This 1928 highly illustrated two-volume work on garden design is regarded as among the most important surveys of its kind.

"Devil in Ohio kept me up until 3 a.m. with the lights on—in a good way. It's a haunting thriller for readers who like fear, humor, and heart in one package."—Meredith Goldstein, advice columnist and feature reporter for The Boston Globe, author of upcoming YA novel *Chemistry Lessons*. "Gripping, urgent and addictive, *Devil in Ohio* balances the dark exploration of cults with a compelling and often humorous take on teen social dynamics. This is the debut you won't want to miss."—Aditi Khorana, author of critically acclaimed *The Library of Fates* and *Mirror in the Sky* When fifteen-year-old Jules Mathis comes home from school to find a strange girl sitting in her kitchen, her psychiatrist mother reveals that Mae is one of her patients at the hospital and will be staying with their family for a few days. But soon Mae is wearing Jules's clothes, sleeping in her bedroom, edging her out of her position on the school paper, and flirting with Jules's crush. And Mae has no intention of leaving. Then things get weird. Jules walks in on a half-dressed Mae, startled to see: a pentagram carved into Mae's back. Jules pieces together clues and discovers that Mae is a survivor of the strange cult that's embedded in a nearby town. And the cult will stop at nothing to get Mae back. and sensors, as well as exploring some of their environmental applications. It explains how they can be used for mapping, monitoring, and modeling a wide variety of different environmental aspects, and at the same time addresses some of the current constraints placed on realizing the potential use of the technology such as s flight duration and distance, safety, and the invasion of privacy etc. Features of the book: Provides necessary theoretical foundations for pertinent subject matter areas Introduces the role and value of UAVs for geographical data acquisition, and the ways to acquire and process the data Provides a synthesis of ongoing research and a focus on the use of technology for small-scale image and spatial data acquisition in an environmental context Written by experts of the technology who bring together UAS tools and resources for the environmental specialist Unmanned Aerial Remote Sensing: UAS for Environmental Applications is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications, such as conservation, research, and planning. Students and academics in information science, environment and natural resources, geosciences, and geography, will likewise find this comprehensive book a useful and informative resource.

In the past 20 years, a wave of right-wing populist movements has swept over Europe, changing the face of European politics. The Netherlands has been one of the more iconic countries to partake in this shift. Known internationally as an emblem of progressivism and tolerance, the country soon became a frontrunner in the revival of nationalist and anti-

immigrant sentiment. This is the first study to offer an extensive engagement with the ideas behind the Dutch swing to the right. The emergence of Dutch populism, this book shows, formed an integral part of a broader conservative tendency, identified as the Dutch New Right. In the US and the UK, the term New Right has been used to describe conservative backlash movements that arose in opposition to the progressive movements of the 1960s. The Dutch swing to the right, this book argues, formed a belated iteration of the New Right backlash that occurred overseas. This text will be essential reading for students and scholars in the fields of European Studies and Political Science, and Dutch politics and society more specifically.

In 1624 the Dutch West India Company established the colony of Brazil. Only thirty years later, the Dutch Republic handed over the colony to Portugal, never to return to the South Atlantic. Because Dutch Brazil was the first sustained Protestant colony in Iberian America, the events there became major news in early modern Europe and shaped a lively print culture. In Amsterdam's Atlantic, historian Michiel van Groesen shows how the rise and tumultuous fall of Dutch Brazil marked the emergence of a "public Atlantic" centered around Holland's capital city. Amsterdam served as Europe's main hub for news from the Atlantic world, and breaking reports out of Brazil generated great excitement in the city, which reverberated throughout the continent. Initially, the flow of information was successfully managed by the directors of the West India Company. However, when Portuguese sugar planters revolted against the Dutch regime, and tales of corruption among leading administrators in Brazil emerged, they lost their hold on the media landscape, and reports traveled more freely. Fueled by the powerful local print media, popular discussions about Brazil became so bitter that the Amsterdam authorities ultimately withdrew their support for the colony. The self-inflicted demise of Dutch Brazil has

been regarded as an anomaly during an otherwise remarkably liberal period in Dutch history, and consequently generations of historians have neglected its significance. Amsterdam's Atlantic puts Dutch Brazil back on the front pages and argues that the way the Amsterdam media constructed Atlantic events was a key element in the transformation of public opinion in Europe.

