The Mayan god of death sends a young woman on a harrowing, life-changing journey in this dark, one-of-a-kind fairy tale inspired by Mexican folklore. “A spellbinding fairy tale rooted in Mexican mythology . . . Gods of Jade and Shadow is a magical fairy tale about identity, freedom, and love, and it's like nothing you've read before.”—Bustle NEBULA AWARD FINALIST • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • Tordotcom • The New York Public Library • BookRiot The Jazz Age is in full swing, but Casiopea Tun is too busy cleaning the floors of her wealthy grandfather’s house to listen to any fast tunes. Nevertheless, she dreams of a life far from her dusty small town in southern Mexico. A life she can call her own. Yet this new life seems as distant as the stars, until the day she finds a curious wooden box in her grandfather’s room. She opens it—and accidentally frees the spirit of the Mayan god of death, who requests her help in recovering his throne from his treacherous brother. Failure will mean Casiopea’s demise, but success could make her dreams come true. In the company of the strangely alluring god and armed with her wits, Casiopea begins an adventure that will take her on a cross-country odyssey from the jungles of Yucatán to the bright lights of Mexico City—and deep into the

darkness of the Mayan underworld. Praise for Gods of Jade and Shadow “A dark, dazzling fairy tale . . . a whirlwind tour of a 1920s Mexico vivid with jazz, the memories of revolution, and gods, demons, and magic.”—NPR “Snappy dialog, stellar worldbuilding, lyrical prose, and a slow-burn romance make this a standout. . . . Purchase where Naomi Novik, Nnedi Okorafor, and N. K. Jemisin are popular.”—Library Journal (starred review) “A magical novel of duality, tradition, and change . . . Moreno-Garcia’s seamless blend of mythology and history provides a ripe setting for Casiopea’s stellar journey of self-discovery, which culminates in a dramatic denouement. Readers will gladly immerse themselves in Moreno-Garcia’s rich and complex tale of desperate hopes and complicated relationships.”—Publishers Weekly (starred review)

An evaluation of the National Health Service reforms which resulted from the white paper Working for Patients, delivered in January 1989. The book contains accounts of seven research projects carried out on this topic over the period 1990 to 1993. Each chapter has been specially written for the book and describes the project in question, reports a number of its key findings and offers some thoughts about the likely course of future health policy in the relevant area as the NHS reforms develop over time.

In May 2010, Labour suffered one of its worst ever election defeats. A few

months later it chose Ed Miliband as its new leader. His task? To win back power after just one term in opposition - a tall order given how many voters had come to blame Labour for the economic mess the country was in, and to see the party as a soft-touch when it came to immigration and welfare. Even those who were more sympathetic had their doubts. Was Ed Miliband really leadership material? Would he be able to overcome defeating his elder brother to get to the top? Would he have to do as he was told by the trade union leaders who had helped him win? Could he resolve the tensions between Blairites and Brownites, Blue Labour and New Labour? Might his desire to keep his colleagues united mean Labour stayed stuck in its comfort zone? Would he, in seeking to break from the party's recent past, take it too far to the left? Could he offer the electorate something really radical in 2015 or would he instead choose something safer but ultimately less inspiring? And what should twenty-first social democracy look like now that the money had run out? This book, by one of the country's foremost experts on party politics, seeks to answer all those questions and, in the run up to the 2015 general election, to ask one more: will Ed Miliband's five year mission turn out to be 'mission impossible'?

A pressing challenge in the modern health care system is the gap between education and clinical practice. Emerging technologies have the potential to

bridge this gap by creating the kind of team-based learning environments and clinical approaches that are increasingly necessary in the modern health care system both in the United States and around the world. To explore these technologies and their potential for improving education and practice, the National Academies of Sciences, Engineering, and Medicine hosted a workshop in November 2017. Participants explored effective use of technologies as tools for bridging identified gaps within and between health professions education and practice in order to optimize learning, performance and access in high-, middle-, and low-income areas while ensuring the well-being of the formal and informal health workforce. This publication summarizes the presentations and discussions from the workshop.

