The essays in Law and Citizenship provide a framework for analyzing citizenship in an increasingly globalized world by addressing a number of fundamental questions. How are traditional notions of citizenship erecting borders against those who are excluded? What are the impacts of changing notions of state, borders, and participation on our concepts of citizenship? Within territorial borders, to what extent are citizens able to participate, given that the principles of accountability, transparency, and representativeness remain ideals? The contributors address the numerous implications of the concept of citizenship for public policy, international law, poverty law, immigration law, constitutional law, history, political science, and sociology.

"Becoming a Citizen is a terrific book. Important, innovative, well argued, theoretically significant, and empirically grounded. It will be the definitive work in the field for years to come."--Frank D. Bean, Co-Director, Center for Research on Immigration, Population and Public Policy "This book is in three ways innovative. First, it avoids the domestic navel-gazing of U.S. immigration studies, through an obvious yet ingenious comparison with Canada. Second, it shows that official multiculturalism and common citizenship may very well go together, revealing Canada, and not the United States, as leader in successful immigrant integration. Thirdly, the book provides a compelling picture of how the state matters in making immigrants citizens. An outstanding contribution to the migration and citizenship literature!"--Christian Joppke, American University of Paris

"In this study the experience in the Netherlands with civic integration policies will be explained in a detailed and systematic way. As it stands, the Netherlands presently has one of the most encompassing and coercive civic integration policies, which is characterised by overseas civic integration testing, a general obligation to pass a civic integration exam for all foreign nationals and the existence of an elaborate sanctioning regime. Our main purpose is to understand the legitimacy of civic integration in this country, particularly through analysing its main implications and effects from a broader perspective. This perspective consists of an historical context, a framework of modern citizenship rights, and a cross border comparison of different national integration concepts. The principal issues to be addressed are the political and social arguments which lay behind the introduction of civic integration policies, and the extent to which these policies fit within academic notions of modern citizenship. In addition, the Dutch model of civic integration will be set against alternative national integration strategies as prevailing in some other immigrant receiving countries, particularly Belgium, Canada and the United States."--Publisher's description.