Early Modern Media and the News in Europe includes fifteen chapters, all written by Joop W. Koopmans, which are focused on the early news industry in relation to politics and society, particularly from the Dutch perspective.

Why do early films present the Netherlands as a country full of canals and windmills, where people wear traditional costumes and wooden shoes, while industries and modern urban life are all but absent? Images of Dutchness investigates the roots of this visual repertoire from diverse sources, ranging from magazines to tourist brochures, from anthropological treatises to advertising trade cards, stereoscopic photographs, picture postcards, magic lantern slide sets and films of early cinema. This richly illustrated book provides an in-depth study of the fascinating corpus of popular visual media and their written comments that are studied for the first time. Through the combined analysis of words and images, the author identifies not only what has been considered "typically Dutch" in the long nineteenth century, but also provides new insights into the logic and emergence of national clichés in the Western world.

Producing Non-Simultaneity discusses how the processes of modernisation, driven by
globalisation and market forces, change the political, economic and technological conditions
under which architecture is realised. The book looks beyond the rhetoric of revolutionary
innovation, often put forward by architects and engineers. It shows how technological change
during the last 200 years was only possible because traditional skills and older materials
persisted. The volume argues that building sites have long been showcases of non-
simultaneities. Shedding light on construction of the past and exploring what may impact
construction in the future, this book would be a valuable addition for students, researchers and
academics in architecture, architectural history and theory.

Technology has always played an important role in the performance of police tasks. In recent years, that role has not only expanded, but has also been renewed. On one hand, technology plays a role in supporting policing (closed-circuit television, scanning equipment, technical methods of detection, etc.). On the other hand, new technology offers opportunities to commit crime, particularly in the sphere of information technology which requires constant adjustments of the police in their investigation methods. The use of technology raises many interesting questions. There are important privacy issues. There are also consequences of investing in technology. Additionally, are police investigations keeping sufficiently up-to-date with technological developments, including advances in computer technology as well as strong developments in the sphere of natural science? This book - originally a volume of the Journal of Police Studies - examines the concerns and necessity for technology in poli

The Danish Bestseller Now Available in English Dr Pia Callesen presents the first practical book on metacognitive therapy, a groundbreaking new treatment proven to stop depression in its tracks. Many of us struggle with overthinking. We endlessly analyse what we've said and done or the decisions we have to make. Rarely does this treat the stresses of our lives. Often we become overwhelmed; we end up feeling powerless, spiralling into sadness and even depression. Live More Think Less presents a radical strategy to take back control of our thinking processes. From training our attention to leaving our negative trigger-thoughts on the conveyor belt, the book guides us towards living better through mastering the attention we pay to our thoughts and how we act upon them. Depression and sadness are something we all

The new novel by the internationally acclaimed author- "a farce of nuclear proportions"(Vanity Fair) Arnon Grunberg is one of the most subtly outrageous provocateurs in world literature. The Jewish Messiah, which chronicles the evolution of one Xavier Radek from malcontent grandson of a former SS officer, to Jewish convert, to co- translator of Hitler's Mein Kampf into Yiddish, to Israeli politician and Israel's most unlikely prime minister, is his most outrageous work yet. Taking on the most well-guarded pieties and taboos of our age, The Jewish Messiah is both a great love story and a grotesque farce that forces a profound reckoning with the limits of human guilt, cruelty, and suffering. It is without question Arnon Grunberg's masterpiece.

