This book addresses corrosion problems and their solutions at facilities in the oil refining and petrochemical industry, including cooling water and boiler feed water units. Further, it describes and analyzes corrosion control actions, corrosion monitoring, and corrosion management. Corrosion problems are a perennial issue in the oil refining and petrochemical industry, as they lead to a deterioration of the functional properties of metallic equipment and harm the environment – both of which need to be protected for the sake of current and future generations. Accordingly, this book examines and analyzes typical and atypical corrosion failure cases and their prevention at refineries and petrochemical facilities, including problems with: pipelines, tanks, furnaces, distillation columns, absorbers, heat exchangers, and pumps. In addition, it describes naphthenic acid corrosion, stress corrosion cracking, hydrogen damages, sulfidic corrosion, microbiologically induced corrosion, erosion-corrosion, and corrosion fatigue occurring at refinery units. At last, fouling, corrosion and cleaning are discussed in this book.

This book is designed to cover one year's work in Hebrew leading up to a full understanding of the language. It has been used by the author with his students for many years and the published text is the result of testing and refining over these years. Every attempt has been made to make the grammar clear and simple. For example, all Hebrew words are transliterated, as well as being given in the original for the first three-quarters of the book. The grammatical discussion is made as unsophisticated as possible for it is the author's intention that this book should also be of use to those who study Hebrew without a teacher.

The Paratrisika (or Paratrimika) is a short Tantra that has been held in the highest esteem by Kashmir Saivism or Trika. After Somananda, Abhinavagupta has written two commentaries on it, a short one (Laghuvrtti) and an extensive one the present Vivarana which is presented here for the first time in an English translation. The Paratrisika Vivarana is one of the most fascinating but also most difficult texts of the Kashmir Saiva School, and of the mystical philosophical literature of India as a whole. It deals with Ultimate Reality (anuttara or para) and with the methods of realization, centred above all in the theory and practice of the mantra. Abhinavagupta displays here his great exegetical genius and presents a penetrating metaphysics of language, of the Word (vak) and its various stages in relation to consciousness. His language reflects in a luminous fashion the mystical experience contained in this text. The present translation of Abhinavagupta's masterpiece will not only be a milestone in the study of Kashmir Saivism, but it also makes available one of the major mystical texts of the Indian tradition to readers interested in philosophy and spirituality
