All Day Long Joanna Biggs,2015-04-09 Nearly all of us have to work, but how much do we really know about what other people do all day? What is it like to be a fishmonger, a sex worker or an Orthodox rabbi? Or a banker, a research scientist or a carer? How do our jobs affect our lives, beliefs and happiness? And what happens when we don't work? Joanna Biggs has travelled the country to find the answers, talking to interns and bosses, professionals and entrepreneurs, thinkers and doers. She takes us from Westminster to the Outer Hebrides, from a hospital in Wales to the industrial Midlands, introducing us to different worlds of work and the people who inhabit them. Rich with the voices of the wealthy and poor, native and immigrant, women and men of the UK in the twenty-first century, All Day Long shows us who we are through what we do.

The Rifle Andrew Biggio,2021-06-01 It all started because of a rifle. The Rifle is an inspirational story and hero's journey of a 28-year-old U.S. Marine, Andrew Biggio, who returned home from combat in Afghanistan and Iraq, full of questions about the price of war. He found answers from those who survived the costliest war of all -- WWII veterans. It began when Biggio bought a 1945 M1 Garand Rifle, the most common rifle used in WWII, to honor his great uncle, a U.S. Army soldier who died on the hills of the Italian countryside. When Biggio showed the gun to his neighbor, WWII veteran Corporal Joseph Drago, it unlocked memories Drago had kept unspoken for 50 years. On the spur of the moment, Biggio asked Drago to sign the rifle. Thus began this Marine's mission to find as many WWII veterans as he could, get their signatures on the rifle, and

document their stories. For two years, Biggio traveled across the country to interview America's last-living WWII veterans. Each time he put the M1 Garand Rifle in their hands, their eyes lit up with memories triggered by holding the weapon that had been with them every step of the war. With each visit and every story told to Biggio, the veterans signed their names to the rifle. 96 signatures now cover that rifle, each a reminder of the price of war and the courage of our soldiers.

Another Little Piece of My Heart Richard Goldstein, 2015-04-09 In 1961, Richard Goldstein saw Bob Dylan perform for the first time at Carnegie Hall. Rock music was in its infancy, and revolution was in the air. Criticism of the genre didn't yet exist but, as it began to change music and politics for ever, the serious discussion of rock became a thriving institution. Aged just twenty-two in 1966, and the first rock critic in New York, Goldstein became a pivotal figure in the industry. Forging close relationships with huge names - Jim Morrison, Brian Wilson and Janis Joplin to name just three - his life became a whirlwind of politics, sex and rock and roll. Another Little Piece of My Heart is an unparalleled document of rock and revolution.

The Kruger Experience Johan T. du Toit, Kevin H. Rogers, Harry C. Biggs, 2003-10-01 Kruger National Park in South Africa has one of the most extensive sets of records of any protected area in the world, and throughout its history has supported connections between science and management. In recognition of that long-standing tradition comes The Kruger Experience, the first book to synthesize/summarize a century of ecological research and management in two million hectares of African savanna. The Kruger Experience places the scientific and management experience in Kruger within the framework of modern ecological theory and its practical applications. The book uses a cross-cutting theme of ecological heterogeneity -- the idea that ecological systems function across a full hierarchy of physical and biological components, processes, and scales, in a dynamic space-time mosaic. Contributors, who include many esteemed ecologists who have worked in Kruger in recent years, examine a range of topics covering broad taxonomic groupings and ecological processes. The book's four sections explore: the historical context of research and management in Kruger, the theme of heterogeneity, and the current philosophy in Kruger for linking science with management the template of natural components and processes, as influenced by management, that determine the present state of the Kruger ecosystem how species interact within the ecosystem to generate further heterogeneity across space and time humans as key components of savanna ecosystems In addition to the

editors, contributors include William J. Bond, Jane Lubchenco, David Mabunda, Michael G.L. (Gus) Mills, Robert J. Naiman, Norman Owen-Smith, Steward T.A. Pickett, Stuart L. Pimm, and Rober J. Scholes. The book is an invaluable new resource for scientists and managers involved with large, conserved ecosystems as well as for conservation practitioners and others with interests in adaptive management, the societal context of conservation, links between research and management in parks, and parks/academic partnerships.

