Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

Especially helpful for AP Biology students each chapter of the study guide offers a variety of study and review tools. This beloved celebration of individuality is now an original movie on Disney+! A modern-day classic and New York Times bestseller from Newbery Medalist Jerry Spinelli. Stargirl. From the day she arrives at quiet Mica High in a burst of color and sound, the hallways hum with the murmur of "Stargirl, Stargirl." She captures Leo Borlock's heart with just one smile. She sparks a school-spirit revolution with just one cheer. The students of Mica High are enchanted. At first. Then they turn on her. Stargirl is suddenly shunned for everything that makes her different, and Leo, panicked and desperate with love, urges her to become the very thing that can destroy her: normal. In this celebration of nonconformity, Newbery Medalist Jerry Spinelli weaves a tense, emotional tale about the perils of popularity and the thrill and inspiration of first love. "Spinelli has produced a poetic allegorical tale about the magnificence and rarity of true nonconformity." -- The New York Times

While observing exotic animal trainers for her acclaimed book Kicked, Bitten, and Scratched, journalist Amy Sutherland had an epiphany: What if she used these training techniques with the human animals in her own life—namely her dear husband, Scott? In this lively and perceptive book, Sutherland tells how she took the trainers' lessons home. The next time her forgetful husband stomped through the house in search of his mislaid car keys, she asked herself, "What would a dolphin trainer do?" The answer was: nothing. Trainers reward the behavior they want and, just as important, ignore the behavior they don't. Rather than appease her mate's rising temper by joining in the search, or fuel his temper by nagging him to keep better track of his things in the first place, Sutherland kept her mouth shut and her eyes on the dishes she was washing. In short order, Scott found his keys and regained his cool. "I felt like I should throw him a mackerel," she writes. In time, as she put more training principles into action, she noticed that she became more optimistic and less judgmental, and their twelve-year marriage was better than ever. What started as a goofy experiment had such good results that Sutherland began using the training techniques with all the people in her life, including her mother, her friends, her students, even the clerk at the post office. In the end, the biggest lesson she learned is that the only animal you can truly change is yourself. Full of fun facts, fascinating insights, hilarious anecdotes, and practical tips, What Shamu Taught Me About Life, Love, and Marriage describes Sutherland's Alice-in-Wonderland experience of stumbling into a world where cheetahs walk nicely on leashes and elephants paint with watercolors, and of leaving a new, improved Homo sapiens.
