This report was designed to give utility managers the guidance to help them develop an appropriate pipe cleaning program. The report presents criteria, flow charts, and tables to assist in selecting pipes to be cleaned and the most appropriate cleaning methods to employ. Equipment and labor costs, disposal of water sediment, customer service and other influences are also discussed. Case studies from the 100 utilities surveyed help to demonstrate results.

Sustainability is the integrating theme of this current and thought-provoking book. LIVING IN THE ENVIRONMENT provides the basic scientific tools for understanding and thinking critically about the environment. Co-authors G. Tyler Miller and Scott Spoolman inspire students to take a positive approach toward finding and implementing useful environmental solutions in their own lives and in their careers. Updated with the most up-to-date information, art, and Good News examples, the text engages and motivates students with vivid case studies and hands-on quantitative exercises. The concept-centered approach transforms complex environmental topics and issues into key concepts that students will understand and remember. Overall, by framing the concepts with goals for more sustainable lifestyles and human communities, students see how promising the future can be.
