winner Peter Brown Can a robot survive in the wilderness? When robot Roz opens her eyes for the first time, she discovers that she is all alone on a remote, wild island. She has no idea how she got there or what her purpose is--but she knows she needs to survive. After battling a violent storm and escaping a vicious bear attack, she realizes that her only hope for survival is to adapt to her surroundings and learn from the island's unwelcoming animal inhabitants. As Roz slowly befriends the animals, the island starts to feel like home--until, one day, the robot's mysterious past comes back to haunt her. From bestselling and award-winning author and illustrator Peter Brown comes a heartwarming and action-packed novel about what happens when nature and technology collide.

In 1773, Phillis Wheatley published a book of poetry. It was a great accomplishment that made her very famous. Only a year before, Phillis had had to take a test to prove that she was the actual author of these poems, because Phillis Wheatley was a slave. Who would believe that an African girl could be the author of such poetry? Phillis did! She believed in herself, and took every opportunity she could to make her life better. She believed in the power of her words, and her writing to prove her talent, and used the power of words to change a life.

The Evidence-Based Inquiry Using Primary Sources series for grades 1 to 6 will engage students in a world of inquiry and discovery. Inquiry-based learning is active learning that elicits a higher level of reading comprehension. The pages of these books contain exciting and fascinating real-world photographs, advertising, recipe cards, theater programs, posters, letters, and maps, as well as other interesting items that document history. Each book highlights 15 primary sources across four pages each. The first three pages of each set present the same primary source with text that is differentiated for three reading levels. The last page of each set offers questions and prompts to encourage higher-level thinking and inquiry.

In this book, the authors explain why telling students things over and over--and perhaps more slowly and more loudly--does not result in understanding. Instead, discover how to use a combination of questions, prompts, cues, direct explanations, and modeling to guide students' learning and build their

understanding. Explore an approach to instruction that ensures you make the four strategic moves that help students become more capable and independent learners: (1) using robust and productive questions to check for understanding; (2) giving students prompts that focus them on the thought process they need to complete a learning task; (3) providing students with cues that focus them on specific information, errors, or partial understandings; and (4) explaining and modeling when students do not have sufficient knowledge to complete tasks. Chapters include: (1) Scaffolds for Learning: The Key to Guided Instruction; (2) Questioning to Check for Understanding; (3) Prompting for Cognitive and Metacognitive Processes; (4) Cueing Students' Attention for Learning; (5) Direct Explanation, Modeling, and Motivation; and (6) Answers to Questions on Considerations and Logistics. The book also includes: An Introduction; References; Related ascd Resources: Guided Instruction; and a Study Guide for Guided Instruction: How to Develop Confident and Successful Learners.
