The Birthday of Eternity takes a lively, gonzo-like romp into the Victorian school story, a world replete with sex, decadence, and war. Oliver Wilde, an ailing scholar, recalls his lost youth as a much-bullied student attending Malmedy--a Victorian boarding school on an English moor. Like his near-namesake, Oscar Wilde, Oliver hides his inner demons. A spiritless summer explodes when two likeminded adolescents invade his world: the sexually alluring Sabine Loy, endowed with an ability to see the dead, and the pleasure seeker, Lucien Gale, a decadent able to discern the soul's darkest secrets. The trinity embark on an odyssey, venturing into drugs and sex while pursuing every precious moment of life. Oscar's captivation turns to horror when a pair of mysterious deaths disrupts Malmedy. What does Oliver have to do with the tragedies? What dreadful deeds does he conceal? And what strange fate lies ahead for the trio as a dying century ends? The Birthday of Eternity unveils a bittersweet school story unlike any other, an audacious merry-go-round ride rife with depravity and those twin essentials of youth--angst and anarchy.

This paper examines the potential of hydrogen fuel for hard-to-decarbonise energy uses, including aviation, shipping and other. But the decarbonisation impact depends on how hydrogen is produced.

This book provides a comparative account of the process of urban regeneration and examines the factors influencing these processes, as well as the consequences of their implementation. Through a mixture of theoretical discussion and a series of case studies a thorough examination is made of the extent to which these different European old industrial conurbations are facing similar problems.

Provides students and researchers with a much-needed, comprehensive resource on the subject of colonialism and expansion. From a global perspective, the set traces many facets of colonial growth and imperialism, and much more.

The Code of Practice for Electric Vehicle Charging Equipment Installation, 3rd Edition has been updated to align with the current requirements of BS 7671. This is a practical guide for use by anyone planning to install electric vehicle charging equipment. It provides specific electrical installation requirements for electrical contractors as well as essential guidance for anyone planning to specify, procure or manage the installation of such equipment.

For every person over the age of 65 in today's European Union, there are four people of working age; by 2050, there will only be two. Demand for long-term care, of which home care forms a significant part, will inevitably increase in the decades to come.

Despite the importance of the issue, however, up-to-date and comparative information on home care in Europe is lacking. This book attempts to fill some of that gap by examining current European policy on home care services and strategies. Home Care

Also available with binder (ISBN 9780115601439) The National Round Table on the Environment and the Economy (NRTEE) is dedicated to exploring new opportunities to integrate environmental conservation and economic development, in order to sustain Canada's prosperity and secure its future. This report responds to key concerns highlighted by the (NRTEE) in its 2007 Response to its obligations under the Kyoto Protocol Implementation Act (2007 KPIA Response). Chief among those concerns were differing and inconsistent forecasting methods used among various federal departments to describe the greenhouse gas (GHG) emissions reductions accruing from a particular policy measure or initiative, leading to issues of additionality, free ridership, rebound effect, and policy interaction effects. The core of this report defines emissions forecasting best practices from methodological and governance perspectives. It concludes with a discussion on findings from case studies, along with detailed lessons for Canada, and specific conclusions on incorporating best practices in GHG emissions forecasting.--Document.

The Office for Budget Responsibility was established to provide independent and authoritative analysis of the UK's public finances. Part of this role includes producing the official economic and fiscal forecasts. This report sets out forecasts for the period to 2015-16. The report also assesses whether the Government is on course to meet the medium-term fiscal objectives and presents preliminary observations on the long-run sustainability of the public finances. Since the June forecast, the UK economy has recovered more strongly than initially expected. The GDP growth was greater than expected in both the 2nd and 3rd quarters, but that unemployment levels have risen to levels that the June forecast did not anticipate until the middle of 2012. In general the world economy has also grown more strongly. CPI inflation has remained slightly higher than expected in June, whilst public finances have performed as forecast. The interest rates on UK debt are lower than in June. The OBR forecasts that the economy will continue to recover from the recession, but at a

The UK Climate Change Act was the first case of a country implementing blanket legally binding long-term emissions reduction targets in order to combat climate change. This book provides the first accessible and in-depth analysis of the UK's complex Climate Change Act framework, presenting the discussion in a clear and interdisciplinary manner designed to open the workings of the challenging framework to a broad audience. It discusses the political 'story' surrounding the framework, and its treatment in scholarly environmental literature; analyses the technical content of the Act; explores the framework's international significance, and its internal 'subnational' dimensions and impact, engaging the UK's devolved jurisdictions of Northern Ireland, Scotland, and Wales. This first, much-needed interdisciplinary treatment of the framework is both introductory and analytical in nature and will be of interest to scholars, practitioners and general readers of environmental studies, policy and governance.
