English as a Medium of Instruction in Higher Education Wenli Tsou, Shin-Mei Kao, 2017-06-13 This book presents the multiple facets of English as a Medium of Instruction (EMI) in higher education across various academic disciplines, an area that is expected to grow constantly in response to the competitive global higher education market. The studies presented were conducted in various EMI classrooms, with data collected from observing and documenting the teaching activities, and from interviewing or surveying EMI participants. Through data analysis and synthesis, cases across disciplines - from engineering, science, technology, business, social science, medical science, design and arts, to tourism and leisure service sectors - are used to illustrate the various EMI curriculum designs and classroom practices. Although the cases described are limited to Taiwanese institutions, the book bridges the gap between planning and executing EMI programs across academic domains for policy makers, administrators, content teachers, and teacher trainers throughout Asia.

Organisation Theory Stephen P. Robbins, Neil Barnwell, 2002 Organisation Theory, 4e applies organisational theory in an Australian context. The material has been selected and interpreted to assist students in understanding organisations and their management. It is suitable for undergraduate and early stage postgraduate students.

A Framework for Task-based Learning Jane Willis, 2021-10-07 A complete guide to the methodology and practice of task-based language teaching. For those who wish to adopt a genuinely learner-centred approach to their teaching. Probably the definitive guide to task-based language teaching.

Talent Management Innovations in the International Hospitality Industry Stefan Jooss, Ralf Burbach, Huub Ruël, 2021-07-27 Talent Management Innovations in the International Hospitality Industry explores a wide range of subjects within the talent management field, including employer branding, creative talent, talent pools, and mentoring initiatives, along with a focus on talent identification, development, and retention.

Determinants of Innovative Behaviour Cees van Beers, Roland Ortt, Robert Verburg, 2008-09-10 A rich overview of current research on determinants of innovative behaviour. It is a unique work as it illuminates these from different perspectives such as, economics, management and psychology. Using several methods of analysis, it shows what specific determinants are predominant in explaining firm performance on innovation.

Multilingualism and Education Gail Prasad, Nathalie Auger, Emmanuelle Le Pichon Vorstman, 2022-06-09 For decades,

international researchers and educators have sought to understand how to address cultural and linguistic diversity in education. This book offers the keys to doing so: it brings together short biographies of thirty-six scholars, representing a wide range of universities and countries, to allow them to reflect on their own personal life paths, and how their individual life experiences have led to and informed their research. This approach highlights how theories and concepts have evolved in different contexts, while opening up pedagogical possibilities from diverse backgrounds and enriched by the life experiences of leading researchers in the field. Beyond these questions, the book also explores the dynamic relationships between languages, power and identities, as well as how these relationships raise broader societal issues that permeate both global and local language practices. It is essential reading for students, teacher educators, and researchers interested in the impact of multilingualism on education.

Marketing Communications PR Smith, Ze Zook, 2019-12-03 The authors have the uncommon knack of taking the complex and explaining it in a clear, compelling way. I recommend it if you want to learn the principles of strategic communications and get structured suggestions to create better campaigns. Dave Chaffey, Co-founder and Content Director, Smart Insights This book has the strongest focus of online and offline integration of any marketing communications textbook. A blended approach to marketing is in its DNA. Compared to the competition that too often uses a bolts-on approach to integration, this book is essential for giving students the precise skills employers will look for - to be able to implement genuinely integrated marketing campaigns. This new, seventh edition combines professional and academic expertise to ground big picture theory into real-world case studies, drawing from cutting-edge global companies like Snapchat and Spotify, that will teach students the why behind the how. With increased focus on social media and the latest digital technologies, this new edition will teach students: - How AI, the Internet of Things, Big Data, AR/VR and marketing automation can be used successfully in campaigns - The opportunity and risks of social media - How to navigate ethical and data management challenges - How to use the current preferred digital marketing tools and technology Covering the key themes of customer engagement, experience and journey, this book will allow students to become truly confident working in an environment of ongoing technological transformation.

Exploratory Factor Analysis Leandre R. Fabrigar, Duane T. Wegener, 2012-01-12 This book provides a non-mathematical introduction to the theory and application of Exploratory Factor Analysis. Among the issues discussed are the use of confirmatory versus exploratory factor analysis, the use of principal components analysis versus common factor analysis, and procedures for determining the appropriate number of factors.

