Discover how Siri can increase your efficiency and productivity, lend a hand when you're in the car or out for a jog, and even make it simpler to play music or find movies and TV shows to watch. Among many other things, this book teaches you: • What hardware and software you need to use Siri • How to change Siri's language and voice • Ways to personalize Siri by telling it about yourself, your contacts, and more • The numerous ways to activate Siri (by touch or by voice) • How to use Siri with AirPods, wired earbuds, or third-party headphones • What to do if the wrong device answers your "Hey Siri" request • How to ask Siri about sports, math and conversions, time, food, movies, people, stocks, the weather, jokes, and random facts • Tips for asking Siri follow-up questions • How to control music (on any device, with or without an Apple Music subscription) • Techniques for using Siri to get directions, set reminders and appointments, send messages and email, and take notes • Ways to use Siri to search for files on your Mac • What Siri can and can't do for you on an Apple TV or HomePod • How to make and use Siri Shortcuts on an iOS device or Apple Watch • Everything you need to know about your privacy where Siri is involved Plus bonus videos! Apple's new MacBook Air (M1, 2020) is an absolutely fantastic laptop, and thanks to brilliant new additions, in the form of Apple's own M1 chip (which replaces the Intel processors used by the company) and an improved screen. In previous years, the MacBook Air was a reduced version of the MacBook, which was an excellent thin and light laptop for everyday use, but due to its low features did not really fit into intense creative workloads, such as editing, transfer ultra-high definition video or complex 3D animated scenes. However, this latest version has the same M1 chip introduced in the new MacBook Pro 13-inch (M1, 2020), which means that for the first time the MacBook Air can compete with the more expensive laptop. So it really deserves a place around the best laptops in graphic design. It is better, and still the most inexpensive MacBook you can get right now, and it means if you're looking for a slim and lightweight 13-inch laptop for video and photo editing, then the MacBook Air (M1, 2020) is the perfect choice.
