An estimated 8.8 million people fell ill with tuberculosis (TB) in 2010 and 1.4 million died from the disease. Although antibiotics to treat TB were developed in the 1950s and are effective against a majority of TB cases, resistance to these antibiotics has emerged over the years, resulting in the growing spread of multidrug-resistant (MDR) TB. Due to challenges in timely and accurate diagnosis of drug-resistant TB, length and tolerability of treatment regimens, and expense of second-line anti-TB drugs, effectively controlling the disease requires complex public health interventions. The IOM Forum on Drug Discovery, Development, and Translation held three international workshops to gather information from local experts around the world on the threat of drug resistant TB and how the challenges it presents can be met. Workshops were held in South Africa and Russia in

2010. The third workshop was held April 18-19, 2011, in New Delhi, India, in collaboration with the Indian National Science Academy and the Indian Council of Medical Research. The aim of the workshop was to highlight key challenges to controlling the spread of drug-resistant strains of TB in India and to discuss strategies for advancing and integrating local and international efforts to prevent and treat drug-resistant TB. This document summarizes the workshop.

Eddie K. Wrights memoir detailing the controversial experience of being the young father of a son who would grow up to be the gayest man on the planet! His "NO SON OF MINE!!" street gangster mentality evolves during his difficult life journey coming to realize that his responsibility as a loving father didn't change just because his son is gay. The book is scheduled for publication on June 1, 2016. In his first memoir, Eddie shares his story of becoming a father at 18 years old who realized his son was showing 'stereotypical' signs of being gay while still in diapers. Spending most of his adult life engulfed in the street gangster/hip hop culture where this subject was not only hushed, but deeply frowned upon, he gives us the voice for what's been kept silent for far too long, confronting almost every aspect of this taboo topic. It took years for him to silently accept his son's homosexuality himself, regardless of all the signs. When his son was five years old, his favorite

Parents will find comfort in reading that Eddie admits that his son's feminine behaviors embarrassed him and he seriously contemplated abandonment, a choice that too many fathers feel they have to choose.

Want to learn how to build ASP.NET Core 1.1 MVC Web Applications? Prerequisites: \* C# (Intermediate level) \* HTML5/CSS3 (Basic knowledge) This book is primarily aimed at developers who want to learn how to build ASP.NET Core 1.1 MVC Applications. You should be an intermediate level C# developer with some experience in HTML5 and CSS3. The book presupposes that you have a solid C# foundation since the language won't be explained in any detail. You will learn ASP.NET Core 1.1 by building two MVC applications. The first application will be built using an empty template. The goal is to get you familiar with ASP.NET Core 1.1 by adding middleware and services one piece at a time, building a basic application. Then you will build a second MVC application using a template that already contains support for MVC, Entity Framework Core, and user

authentication. This application is a video course website, where users can register to gain access to video courses. If you are already familiar with MVC 5, the content in this book can get you started with ASP.NET Core 1.1 in a fast, no-fluff way. It's important to mention that this book is practical and tactical, where you will learn as you progress through the modules and build real web applications in the process. To spare you countless pages of fluff (filler material), only valuable information, pertinent to the task at hand, is discussed. The benefit is a shorter and more condensed book, which will save you time and give you a more enjoyable experience. The goal is to learn ASP.NET Core 1.1 by building two web applications, one from scratch and one from an existing template. This experience is something you can put in your CV when applying for a job or a consultant position, or when negotiating a higher salary. Technologies, frameworks and languages you will use: \* ASP.NET Core 1.1 MVC (The framework that you will use) \* Services (To provide you own functionality as a reusable service) \* Middleware (To provide you own functionality to HTTP Request pipeline) \* Entity Framework (To crate and communicate with a database) \* View Component (To render data in the \_Layout view with model data) \* Razor syntax (To include server-side code in views) \* Bootstrap (Used for styling and to create a responsive design) \* LINQ (To query the database) \* Dependency Injection (To inject objects into constructors) \* Tag Helper (to clean up the HTML and enable re-use) \* HTML Helper methods (to clean up your HTML and enable re-use) \* Bower/NuGet (To install necessary front-

-No one is immune to death. And no one who reads this will be immune to the charm - and power - of Colin Bird's wise and wildly original -how-to- for those who find themselves face-to-face with the great inevitable, DEATH: WHAT NOT TO SAY. Think Paulo Coelho, if Coelho ever had to sleep in his car, or make his living as a Nursing Home Chaplain. Colin Bird's brand of street-level pragmatism on matters of compassion and mortality is as massively refreshing as it is on-the-ground useful for anyone trying to be there for suffering friends and loved ones. They should pass this book out in hospitals and funeral homes, or stick in hotel nightstands instead of bibles. It's a lot more useful - and a much better read. DEATH: WHAT NOT TO SAY is a fearless, heartfelt, and utterly invaluable handbook for anyone who isn't dead, but knows a few people who are - or are about to be.-

author: I, Fatty; Permanent Midnight -Colin Bird serves up his own brand of commentary in DEATH: What Not To Say. Supremely witty yet cuttngly honest, a richly worded yarn from a man that's seen the losing side of life and ran from it. Couldn't put it down.- -Dean Karnazes, Ultramarathoner and New York Times bestselling author -As a licensed therapist for 16 years I've seen a lot of grieving souls. Grief is no respecter of persons. It touches everyone. And it's relentless. People die and we can't stop it. People grieve and we can't stop it. But stopping it isn't really the goal, loving through it is. That's the message of Colin Bird's book, -Death: What Not to Say-. There are a myriad of books on grief written by professionals. We know what to say and what not to say. We know what to expect, how to listen well, and why honoring someone's grief is so delicate and crucial. We've had lots of practice. But approaching a Griever well is just not easily taught. We professionals were beginners once. True proficiency has come from trial and error. And honestly, grief filling up my living room is different from grief sitting in my office... so very different. Not because of the grief, but the relationship between me and the Griever. That's one of the reasons I love this book. Written in the style of an artist, -Death: What Not to Say- is a conversation with a man who has experienced pain, excruciating, life-altering, soul-searching pain. Not just his, but others'. He's walked his own grief journey and accompanied others on theirs. Filled with stories that raise your ire, melt your heart, and convict you to the core, Colin's words are raw, real and refreshing. discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation.

Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.
