This edited volume brings together fourteen original contributions to the on-going debate about what is possible in contact-induced language change. The authors present a number of new vistas on language contact which represent new developments in the field. In the first part of the volume, the focus is on methodology and theory. Thomas Stolz defines the study of Romancisation processes as a very promising laboratory for language-contact oriented research and theoretical work based thereon. The reader is informed about the large scale projects on loanword typology in the contribution by Martin Haspelmath and on contact-induced grammatical change conducted by Jeanette Sakel and Yaron Matras. Christel Stolz reviews processes of gender-assignment to loan nouns in German and German-based varieties. The typology of loan verbs is the topic of the contribution by Søren Wichmann and Jan Wohlgemuth. In the articles by Wolfgang Wildgen and Klaus Zimmermann, two radically new approaches to the theory of language contact are put forward: a dynamic model and a constructivism-based theory, respectively. The second part of the volume is dedicated to more empirically oriented studies which look into language-contact constellations with a Romance donor language and a non-European recipient language. Spanish-Amerindian (Guaraní, Otomí, Quichua) contacts are investigated in the comparative study by Dik Bakker, Jorge Gómez-Rendón and Ewald Hekking. Peter Bakker and Robert A. Papen discuss the influence exerted by French on the indigenous languages of Canada. The extent of the Portuguese impact on the Amazonian language Kulina is studied by Stefan Dienst. John Holm looks at the validity of the hypothesis that bound morphology normally falls victim to Creolization processes and draws his evidence mainly from

Portuguese-based Creoles. For Austronesia, borrowings and calques from French still are an understudied phenomenon. Claire Moyse-Faurie's contribution to this topic is thus a pioneer's work. Similarly, Françoise Rose and Odile Renault-Lescure provide us with fresh data on language contact in French Guiana. The final article of this collection by Mauro Tosco demonstrates that the Italianization of languages of the former Italian colonies in East Africa is only weak. This volume provides the reader with new insights on all levels of language-contact related studies. The volume addresses especially a readership that has a strong interest in language contact in general and its repercussions on the phonology, grammar and lexicon of the recipient languages. Experts of Romance language contact, and specialists of Amerindian languages, Afro-Asiatic languages, Austronesian languages and Pidgins and Creoles will find the volume highly valuable. 'The mentally ill suffer unnameable persecutions, no one knows why. They assume the role of the saint in today's society, since it is presumed that they, rarefied by their own madness, do not suffer like everyone else.' -- Alda Merini. 'In these pages, everything that is touched, even the most painful theme, is transformed into poetry. Every word is a key that finds organ pipes ready to amplify and sublimate the desperation. It's like finding one's self in front of a phenomenon of unconscious lyric power.' -- Ambrogio Borsani, from the Afterword.

In the 1290s a new guild-based Florentine government placed a group of noble families under severe legal restraints, on the grounds that they were both the most powerful and the most violent and disruptive element in the city. In this colorful portrayal of civic life in medieval Florence, Carol Lansing explores the patrilineal structure and function of these urban families, known as "magnates." She shows how they emerged as a class defined not by specific economic interests but by a distinctive culture. During the earlier period of weaker civic institutions, these families built their power by sharing among themselves crucial resources--forts, political alliances, ecclesiastical rights. Lansing examines this activity as well as the responses patrilineal strategies drew from women, who were excluded from inheritance and full lineage membership. In looking at the elements of this culture, which emphasized private military force, knighthood, and faction, Lansing argues that the magnates' tendency toward violence derived from a patrician youth culture and from the instability inherent in the exaggerated use of patrilineal ties. In describing the political changes of the 1290s, she shows how some families eventually dropped the most stringent aspects of

patrilineage and exerted their influence through institutions and patronage networks. Originally published in 1991. The Republic of St. Peter seeks to reclaim for central Italy an important part of its own history. Noble's thesis is at once original and controversial: that the Republic, an

independent political entity, was in existence by the 730s and was not a creation of the Franks in the 750s. Noble examines the political, economic, and religious problems that impelled the central Italians—and a succession of resolute popes—to seek emancipation from the Byzantine Empire. He delineates the social structures and historical traditions that produced a distinctive political society, describes the complete governmental apparatus of the Republic, and provides a comprehensive assessment of the Franco-papal alliance.

Music is rooted in the heart of Western culture. The absence of music from the usual publications of medieval history and history of art of the Middle Ages is understandable, considering the rarity of sources. And yet, throughout the last decades, an intense activity of historico-musicological research has been carried out internationally by a select group of specialized scholars. The ambitious goal of this work is to set medieval music within its historical and cultural context and to provide readers interested in different disciplines with an overall picture of music in the Middle Ages; multi-faceted, enjoyable, yet scientifically rigorous. To achieve this goal, the most prominent scholars of medieval musicology were invited to participate, along with archaeologists, experts of acoustics and architecture, historians and philosophers of medieval thought. The volume offers exceptional iconography and several maps, to accompany the reader in a fascinating journey through a network of places, cultural influences, rituals and themes.