Learning Statistics with R Daniel Navarro, 2013-01-13 Learning Statistics with R covers the contents of an introductory statistics class, as typically taught to undergraduate psychology students, focusing on the use of the R statistical software and adopting a light, conversational style throughout. The book discusses how to get started in R, and gives an introduction

to data manipulation and writing scripts. From a statistical perspective, the book discusses descriptive statistics and graphing first, followed by chapters on probability theory, sampling and estimation, and null hypothesis testing. After introducing the theory, the book covers the analysis of contingency tables, t-tests, ANOVAs and regression. Bayesian statistics are covered at the end of the book. Longitudinal Models in the Behavioral and Related Sciences Kees van Montfort, Johan Oud, Albert Satorra, 2007

This new volume reviews longitudinal models and analysis procedures for use in the behavioral and social sciences. Written by distinguished experts in the field, the book presents the most current approaches and theories, and the technical problems that may be encountered along the way. Readers will find new ideas about the use of longitudinal analysis in solving problems that arise due to the specific nature of the research design and the data available. Divided into two parts, *Longitudinal Models in the Behavioral and Related Sciences* opens with the latest theoretical developments. In particular, the book addresses situations that arise due to the categorical nature of the data, issues related to state space modeling, and potential problems that may arise from network analysis and/or growth-curve data. The focus of part two is on the application of longitudinal modeling in a variety of disciplines. The book features applications such as heterogeneity on the patterns of a firm's profit, on house prices, and on delinquent behavior: non-linearity in growth in assessing cognitive aging; measurement error issues in longitudinal research; and distance association for the analysis of change. Part two clearly demonstrates the caution that should be taken when applying longitudinal modeling as well as in the interpretation of the results. *Longitudinal Models in the Behavioral and Related Sciences* is ideal for advanced students and researchers in psychology, sociology, education, economics, management, medicine, and neuroscience.

PISA 2009 Results: Students On Line Digital Technologies and Performance (Volume VI) OECD, 2011-06-28 This sixth volume of PISA 2009 results explores students' use of information technologies to learn.

Leaving the Atocha Station Ben Lerner, 2011-08-23 Adam Gordon is a brilliant, if highly unreliable, young American poet on a prestigious fellowship in Madrid, struggling to establish his sense of self and his relationship to art. What is actual when our experiences are mediated by language, technology, medication, and the arts? Is poetry an essential art form, or merely a screen for the reader's projections? Instead of following the dictates of his fellowship, Adam's research becomes a meditation on the possibility of the genuine in the arts and beyond: are his relationships with the people he meets in Spain as fraudulent as he fears his poems are? A witness to the 2004 Madrid train bombings and their aftermath, does he participate in historic events or merely watch them pass him by? In prose that veers between the comic and tragic, the self-contemptuous and the inspired, *Leaving the Atocha Station* is a portrait of the artist as a young man in an age of Google searches, pharmaceuticals, and spectacle. Born in Topeka, Kansas, in 1979, Ben Lerner is the author of three books of poetry *The Lichtenberg Figures*,

Angle of Yaw, and Mean Free Path. He has been a finalist for the National Book Award and the Northern California Book Award, a Fulbright Scholar in Spain, and the recipient of a 2010-2011 Howard Foundation Fellowship. In 2011 he became the first American to win the Preis der Stadt Münster für Internationale Poesie. Leaving the Atocha Station is his first novel.

The Ice-Cream Makers Ernest van der Kwast, 2017-08 Follows the experiences of Giovanni Talamini, a poet who is torn between his family's and his own needs when he returns to Italy to help run the ice-cream dynasty he left behind years earlier.

The Psychology of Advertising Bob M. Fennis, Wolfgang Stroebe, 2015-12-22 Advertising is a ubiquitous and powerful force, seducing us into buying wanted and sometimes unwanted products and services, donating to charitable causes, voting for political candidates, and changing our health-related lifestyles for better or worse. The impact of advertising is often subtle and implicit, but sometimes blatant and impossible to overlook. This revised and fully updated new edition of *The Psychology of Advertising* offers a comprehensive and state-of-the-art overview of the psychological findings on the impact of advertising, and discusses the research in the context of recent developments in the fields of social and consumer psychology. Key questions covered in the volume include: What impact does advertising have on consumer behavior? What causes this impact? What are the psychological processes responsible for the effectiveness of advertising? How do consumers make sense of advertising messages? Which messages get across successfully and when, and why? How do new online and digital technologies affect consumer judgement and choice? Engagingly written, and including a comprehensive glossary of frequently used concepts, *The Psychology of Advertising* is a unique and invaluable resource for advanced undergraduate and graduate students, and for researchers and lecturers in social psychology, marketing, and communications. It is also a valuable guide for professionals working in advertising, public health, public services and political communication.

Values and Educational Leadership Paul T. Begley, 1999-08-12 *Values and Educational Leadership* extends beyond the presentation of expert opinion to blend theory, research, and practice for a comprehensive examination of values in educational leadership. It analyzes personal values manifested by individuals, professional values of administration, and collective values exhibited by groups, societies, and organizations. The book merges the collective wisdom of some of the best known and most respected philosophers, theorists, and researchers currently working in the field, including: Derek J. Allison, Paul T. Begley, Paul V. Bredeson, Elizabeth Campbell, Daniel L. Duke, Frederick S. Ellett Jr., Colin Evers, William Foster, Margaret Grogan, Christopher Hodgkinson, Olof Johansson, Gabriele Lakomski, Kenneth Leithwood, Pauline Leonard, Kevin Roche, James Ryan, Don Shakotko, Francie Smith, Keith Walker, and Donald J. Willower.