'Culture' and 'violence' have always been regarded as antithetical terms. In *The Culture of Violence*, Francis Barker takes a different view. Central to his argument is the contention that, contrary to post-Enlightenment humanist, liberal and conservative thought, 'culture' does not necessarily stand in opposition to political inequality and social injustice, but may be complicit with the oppressive exercise of power. The book focuses on Shakespearean tragedy and on the historicism and culturalism of much present-day cultural theory. Barker's analysis moves dialectically backwards and forwards between these two moments in

order to illuminate aspects of early modern culture, and to critique the ways in which the complicity between culture and violence has been occluded. Rejecting the tendency of both modernism and post-modernism to homogenise historical time, Barker argues for a genuinely new, 'diacritical' understanding of the violence of history.

This text offers practical advice on how to regain trust between patient and practitioner, following difficulties during the 1990s and early 21st century. It examines the nature of trust, outlining sociological models of trust and identifying relevant aspects.

This book bestows academic light in place of disputed ideological heat emanating primarily from Conservative political polemicists on the role, influence and ideological trajectory of the One Nation Group of Conservative MPs. It contributes to the debates on policy and the role of 'think tanks' in such policy formulation over the period 1950-2005; the debate over the existence and extent of 'consensus' in post-war British politics; and to research on political parties in general and factions and tendencies in particular.

On 18th April 2017, Theresa May stunned Britain by announcing a snap election. With poll leads of more than 20 points over Jeremy Corbyn's divided Labour Party, the first Tory landslide since Margaret Thatcher's day seemed certain. Seven weeks later, Tory dreams had turned to dust. Instead of the 100-seat victory she'd been hoping for, May had lost her

majority, leaving Parliament hung and her premiership hanging by a thread. Labour MPs, meanwhile, could scarcely believe their luck. Far from delivering the wipe-out that most predicted, Corbyn's popular, anti-austerity agenda won the party 30 seats, cementing his position as leader and denying May the right to govern alone. This timely and indispensable book gets to the bottom of why the Tories failed, and how Corbyn's Labour overcame impossible odds to emerge closer to power than at any election since the era of Tony Blair. Who was to blame for the Tories' mistakes? How could so many politicians and pollsters fail to see what was coming? And what was the secret of Corbyn's apparently unstoppable rise? Through new interviews and candid private accounts from key players, political journalists Tim Ross and Tom McTague set out to answer these questions and more, piecing together the inside story of this most dramatic and important of elections.

The Patient Protection and Affordable Care Act (PPACA) remains vulnerable to repeal, largely because Congress and the Supreme Court have granted each state the power to veto major provisions of the law before they take effect in 2014. The PPACA itself empowers states to block the employer mandate, to exempt many of their low- and middle-income taxpayers from the individual mandate, and to reduce federal deficit spending, simply by not establishing a health insurance "exchange." To date, 34 states have refused to create Exchanges and some 16 states have announced they would not expand their Medicaid programs. Yet the Obama administration is trying to coerce states into implementing parts of the expansion that the Court rendered optional. This special White Paper provides a comprehensive review of the process now occurring between states and the Obama Administration, underscoring how a critical mass of states exercising their vetoes over Exchanges and the Medicaid expansion can force

