Publisher Description

This is the third volume of a trilogy on English Language education in Asia within the Routledge Critical Studies in Asian Education. Put together by editors and contributors selected by Asia TEFL, this book provides a timely and critical review of the current trends in tertiary level English education in Asia. It foregrounds the developments and trends, policies and implementation, as well as research and practice. Written by ELT scholars and educational leaders, this book presents articles on China, Hong Kong, India, Japan, Korea, Malaysia, the Philippines, Singapore, Thailand, and Vietnam. While the authors focus on their own local issues, providing an overview of the state of tertiary English teaching in their respective territories, they also provide insights from their successes and failures which can help inspire solutions to similar challenges faced internationally in the field. Chapters in the book include: • Heading toward the global standardization of English education in Korean universities • English in tertiary education in India: A Janus-faced perspective with special reference to University of Delhi • Developing English language skills in the Singapore higher education context • ELT at tertiary institutions in China: A developmental perspective This book will be valued by administrators, researchers and scholars interested in bilingualism, language policy and planning in higher education.

mathematics to an ethnically diverse school population, including the political dimension of mathematics education within the context of governmental efforts to improve achievement in school mathematics. Culturally Responsive Mathematics Education moves beyond a point of view that is internal to mathematics education as a discipline, and instead offers a broad perspective of mathematics as a significant, liberating intellectual force in our society. The editors of this volume bring together contributions from many of the leading teachers, teacher educators, researchers, scholars, and activists who have been working to reorient mathematics education in ways that reflect mathematics education as accomplished, first and foremost, through human interactions.

In creating interpretive strategies for maritime sites, archaeologists and resource managers often are required to think creatively to overcome challenges and problems. These issues include interpreting sites in inaccessible locations and extremely deep water, enabling and controlling access to fragile sites and restricted areas, monitoring visitor behavior, making information interesting to a wide audience, and creating opportunities for public engagement, among other concerns. Meeting Challenges presents cutting-edge interpretation and public education strategies for maritime resources, both on land and underwater, with emphasis on solving the unique problems often associated with presenting these fragile, limited-access sites as heritage attractions and on developing effective visitation and civic engagement opportunities.

A practical, comprehensive guide to help educators go beyond student engagement and differentiation to achieve student empowerment. Student engagement continues to be an important goal for teachers, but it shouldn't end there. There is no one-size-fits-all approach to teaching anymore. School districts that have begun to shift their focus from student engagement to student empowerment, and from differentiation to personalized learning, have seen a rise in test scores, motivation, attention, and self-confidence. When students have voice and choice, they gain control over their learning and their actions and feel empowered to work harder and achieve more. Through sample lessons, strategies, and applications, educators will learn how to shift from engagement to student empowerment, from differentiation to personalized learning, and practical ways to make these strategies work in the classroom. Move from engagement to student empowerment with: A comprehensive guide to engaged learning A comprehensive guide to empowerment Research-based best practices to promote empowerment Move from differentiation to personalized learning with: A comprehensive guide to refining differentiation practices A comprehensive guide to personalized learning Practical ways to use voice and choice, instructional design, and classroom climate to promote student empowerment An entire chapter dedicated to the social and emotional learning side of personalized learning Digital content includes reproducible forms and a PDF presentation for professional development.

This book draws on financial, economic, and management theory in its exploration of the theory underlying risk and risk management at both micro- and macroeconomic levels. It has a particular reference to the public financial sector. Chapters investigate the elimination of currency risk in the Transatlantic Trade and Investment Partnership (TTIP), as well as the changes that credit ratings undergo due to the influence of credit spreads. Featuring contributions on important topics such as public safety and the internet, intellectual capital, bank regulatory risk in the EU, the financial distress of public sector entities, and systemic risk in the insurance sector, it also explores innovative and emerging issues in the European tax gap in personal income taxes and VAT carousel fraud in selected European countries. Discussion of the complex nature of risk management in public administration will appeal to public officials, policy-makers, academics and researchers alike.

As much as any other nation, Germany has long been understood in terms of totalizing narratives. For Anglo-American observers in particular, the legacies of two world wars still powerfully define twentieth-century German history, whether through the lens of Nazi-era militarism and racial hatred or the nation's

emergence as a “model” postwar industrial democracy. This volume transcends such common categories, bringing together transatlantic studies that are unburdened by the ideological and methodological constraints of previous generations of scholarship. From American perceptions of the Kaiserreich to the challenges posed by a multicultural Europe, it argues for—and exemplifies—an approach to German Studies that is nuanced, self-reflective, and holistic. This book is an interdisciplinary guide to connect art lessons with core curriculum. Social studies, language arts, math, and/or science are supported in every unit. It is an ideal source for elementary and middle school teachers to enrich their curriculum. It is an invaluable tool for art teachers.

The years between 1776 and 1851 are of profound importance for the social and urban historian. English town dwellers of the period experienced some fundamental changes in their way of life: rapid population growth; and an unprecedented rate of social change resulting from this. These ever-increasing armies of town dwellers presented the local and central authorities with a myriad of urgent problems, including those of feeding, housing and controlling a turbulent populace. These years saw the emergence of a new, essentially modern, machinery of control for running an urban society. Despite these dramatic changes an equally important feature of the period was the elements of

continuit - in work, family life and leisure. Part one deals with the physical changes, the problems for the town dweller inherent in these, and the distinctions of social class that developed. Part two discusses the political response to the urbanization of England and the problems this caused: poverty and law enforcement. In part three the continuities are assessed: in leisure, rituals and family life. At every opportunity Dr Walvin brings his material to life with his extensive use of contemporary commentaries. In this lively and wide-ranging study, firmly rooted in recent scholarly research, Dr Walvin provides a balanced and up-to-date picture of a society which, although experiencing the most fundamental changes was also characterized by the continuities in its people's habits and social customs. This book was first published in 1984.
