This is the first of a two-volume set (CCIS 434 and CCIS 435) that constitutes the extended abstracts of the posters presented during the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, and consisting of 14 thematic conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in

a variety of application areas. The extended abstracts were carefully reviewed and selected for inclusion in this two-volume set. This volume contains posters' extended abstracts addressing the following major topics: design methods, techniques and knowledge; the design of everyday things; interacting with information and knowledge; cognitive, perceptual and emotional issues in HCI; multimodal and natural interaction; algorithms and machine learning methods in HCI; virtual and augmented environments. While the creation of Dolly the sheep, the world's most famous clone, triggered an enormous amount of discussion about human cloning, in *Dolly Mixtures* the anthropologist Sarah Franklin looks beyond that much-rehearsed controversy to some of the other reasons why the iconic animal's birth and death were significant. Building on the work of historians and anthropologists, Franklin reveals Dolly as the embodiment of agricultural, scientific, social, and commercial histories which are, in turn, bound up with national and imperial aspirations. Dolly was the offspring of a long tradition of animal domestication, as well as the more recent histories of capital accumulation through selective breeding, and enhanced national competitiveness through the control of biocapital. Franklin traces Dolly's connections to Britain's centuries-old sheep and wool markets (which were vital to the nation's industrial revolution) and to Britain's export of animals to its colonies—particularly Australia—to expand markets and produce wealth. Moving forward in time, she explains the celebrity sheep's links to the embryonic cell lines and global bioscientific innovation of the late twentieth century and

early twenty-first. Franklin combines wide-ranging sources—from historical accounts of sheep-breeding, to scientific representations of cloning by nuclear transfer, to popular media reports of Dolly’s creation and birth—as she draws on gender and kinship theory as well as postcolonial and science studies. She argues that there is an urgent need for more nuanced responses to the complex intersections between the social and the biological, intersections which are literally reshaping reproduction and genealogy. In *Dolly Mixtures*, Franklin uses the renowned sheep as an opportunity to begin developing a critical language to identify and evaluate the reproductive possibilities that post-Dolly biology now faces, and to look back at some of the important historical formations that enabled and prefigured Dolly’s creation.

for establishing control from the beginning, as well as techniques for the rider. Unlock the cultural obsession with high-stakes robberies in *Heist*, a collection of the world's greatest real-life break-ins. From the Isabella Stewart Gardner Museum's famous art heist to the disappearance of the Marie Antoinette watch, these 100% true stories will have you on the edge of your seat—and double checking the locks on your doors! Have you ever watched a movie like *Ocean's Eleven* and thought: "There's no way that could ever actually happen, right?" Wrong. In the US alone, there have been dozens, if not hundreds, of heists, from bank break-ins to museum plunders. In this premium compendium, we'll walk through the most impressive ones, diving into the details behind each case, the detectives that led the investigations, how the events unfolded, and what mysteries remain. The hardcover book will explore the top 50 incidents, including:

1. **The Isabella Stewart Gardner Museum Heist:** In March of 1990, two men dressed up as police officers and sweet-talked their way past security at the Isabella Stewart Gardner Museum in Boston, MA. After tying up the real guards, these men dismantled and packed up 13 works of art, loaded them onto a truck, and drove off into the night, making the 81-minute breach one of the most expensive in modern history. Today, it remains the single largest property theft in the world.
2. **The Great Train Robbery:** Not all heists happen in buildings. In fact, one of the most popular ones was the 1963 train robbery in which nearly 2.6 million pounds was lifted from a Royal Mail train headed to London. Using intel provided by a man on the inside dubbed *The*

Ulsterman, the group rigged the railways traffic light system to bring the train to an extended stop, during which time, they funneled the money from one of the carriages into a waiting truck by way of a human chain. 3. The French Bank Vault Tunnelers: On the morning of July 19, 1976, workers from a safe manufacturing company were called to the Société Générale bank to fix a faulty vault door that appeared to be jammed. When they drilled into the vault and peered in to diagnose the problem, though, what they found was not a loose screw or broken hinge, but a door that has been welded shut...from the inside. Also scattering the room was a couple of wine glasses, a portable stove, and a giant tunnel system that proved to be the method of transport for thieves, who had dug their way into the bank, spent the weekend there, and left with ten million in cash. 4. D. B. Cooper's Escapades: The subject of many conspiracy theories, D. B. Cooper (not his real name) hopped on a Boeing 727 in a trench coat and sunglasses in 1971. When the plane had reached cruising altitude, Cooper hijacked it, extorting 200,000 dollars before strapping on a parachute, jumping out of the plane, and disappearing into thin air. This "aerial heist" remains unsolved to this day and remains one of the FBI's most frustrating open cases. 5. The Botched Crown Jewels of England Theft: Back in 1671, a man named Thomas Blood (a cool name, by any standard) decided: "Eh, I'm gonna steal the Crown Jewels." He reached out to Talbot Edwards, the keeper of the stones, with a proposition: if you give me a private viewing of the gemstones, I'll have my nephew marry your daughter (a nephew who, naturally,

turned out to not exist). At this private viewing, Blood knocked out Talbot, smashed the jewels into pieces and threw the shards into his pockets, hoping to make a run for it. Though he didn't manage to escape, he did manage to escape jail time: The King at the time was so amused by this failed attempt that he let Blood off scot-free. And that's just the start of it. Plastered with gorgeous photography and big, sleek pages, Heist looks as good as it is captivating. Crack the code of the world's most elusive capers, from the popular tales your great grandad told you about to the ones that have been long forgotten.

Pop music surrounds us - in our cars, over supermarket speakers, even when we are laid out at the dentist - but how often do we really hear what's playing? Switched on Pop is the book based on the eponymous podcast that has been hailed by NPR, Rolling Stone, The Guardian, and Entertainment Weekly for its witty and accessible analysis of Top 40 hits. Through close studies of sixteen modern classics, musicologist Nate Sloan and songwriter Charlie Harding shift pop from the background to the foreground, illuminating the essential musical concepts behind two decades of chart-topping songs. In 1939, Aaron Copland published *What to Listen for in Music*, the bestseller that made classical music approachable for generations of listeners. Eighty years later, Nate and Charlie update Copland's idea for a new audience and repertoire: 21st century pop, from Britney to Beyoncé, Outkast to Kendrick Lamar. Despite the importance of pop