The long-awaited autobiography from Georgetown University's legendary coach, whose life on and off the basketball court threw America's unresolved struggle with racial justice into sharp relief. John Thompson was never just a basketball coach and *I Came As A Shadow* is categorically not just a basketball autobiography. After five decades at the center of race and sports in America, Thompson—the iconic NCAA champion, Black activist, and educator—was ready to make the private public at last, and he completed this autobiography shortly before his death in the historically tumultuous summer of 2020. Chockful of stories and moving beyond mere stats (three Final Fours, four-time national coach of the year, seven Big East championships, 97 percent graduation rate), Thompson's book drives us through his childhood under Jim Crow segregation to our current moment of racial reckoning. We experience riding shotgun with Celtics icon Red Auerbach and coaching NBA Hall of Famers like Patrick Ewing and Allen Iverson. What were the origins of the phrase "Hoya Paranoia"? You'll see. And parting his veil of secrecy, Thompson brings us into his negotiation with a D.C. drug kingpin in his players' orbit in the 1980s, as well as behind the scenes of his years on the Nike board. Thompson's mother was a teacher who had to clean houses because of racism in the nation's capital. His father could not read or write. Their son grew up to be a man with his own larger-than-life statue in a building that bears his family's name on a campus once kept afloat by the selling of 272 enslaved Black people. This is a great American story, and John Thompson's experience sheds light on many of the issues roiling our nation. In these pages, he proves himself to be the elder statesman whose final words college basketball and the country need to hear. *I Came As A Shadow* is not a swan song, but a

Features political diaries of one of Australia's most promising national leaders - Mark Latham. This work includes bulletins from the front line of Labor politics. It provides a view into the life of a man, the Party and the nation at a crucial time in Australian history.

You will not read this story of Dave and Nick anywhere else. Ann Treneman, the sketchwriter for The Times, chronicles all the highlights (and even more of the lowlights) of their extraordinary relationship in a love story that not even Mills & Boon could imagine. Two posh boys who found each other, a bromance to remember, full of love, hate, fratricide, war, riots, bad hair and even worse speeches, not to mention that sexy AV referendum. Through her perceptive sketches, Ann Treneman tells the story of how they dated, flirted with others (including the brooding hulkish Gordon), but eventually came together in a sun-kissed wedding in the Downing Street rose garden. She reveals how Nick struggled to be the perfect political wife while starting a new sub-career as a national hate figure, and chronicles Dave's long and bruising battle with arrogance. She tells the shocking story of their arch rival, the man who killed his brother and got away with it. The nightmare of the grandparents, the mad aunts and uncles, the ambitious kids and the economy that simply would not do as it was told. This is the tale of two men and a screaming baby of a coalition, trying to stay true to each other when surrounded by political mayhem and madness. Laugh? Or cry (with laughter)? How about both?

of the crisis fade behind us, great obstacles to prosperity remain. Mark Field's acclaimed first book, *Between the Crashes*, explored the economic collapse. Now, in his new collection of essays, the City of London MP charts our progress as the economy splutters back to life, untangling the rhetoric of deficit reduction from reality, and meaningful reform from political posture. *The Best of Times* traces the compromises of coalition government and the emergence of a new anti-establishment sentiment, taking in the Scottish independence referendum, UKIP's rise and fall, and the unexpected genesis of Corbynism. Conflicts in the Middle East open a dark chapter in foreign affairs while, closer to home, a shock Conservative victory in the 2015 general election ensures a hotly debated EU referendum. Yet, for all the surprises delivered by the past three years, today's challenges are deeply familiar: shifting global power, generational wars and disillusionment with capitalism still threaten our prosperity. Engaging and unflinching, *The Best of Times* offers erudite analysis and practical solutions to the challenges facing Britain today.

much as he claims? Are they devotees of the Big Society or just the 'same old Tories', keen on cuts and obsessively Eurosceptic? The answers, as this accessible and gripping book shows, are as intriguing and provocative as the questions. Based on in-depth research and interviews with the key players, Tim Bale explains why the Tories got themselves into so much trouble in the first place and how they were finally able to get things back on track. In the new paperback version, he also explores their inability to win an outright victory at the 2010 election and looks at their decision to share power with the Liberal Democrats. *The Conservative Party: From Thatcher to Cameron* is a must-read for anyone wanting to understand what makes the Tories tick. And it contains valuable lessons about what to do - and what not to do - for their Labour opponents.

