crazy. In this photographic friendship adventure, the claymates squish, smash, and sculpt themselves into the funniest shapes imaginable. But can they fix a giant mess before they're caught in the act?

Frame-By-Frame Stop Motion Tom Gasek,2013-01-17 In a world that is dominated by computer images, alternative stop motion techniques like pixilation, time-lapse photography and down-shooting techniques combined with new technologies offer a new, tangible and exciting approach to animation. With over 25 years professional experience, industry veteran, Tom Gasek presents a comprehensive guide to stop motion animation without the focus on puppetry or model animation. With tips, tricks and hands-on exercises, Frame by Frame will help both experienced and novice filmmakers get the most effective results from this underutilized branch of animation. Practical insight and inspiration from leading filmmakers like PES (Western Spaghetti Creator, Time Magazine's #2 Viral Video of 2008), Dave Borthwick, of the Bolex Brothers and more! The accompanying website will include further content driven examples, indexes of stop motion software, a recommended film list and tools and resources for the beginner and intermediate stop motion artist, animators and filmmakers.

Using Technology with Classroom Instruction That Works Howard Pitler, Elizabeth R. Hubbell, Matt Kuhn, 2012-08-02
Technology is ubiquitous, and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.

advanced skills such as lighting, scenery, sound effects and different camera angles.

Happily Ticked Off Andrea R. Frazer, 2015-12-01 Former Hollywood sitcom writer and funny girl Andrea R. Frazer thought she had it all: a hunky husband, two gorgeous kids, a house in the 'burbs . . . but when her son was diagnosed with Tourette Syndrome, a disorder that causes uncontrollable tics and twitches, her fantasy life imploded. Terrified, she feared he would bark, scream and curse in circle time. Turns out the only person who barked, screamed and cursed was Andrea, as she went head-to-head with this confusing condition. From diet to meds, shrinks to therapists, Frazer has written a no-holds-barred mom-moir about the realities of raising a kid on the spectrum. It isn't always pretty, but it's real, and if you're as scared as she was, clarity can look pretty darn gorgeous. Written with humor, transparency and most importantly, hope, it's Andrea's desire that this book will hold the hand of every special needs parent. May it whisper in your ear, 'You did not cause this condition. Stop blaming yourself. You are not alone.' And while you're at it, eat a taco. Life is better with a little food. (Trust me on this one.) ~ Andrea

The Library Screen Scene Renee Hobbs, Liz Deslauriers, Pam Steager, 2019 In the past two decades, several U.S. states have explored ways to mainstream media literacy in school curriculum. However one of the best and most accessible places to learn this necessary skill has not been the traditional classroom but rather the library. In an increasing number of school, public, and academic libraries, shared media experiences such as film screening, learning to computer animate, and video editing promote community and a sense of civic engagement. The Library Screen Scene reveals five core practices used by librarians who work with film and media: viewing, creating, learning, collecting, and connecting. With examples from more than 170 libraries throughout the United States, the book shows how film and media literacy education programs, library services, and media collections teach patrons to critically analyze moving image media, uniting generations, cultures, and communities in the process.