Printed Maps of Scandinavia and the Arctic, 1482-1601, the first scholarly cartobibliography of the far north, presents a thorough and systematic survey of the subject. Each woodblock and copperplate map of the region is described in an illustrated entry that discusses the cartographer, publishing history, and cartography of the map. To the extent practicable, all states, variants, and editions of the maps have been identified and differentiated. The inclusion of contemporary related maps and later derivations in the essays contributes to the context and completeness of the entries.

There are thousands of plant species in the world, and each one has leaves that look different from other kinds of plants. No matter what leaves look like, they're one of a plant's most important parts. This text covers key life science concepts such as photosynthesis. Readers will see different shapes and sizes of leaves through highly detailed color photographs, which complement the text. By the end of the book, readers will see that there's more to leaves than meets the eye!

Practical Language Testing equips you with the skills, knowledge and principles necessary to understand and construct language tests. This intensely practical book gives guidelines on the design of assessments within the classroom, and provides the necessary tools to analyse and improve assessments, as well as deal with alignment to externally imposed standards. Testing is situated both within the classroom and within the larger social context, and readers are provided the knowledge necessary to make realistic and fair decisions about the use and implementation of tests. The book explains the normative role of large scale testing and provides alternatives that the reader can adapt to their own context. This fulfils the dual purpose of providing the reader with the knowledge they need to prepare learners for tests, and the practical skills for using assessment for learning. Practical Language Testing is the ideal introduction for students of applied linguistics, TESOL and modern foreign language teaching as

well as practicing teachers required to design or implement language testing programmes. The book is supported by frequently updated online resources at <http://languagetesting.info/> including sets of scenarios providing resources to study aviation English assessment, call centre assessment, military language assessment, and medical language assessment. The materials can be used to structure debates and seminars, with pre-reading and video activities. Practical Language Testing was commended as a 2012 runner-up of the prestigious SAGE/ILTA Award for Best Book on Language Testing.

Architectonic Space is the most complete and coherent treatise on the nature, purpose and meaning of architecture that has so far been attempted. It is the product of its author's lifetime pursuit of an idea that has haunted him from childhood: a search for the archetypal basis of the act of building. Seeing architecture not merely as the expression, but as the precondition of human culture, Hans van der Laan believes that its principles must be sought within architecture itself, rather than in technological, social or ideological factors. His buildings and writings stand out like tablets of stone amid the prevailing uncertainty and opportunism. The style and method of his book its rational building up of an argument founded on simple everyday experience remind one forcibly of the early Greek thinkers, just as Van der Laan's architecture recalls the

Since the early days of film, critics and theorists have contested the value of formula, cliché, conventional imagery, and recurring narrative patterns of reduced complexity in cinema. Whether it's the high-noon showdown or the last-minute rescue, a lonely woman standing in the window or two lovers saying goodbye in the rain, many films rely on scenes of stereotype, and audiences have come to expect them. Outlining a comprehensive theory of film stereotype, a device as functionally important as it is problematic to a film's narrative, Jörg Schweinitz constructs a fascinating though overlooked critical history from the 1920s to today. Drawing on theories of stereotype in linguistics, literary analysis, art history, and psychology, Schweinitz identifies the major facets of film stereotype and articulates the positions of theorists in response to the challenges posed by stereotype. He reviews the writing of Susan Sontag, Roland Barthes, Theodor W. Adorno, Rudolf Arnheim, Robert Musil, Béla Balázs, Hugo Münsterberg, and Edgar Morin, and he revives the work of less-prominent writers, such as René Fülöp-Miller and Gilbert Cohen-Séat, tracing the evolution of the discourse into a postmodern celebration of the device. Through detailed readings of specific films, Schweinitz also maps the development of models for adapting and reflecting stereotype, from early irony (Alexander Granowski) and conscious rejection

(Robert Rossellini) to critical deconstruction (Robert Altman in the 1970s) and celebratory transfiguration (Sergio Leone and the Coen brothers). Altogether a provocative spectacle, Schweinitz's history reveals the role of film stereotype in shaping processes of communication and recognition, as well as its function in growing media competence in audiences beyond cinema.
