Business Driven Information Systems provides the foundation that will enable students to achieve excellence in business, whether they major in operations management, manufacturing, sales, marketing, finance, human resources, accounting, or virtually any other business discipline.

In today's technological age, computer literacy is important for everyone, and now learning the basics is easier than ever. This title engages students by combining a unique teaching approach with rich companion media.

Charles Hill's Global Business Today, 3e (GBT) has become an established text in the International Business market for its excellent, but concise coverage of the key global issues including the cultural context for global business, cross-border trade and investment, the global monetary system and competition in the global environment. GBT's concise chapters give a general introduction to international business - emphasizing the environmental factors, with less coverage of operations. Charles Hill is renowned for his attention to research trends and that is evident in Global Business Today, 3e through a variety of real world examples and cases from small, medium, and large companies throughout the world.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This book covers introductory Microsoft Word, Excel, Access, and PowerPoint, with an additional Windows 10 chapter. Beyond point-and-click The goal of the Exploring series is to move students beyond the point-and-click, to understanding the why and how behind each skill. And because so much learning takes place outside of the classroom, this series provides learning tools that students can access anywhere, anytime. Students go to college now with a different set of skills than they did years ago. With this in mind, the Exploring series seeks to move students beyond the basics of the software at a faster pace, without sacrificing coverage of the fundamental skills that everyone needs to know. Also available with MyITLab MyITLab® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, which engages students and improves results. HTML5 Simulation exercises and Live-in-Application Grader projects come with the convenience of auto-grading and instant feedback, helping students learn more quickly and effectively. Digital badges lets students showcase their Microsoft Office or Computer Concepts competencies, keeping them motivated and focused on their future careers. MyITLab builds the critical skills needed for college and career success. Note: You are purchasing a standalone product;

For use in the Office Applications course or individuals who would like to master Microsoft Office 2013 Make Microsoft Office, Your Office ¿ The Your Office series teaches readers the way Microsoft Office works in the real world, not just in a classroom. ¿ With Your Office, readers will learn to use Office to make decisions and solve problems in a business context. Your Office bridges the gap between skill and application, and empowers students to master Office 2013 as a tool to solve problems and make decisions. Modular Structure Promotes Concept Retention: Provides a strong foundation for readers to practice in each workshop and then synthesize the objectives covered over two workshops—effectively challenging students to really retain what they learned as opposed to learning, and then forgetting soon after. Case Progression Promotes Concept Mastery: Readers progress from learning the skills in each Office Application to using the applications as tools to make business decisions. Realistic Series Scenario Provides Business Context: Readers gain a solid understanding of how an organization works as they see how individuals in all facets of a business interact with tools like Microsoft Office and use information to make decisions. Engaging Features Help Students Make Microsoft Office Their Own: Videos, Visual Summaries, and Real-World Advice boxes are among the features that help readers master Office to make decisions and solve problems in a business context.

This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world.