The Professional Development of Teacher Educators Tony Bates, Anja Swennen, Ken Jones, 2014-12-18 This book makes a significant contribution to a hitherto much neglected area. The book brings together a wide range of papers on a scale rarely seen with a geographic spread that enhances our understanding of the complex journey undertaken by those who aspire to

become teachers of teachers. The authors, from more than ten countries, use a variety of approaches including narrative/life history, self-study and empirical research to demonstrate the complexity of the transformative search by individuals to establish their professional identity as teacher educators. The book offers fundamental and thoughtful critiques of current policy, practice and examples of established structures specifically supporting the professional development of teacher educators that may well have a wider applicability. Many of the authors are active and leading persons in the international fields of teacher education and of professional development. The book considers: novice teacher educators, issues of transition; identity development including research identity; the facilitation and mentoring of teacher educators; self-study research including collaborative writing, use of stories; professional development within the context of curriculum and structural reform. Becoming a teacher is recognised as a transformative search by individuals for their teaching identities. Becoming a teacher educator often involves a more complex and longer journey but, according to the many travel stories told here, one that can be a deeply satisfying experience. This book was published as a special issue of *Professional Development in Education*.

Reimagining Digital Learning for Sustainable Development Sheila Jagannathan, 2021-06-22 *Reimagining Digital Learning for Sustainable Development* is a comprehensive playbook for education leaders, policy makers, and other key stakeholders leading the modernization of learning and development in their institutions as they build a high value knowledge economy and prepare learners for jobs that don't yet exist. Currently, nearly every aspect of human activity, including the ways we absorb and apply learning, is influenced by disruptive digital technologies. The jobs available today are no longer predictors of future employment, and current and future workforce members will need to augment their competencies through a lifetime of continuous upskilling and reskilling to meet the demands of the Fourth Industrial Revolution. This book features curated insights and real-world cases from thought leaders throughout the world and identifies major shifts in content formats, pedagogic approaches, technology frameworks, user and design experiences, and learner roles and expectations that will reshape our institutions, including those in emerging economies. The agile, lean, and cost-effective strategies proposed here will function in scalable and flexible bandwidth environments, enabling education leaders and practitioners to transform brick-and-mortar learning organizations into digital and blended ecosystems and to achieve the United Nation's ambitious Sustainable Development Goals by 2030. Chapter 18 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Understanding the Social Outcomes of Learning OECD, 2007-07-04 This report is OECD's first attempt to gather and synthesise developments in measuring the social effects of education. It focuses on health and civic and social engagement.

The Fundamentals of Workplace Learning Knud Illeris, 2010-12-14 *Fundamentals of Workplace Learning* is a

comprehensive guide to how people learn in the workplace, and the issues and challenges involved. Examining the essential aspects of workplace learning and unravelling the various influences which affect the success of work-based learners, Knud Illeris presents a holistic model to explain how diverse individuals can be encouraged and invited to learn at work. Approaching workplace learning from the perspective of learners as human beings, with complex social and psychological needs, as opposed to resources to be managed, this book examines in detail the key issues surrounding workplace learning, including: The workplace environment as a learning space Workplace learning as competence development A multitude of different kinds of workplace learning arrangements Job-transcending learning initiatives The interaction between formal and informal learning environments The challenges presented by specific groups: early school leavers, elderly workers and the new young generation. Presenting conclusions on workplace learning and possibilities for the future this book focuses on a way forward while detailing the fundamentals of successful workplace learning. It will appeal to everyone involved in understanding and improving learning in the workplace including educationalists, business students, managers, personnel and educational leaders.

Hot Milk Deborah Levy, 2016-07-12 A New York Times Notable Book of the Year. Shortlisted for the 2016 Man Booker Prize, *Hot Milk* moves gracefully among pathos, danger, and humor” (The New York Times). I have been sleuthing my mother's symptoms for as long as I can remember. If I see myself as an unwilling detective with a desire for justice, is her illness an unsolved crime? If so, who is the villain and who is the victim? Sofia, a young anthropologist, has spent much of her life trying to solve the mystery of her mother's unexplainable illness. She is frustrated with Rose and her constant complaints, but utterly relieved to be called to abandon her own disappointing fledgling adult life. She and her mother travel to the searing, arid coast of southern Spain to see a famous consultant--their very last chance--in the hope that he might cure her unpredictable limb paralysis. But Dr. Gomez has strange methods that seem to have little to do with physical medicine, and as the treatment progresses, Sofia's mother's illness becomes increasingly baffling. Sofia's role as detective--tracking her mother's symptoms in an attempt to find the secret motivation for her pain--deepens as she discovers her own desires in this transient desert community. *Hot Milk* is a profound exploration of the sting of sexuality, of unspoken female rage, of myth and modernity, the lure of hypochondria and big pharma, and, above all, the value of experimenting with life; of being curious, bewildered, and vitally alive to the world.
