Feminist Political Ecology explores the gendered relations of ecologies, economies and politics in communities as diverse as the rubber tappers in the rainforests of Brazil to activist groups fighting racism in New York City. Women are often at the centre of these struggles, struggles which concern local knowledge, everyday practice, rights to resources, sustainable development, environmental quality, and social justice. The book bridges the gap between the academic and rural orientation of political ecology and the largely activist and urban focus of environmental justice movements.

The concept of complex emotions is obviously polysemous. On the one hand, we can interpret it as a non-basic, non-prototypical, or culture-specific notion, on the other - and this is the interpretation we propose in this work - a complex emotion concept can be looked upon as a concept whose complexity emerges in interaction, due to the complex nature of its object. Our interpretation is thus construction-based, one in which meaning is not to be found exclusively in the lexical semantics of the term, but also in the, clearly meaning-laden, grammatical construction, e.g. a complement clause, expressing the object or cause of the emotion. The construal of a scene mapped on the form of a

complex sentence involves the emotion that is unambiguously complex and not necessarily universal or prototypical. We argue throughout this book that cross-linguistic grammatical mismatches are a visible sign of conceptual and categorizational distinctions between the conceptualization of emotion in different languages and cultures. They also signal differences in what individual speakers consider salient in a portrayed scene. We offer a contrastive corpus-based study of Polish and English emotion concepts and the linguistic patterns they enter. Our theoretical approach combines lexical semantics and cognitive linguistics and proposes a cognitive corpus linguistics methodology. It is a cognitive linguistic endeavor in which we analyze grammatical category mismatches and provide detailed semantic analyses of different complement choices of emotion predicates. We also discuss insights into Polish and English cultural values gleaned from the different underlying categorizations of emotions. Combining theoretical analyses with pedagogical theory and classroom applications, this work breaks new ground and will reach audiences of linguists, teachers and students of Polish, teachers and students of English, translators, and other language researchers and practitioners.

Cities are now home to nearly half of the world's population, and the issue of sustainable development is one of the most pressing challenges facing the international community in the 21st century. This publication is the first in-depth attempt to monitor and analyse the realities faced by urban populations around the world. It explores a range of issues, trends and policy responses in five major areas relating to: shelter, society, environment, economy and governance. It introduces the 'City Development Index', which has been developed by the UN Centre for Human Settlements (Habitat). Over time, this should become a standard monitoring tool used to track regional, national and city level progress towards implementing the Habitat Agenda. The report concludes that local democracy is a key factor for the future of all cities.

Statistics don't lie. Moms today are more fatigued, burned out, and overwhelmed than ever. Smartphones constantly ping and alert and demand our attention. And social media can eat up hours of our days with mindless scrolling and tapping while leaving many feeling empty and lonely. Add to that family commitments, work that is accessible around the clock, and overscheduling, and you have a life that can feel unmanageable and frantic . . . even running on empty. Bestselling author and founder of Simplified®, Emily Ley shares how to live a life of more in a world that often overwhelms to the point of burnout in *When Less Becomes More*. Emily empathizes with mothers in the throes of exhaustion and provides tools for nourishing their spirits and achieving a life where less becomes more. In this book, Emily Ley, author of the bestselling *Grace, Not Perfection* and *A Simplified Life*, takes readers on a journey out of that empty place and shows them how to fill their wells with the nourishment that only true connection can provide. She also presents some radical concepts that push against the tethers of modern life, with the promise that more of the good stuff comes when we say yes to less of what keeps us empty: Less Rush, More Rhythm Less Liking, More Loving Less Noise, More Calm Less Distraction, More Connection Less Frenzy, More Soul Rest Less Fake, More Real Less Fear, More Community Less Great, More Good Less Chasing, More Cherishing Less Stuff, More Treasures Getting to more might require some outside-the-box changes, some unraveling of the patterns readers have adopted, and some reworking of the day to day. Readers can build a life based on their core

values instead of slipping into a life dictated by society or what's "normal." Because we weren't made for normal. We were made for more--for a life of fullness, dreaming, and lasting joy.

Argues that the subjective evaluation of the product must give way to a descriptive and objective attempt to reveal the workings of the process (ie translating). Without such a shift, translation theory will continue outside the mainstream of intellectual activity in human sciences and fail to take its rightful place as a major field in applied Linguistics.

Read the book that inspired the Academy Award and Golden Globe winning 2009 film INVICTUS featuring Morgan Freeman and Matt Daymon, directed by Clint Eastwood. Beginning in a jail cell and ending in a rugby tournament—the true story of how the most inspiring charm offensive in history brought South Africa together. After being released from prison and winning South Africa's first free election, Nelson Mandela presided over a country still deeply divided by fifty years of apartheid. His plan was ambitious if not far-fetched: use the national rugby team, the Springboks—long an embodiment of white-supremacist rule—to embody and engage a new South Africa as they prepared to host the 1995 World Cup. The string of wins that followed not only defied the odds, but capped Mandela's miraculous effort to bring South Africans together again in a hard-won, enduring bond.