Prime Minister's Questions is the bear pit of British politics. Watched and admired around the world, it is often hated at home for bringing out the worst in our politicians. Yet despite successive leaders trying to get away from Punch and Judy politics, it's here to stay. Ayesha Hazarika and Tom Hamilton spent five years preparing Ed Miliband for the weekly joust, living through the highs and lows, tension and black humour of the political front line. In this insightful and often hilarious book, including an updated afterword discussing the key events of 2018, they lift the lid on PMQs and what it's really like to ready the leader for combat. Drawing on personal recollections from key players including Tony Blair, David Cameron, Harriet Harman, William Hague and Vince Cable alongside their unique knowledge, Hazarika and Hamilton take you behind the scenes of some of the biggest PMQs moments.

The outbreak of the Coronavirus in early 2020 resulted in unprecedented changes to health professions education. The pervasive stay-at-home orders resulted in faculty, who were trained for preparing the next generation of health professionals in a traditional learning environment, throwing out their lesson plans and starting anew. New approaches to teaching and learning were created quickly, and without the typical extensive planning, which introduced several challenges. However, lessons learned from these approaches have also resulted in increased technology adoption, innovative assessment strategies, and increased creativity in the learning environment. The

Millions of low-income African Americans in the United States lack access to health care. How do they treat their health care problems? In *Health Care Off the Books*, Danielle T. Raudenbush provides an answer that challenges public perceptions and prior scholarly work. Informed by three and a half years of fieldwork in a public housing development, Raudenbush shows how residents who face obstacles to health care gain access to pharmaceutical drugs, medical equipment, physician reference manuals, and insurance cards by mobilizing social networks that include not only their neighbors but

also local physicians. However, membership in these social networks is not universal, and some residents are forced to turn to a robust street market to obtain medicine. For others, health problems simply go untreated. Raudenbush reconceptualizes U.S. health care as a formal-informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems. While the practices described in the book may at times be beneficial to people's health, they also have the potential to do serious harm. By understanding this hybrid system, we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes.

This report states that the values of the NHS will only be reflected in practice if NHS and social care services are 're-imagined'. The care provided by the health and social care system will break down if quicker progress is not made to develop more integrated health and social care services which focus on meeting the needs of individual patients. It is unlikely that public expenditure on health and social care services will increase significantly in the foreseeable future. This means that the only way to sustain or improve present service levels in the NHS will be to focus on a transformation of care through genuine and sustained service integration. There must be a much more joined up approach to commissioning health and care services. On other issues the Health Committee also concludes: measures currently being used to respond to the Nicholson Challenge too often represent short-term fixes rather than the sustainable long-term

Shadow of Liberation explores the intricate twists, turns, contestations and compromises of ANC economic and social policymaking with a focus on the transition era of the 1990's and the early years of democracy With the damning revelations by the Zondo Commission of Inquiry into State Capture on the massive corruption of the South African body politic, the timing of this book could not be more relevant. South Africans need to confront the economic and social policy choices that the liberation movement made and to see how these decisions may have facilitated the conditions for corruption to emerge and flourish. Answers are needed. Padayachee and van Niekerk focus their attention on the primary question of how and why the ANC, given its historical anti-inequality, re-distributive stance, come in the 1990s, to such a dramatic turn around and move towards an essentially market-dominated approach. Were they pushed or did they go willingly? What role if any did Western governments and international financial institutions play? And what of the role of the late apartheid state and South African business? Did leaders and comrades 'sell out' the ANC's

emancipatory policy vision? *Shadow of Liberation* tries to provide answers to these questions drawing on the best available primary archival evidence as well as extensive interviews with key protagonists across the political, non-government and business spectrum. The authors argue that the ANC's emancipatory policy agenda was broadly to establish a social democratic welfare state upholding rights of social citizenship. However its economic policy framework to realise this emancipatory mission was either non-existent or egregiously misguided.

