Timothy Garton Ash was with the strikers in the Lenin Shipyard in Gdansk in August 1980 when the trade union Solidarity was born, in opposition to the Communist government. He witnessed their bravery and defiance and the emergence of an improbable leader and hero in the country's future president, Lech Walesa. This text recreates the ideals and terrors of that time, and exposes the mechanics of oppression of the communist regime.

This is a book about the lies we tell ourselves, and Giannetti approaches his subject by intriguing routes. In the natural world, he surveys the art of deception such as orchids simulating female insects to trick the males. He considers chemical deception introduced into the body by drugs. He assesses the role of self-deception in individual acts of daring and the degree of self-interest we hide from ourselves but are very ready to spot in others. Of profound interest is the paradox which allows one part of the mind to lie to another which Giannetti weighs up from an ethical point of view as it reflects on the individual and impacts on society.

This detailed look at the hospitality industry's dynamics uses an international perspective that provides reader understanding by spanning several strategic and functional areas in management practices. The contributors offer research-based perspectives on real-life issues in this competitive industry.

Load-Oriented Manufacturing Control is unique as it gives comprehensive and self-contained principles for the implementation of an appropriate production control technique of general applicability. It is based on the "funnel model", a new approach to scheduling and scheduling control which has an extensive monitoring and diagnosis system. Its most important system components include throughput diagrams, load-oriented order release, schedule-oriented capacity planning and control. The "funnel model" is getting increasing implementation in manufacturing companies. It is available in numerous variants and is especially significant for the job-shop and series production. Load-Oriented Manufacturing Control provides a large number of practical examples and is therefore relatively easy to understand. It offers direct implementation of this new important technique in manufacturing scheduling and control.

This study is based on a Sino-Tibetan manuscript from the late 960s, carried by a Chinese pilgrim through the Hexi corridor on his way from Wutaishan to India. Included is a series of Tibetan letters of introduction that functioned as a passport as the monk stopped in monasteries on his way. The manuscript is a unique contemporary testimony of the large pilgrimage movement known from historical sources. It also provides evidence for the high degree of ethnic, cultural and linguistic diversity in Western China during this period.

Begun in 1939, barely four months after the close of the Spanish Civil War, these poems by the Nobel Laureate poet Vicente Aleixandre were written during a period of hardship and despair. In spite of his surroundings Aleixandre created the splendor of the shadow of a lost paradise that consisted of memory, nostalgia, yearning and illusion. This is the first full English version. The original Spanish text is included.

This practical book by two industry leaders continues to be a self-teaching guide for software analysts and developers. This revised edition teaches readers how to actually "do" object-oriented modeling using UML notation as well as how to implement the model using C++. The authors introduce all of the basic object-oriented fundamentals necessary so readers can understand and apply the object-oriented paradigm. FEATURES Teaches readers to build an object-oriented application using C++ and make the right trade-off decisions to meet business needs. Exposes a number of the myths surround object-oriented technology while focusing on its practicality as a software engineering tool. Gives readers a "recipe or step-by-step guide to do all of the steps of object-oriented technology. Provides a practical approach to analysis, design, and programming in the object-oriented technology. NEW TO THE SECOND EDITION Gives a practical approach for the development of use cases as part of object-oriented analysis. Provides greater coverage of UML diagramming. Introduces key C++ libraries that provide important functionality, supporting implementation of an object-oriented model in C++. Improved coverage of dynamic behavior modeling, implementation of the state model, and class projects.

Interest in numerical combustion is growing among applied mathematicians, physicists, chemists, engine manufacturers and many industrialists. This proceedings volume contains nine invited lectures and twenty seven contributions carefully selected by the editors. The major themes are numerical simulation of transsonic and supersonic combustion phenomena, the study of supersonic reacting mixing layers, and turbulent combustion. Emphasis is laid on hyperbolic models and on numerical simulations of hydrocarbon flames with a complete set of chemical reactions carried out in two-dimensional geometries as well as on complex reactive flow simulations.

Europe Dancing examines the dance cultures and movements which have developed in Europe since the Second World War. Nine countries are represented in this unique collaboration between European dance scholars. The contributors chart the art form, and discuss the outside influences which have shaped it. This comprehensive book explores: * questions of identity within individual countries, within Europe, and in relation to the USA * the East/West cultural division * the development of state subsidy for dance * the rise of contemporary dance as an 'alternative' genre * the implications for dance of political, economic and social change. Useful historical charts are included to trace significant dance and political events throughout the twentieth century in each country. Never before has this information been gathered together in one place. This book is essential reading for everyone interested in dance and its growth and development in recent years.