Girls on the Verge Sharon Biggs Waller,2019-04-09 Absolutely essential, as is the underlying message that girls take care of each other when no one else will. —Booklist, Starred Review A 2020 YALSA Best Fiction for Young Adults Selection *Girls on the Verge* is an incredibly timely novel about a woman's right to choose. Sharon Biggs Waller brings to life a narrative that has to continue to fight for its right to be told, and honored. Camille couldn't be having a better summer—she kills it as Ophelia in her community theater's production of *Hamlet*, catches the eye of the cutest boy in the play, and nabs a spot in a prestigious theater program. But on the very night she learns she got into the program, she also finds out she's pregnant. She definitely can't tell her parents. And her best friend Bea doesn't agree with the decision Camille has made. Camille is forced to try to solve her problem alone...and the system is very much working against her. At her most vulnerable, Camille reaches out to Annabelle Ponsonby, a girl she only barely knows from the theater. Happily, Annabelle agrees to drive her wherever she needs to go. And in a last minute change of heart, Bea decides to come with. Over the course of more than a thousand miles, friendships will be tested and dreams will be challenged. But ultimately, the girls will realize that friends are the real heroes in every story. [C]ompelling... This title offers realistic viewpoints on teenage pregnancy, along with what it is like to have the right to choose, wanting that right, and living knowing that you will be judged for having exercised it. —School Library Journal, Starred Review

Restoring Natural Capital James Aronson, Suzanne J. Milton, James N. Blignaut, 2012-09-26 How can environmental degradation be stopped? How can it be reversed? And how can the damage already done be repaired? The authors of this volume argue that a two-pronged approach is needed: reducing demand for ecosystem goods and services and better management of them, coupled with an increase in supply through environmental restoration. Restoring Natural Capital brings together economists and ecologists, theoreticians, practitioners, policy makers, and scientists from the developed and developing worlds to consider the costs and benefits of repairing ecosystem goods and services in natural and socioecological

systems. It examines the business and practice of restoring natural capital, and seeks to establish common ground between economists and ecologists with respect to the restoration of degraded ecosystems and landscapes and the still broader task of restoring natural capital. The book focuses on developing strategies that can achieve the best outcomes in the shortest amount of time as it:

- considers conceptual and theoretical issues from both an economic and ecological perspective
- examines specific strategies to foster the restoration of natural capital and offers a synthesis and a vision of the way forward

Nineteen case studies from around the world illustrate challenges and achievements in setting targets, refining approaches to finding and implementing restoration projects, and using restoration of natural capital as an economic opportunity. Throughout, contributors make the case that the restoration of natural capital requires close collaboration among scientists from across disciplines as well as local people, and when successfully executed represents a practical, realistic, and essential tool for achieving lasting sustainable development.

Learning Mathematics Anthony Orton, 2004-12-30 • Why do some students achieve more than others? • Do we have to wait until pupils are ready? • Can children discover math for themselves? • Does language interfere with the learning of math? This classic text, written from the viewpoint of the math teacher, provides answers to these and many more questions. Each chapter explores a particular issue that illustrates the interaction between theory and practice. New chapters have been included on cognition, pattern, and ICT.

Computational Learning Theory Martin Anthony, Norman Biggs, 1992 Computational learning theory is a subject which has been advancing rapidly in the last few years. The authors concentrate on the probably approximately correct model of learning, and gradually develop the ideas of efficiency considerations. Finally, applications of the theory to artificial neural networks are considered. Many exercises are included throughout, and the list of references is extensive. This volume is relatively self contained as the necessary background material from logic, probability and complexity theory is included. It will therefore form an introduction to the theory of computational learning, suitable for a broad spectrum of graduate students from theoretical computer science and mathematics.

After a review of the fundamentals of sets, numbers, and functions, it covers limits and continuity, the calculus of functions of one variable, linear algebra, multivariate calculus, and dynamics.