Why do recordings of speakers engaging in reported speech at British Prime Minister's Questions from the 1970s–80s sound so distant to us? This cutting-edge study explores how the practices of quoting have changed at parliamentary question time in light of changing conventions and an evolving media landscape. Comparing data from authentic audio and video recordings from 1978-1988 and 2003-2013, it provides evidence for qualitative and quantitative changes at the micro level (e.g., grammaticalisation processes in the reporting clause) and in more global structures (e.g., rhetorical patterns, and activities). These analytic findings contribute to the theoretical modelling of evidentiality in English, our understanding of constructions, interaction, and change, and of PMQs as an evolving community of practice. One of the first large-scale studies of recent change in an interactional genre of English, this ground-breaking monograph offers a framework for a diachronic interactional sociolinguistic research programme.

Faith in the UK's political system has reached new lows. Politicians and commentators are lining up to offer answers, but what if the problem goes beyond left and right, trust and bureaucracy? What if the system puts too much power in the hands of politicians in London and not enough in the hands of ordinary people? This important book addresses a key issue of our time: where should power and governance lie in our democracy? Simon Parker, a leading expert on public services and government, claims the answer is to give power away. Indeed, across the country, communities and cities are already starting to take matters into their own hands, reinventing citizenship for the 21st century. Including fascinating interviews with former ministers and officials about their experience of managing the central state, as well as illuminating international case studies, Parker offers policy recommendations and practical ideas for giving power away and creating a new kind of politics focused on unleashing society's creative potential. In so doing, he provides a route map for change, showing how decentralisation can make us happier, healthier and more equal.

Barrie Cassidy picked a hell of an election to cover: changes of leaders on both sides of politics, Australia's first female Prime Minister, a hung parliament and a country not knowing who its Prime Minister was for nearly three weeks. But in the beginning were the Party Thieves, Malcolm Turnbull and Kevin Rudd. Turnbull's manic desire to get his own way in the party, and because he simply stopped listening, led to his demise. Rudd stole the party through his authoritarian approach to government and a cabinet that felt alienated from the job of governing. In both cases, the members of their respective parties came at the Party Thieves to reclaim what was rightfully theirs, and set the stage for the ascension of Tony Abbott and Julia Gillard. And all that before we even get to the 2010 election campaign. The Party Thieves is more than just a campaign diary of the extraordinary 2010 election and its aftermath; it is a rip-roaring, incisive analysis of a tumultuous nine months in politics that even surprised veteran journalists such as Cassidy. This is a must read for anyone interested in Australian politics of any persuasion.

As the party that has won wars, reversed recessions and held prime ministerial power more times than any other, the Conservatives have played an undoubtedly crucial role in the shaping of contemporary British society. And yet, the leaders who have stood at its helm - from Sir Robert Peel to David Cameron, via Benjamin Disraeli, Winston Churchill and Margaret Thatcher - have steered the party vessel with enormously varying degrees of success. With the widening of the franchise, revolutionary changes to social values and the growing ubiquity of the media, the requirements, techniques and goals of Conservative leadership since the party's nineteenth-century factional breakaway have been forced to evolve almost beyond recognition - and not all its leaders have managed to keep up. This comprehensive and enlightening book considers the attributes and achievements of each leader in the context of their respective time and diplomatic landscape, offering a compelling analytical framework by which they may be judged, detailed personal biographies from some of the country's foremost political critics, and exclusive interviews with former leaders themselves. An indispensable contribution to the study of party leadership, *British Conservative Leaders* is the essential guide to understanding British political history and governance through the prism of those who created it.

'It's now becoming easier and easier to predict government policy. Just listen to what the prime minister said in the morning and the opposite is likely to be true come the middle of the afternoon.' Throughout another year of bluster and bedlam in Westminster, John Crace's brilliantly acerbic political sketches have once more provided the nation with a much-needed injection of humour. In *A Farewell to Calm*, Crace introduces an infectiously funny selection of his finest pieces from 2020-21, taking in everything from a summer of unfathomable U-turns to Christmas Covid confusion, and from lockdown-lifting to Brexit blithering. Led by Boris's poundshop Churchill tribute act, and featuring a cast of everyone's least favourite pantomime villains, from Classic Dom Cummings to Door Matt Hancock, the end result is a brilliantly entertaining chronicle of another tumultuous year on these benighted islands.