There is a need in the higher education arena for a book that responds to the need for using technology in a classroom of tech-savvy students. This book is filled with illustrative examples of questions and teaching activities that use classroom response systems from a variety of disciplines (with a discipline index). The book also incorporates results from research on the effectiveness of the technology for teaching. Written for instructional designers and re-designers as well as faculty across disciplines. A must-read for anyone interested in interactive teaching and the use of clickers. This book draws on the experiences of countless instructors across a wide range of disciplines to provide both novice and experienced teachers with practical advice on how to make classes more fun and more effective."--Eric Mazur, Balkanski Professor of Physics and Applied Physics, Harvard University, and author, Peer Instruction: A User's Manual "Those who come to this book needing practical advice on using 'clickers' in the classroom will be richly rewarded: with case studies, a refreshing historical perspective,

and much pedagogical ingenuity. Those who seek a deep, thoughtful examination of strategies for active learning will find that here as well—in abundance. Dr. Bruff achieves a marvelous synthesis of the pragmatic and the philosophical that will be useful far beyond the life span of any single technology.” --Gardner Campbell, Director, Academy for Teaching and Learning, and Associate Professor of Literature, Media, and Learning, Honors College, Baylor University

The 12th mystery featuring Sheriff Dan Rhodes. With the author's quietly hilarious humor and fine characterization of Rhodes and the other residents of Blacklin County, TX, Crider once more shows the human side of small town law enforcement. A man dies in a fire; fireworks are involved in further threats and someone is spreading lies about the leading local figures, even including Rhodes himself. But the unflappable, commonsense lawman does his best--and a very good best it is. "Just plain good storytelling... Crider's easy prose fits the setting to a tee and brings all the smalltown schemes, quirks and characters to true and amusing life." - Publishers Weekly

The readers are expected to gain an insightful view on the current trends, issues, mitigating factors as well as solutions from this book.

Brave New Digital Classroom examines the most effective ways to utilize technology in language learning. The author deftly interweaves the latest results of pedagogical research with descriptions of the most successful computer-assisted language learning (CALL) projects to show how to implement technology in the foreign-language curriculum to assist the second language acquisition process. This fully updated second edition includes new chapters on the latest electronic resources, including gaming and social media, and discusses the realities and potential of distance learning for second language acquisition. The author examines the web, CALL applications, and computer-mediated communication (CMC), and suggests how the new technologically assisted curriculum will work for the foreign-language curriculum. Rather

than advocating new technologies as a replacement for activities that can be done equally well with traditional processes, the author envisions a radical change as teachers rethink their strategies and develop their competence in the effective use of technology in language teaching and learning. Directed at all language teachers, from the elementary school to postsecondary levels, the book is ideal for graduate-level courses on second language pedagogy. It also serves as an invaluable reference for experienced researchers, CALL developers, department chairs, and administrators.

Next-door neighbor Shannon O'Rourke was striking, successful and single. Not once, though, had she come bearing casseroles. (Her twoalarm-fire attempt at baking Christmas cookies with his boy fquite possibly the reason.) Homemaker material or not, Shannon had resurrected Hiis withdrawn son...when even he had failed. For that, he was tempted to kiss her. I Where was mistletoe when you needed it?

Lucien's Gamble Lucien Remington's reputation as a debauched libertine who plays by no one's rules--in business or the bedroom--is well deserved. He gets what he wants, social repudiation be damned. But society can keep from him the one thing he truly desires, the untouchable Lady Julienne La Coeur. Until she sneaks into his club dressed as a man and searching for her irresponsible brother. Suddenly she's in Lucien's grasp, his to take, and his mind is filled with the most wickedly sinful thoughts. A gentleman would walk away from the temptation she presents. But then, Lucien has never claimed to be a gentleman. . .

Peter Hall and David Soskice's Varieties of Capitalism has become a seminal text and reference point across the social sciences, generating debate and research around political-economic models. Here, Bob Hancké presents the key readings on 'Varieties of Capitalism', including the original Hall and Soskice introduction, which encompass the key issues in the study of capitalism and capitalist diversity, its origins, and the debates that followed it. Beginning with the broad theoretical arguments around the idea of 'Varieties of Capitalism', the book then goes on to focus on specific empirical controversies, before finally considering recent attempts at rethinking this influential framework. The Debating Varieties of Capitalism Reader is the perfect guide to understanding this set of ideas that have changed the way we look at comparative political economy.
