An exclusive collection of papers introducing current and frontier technologies of special significance to the planning, design, construction, and maintenance of civil infrastructures. This volume is intended for professional and practicing engineers involved with infrastructure systems such as roadways, bridges, buildings, power generating and distribution systems, water resources, environmental facilities, and other civil infrastructure systems. Contributions are by internationally renowned and eminent experts, and cover: 1. Life-cycle cost and performance; 2. Reliability engineering; 3. Risk assessment and management; 4. Optimization methods and optimal design; 5. Role of maintenance, inspection, and repair; 6. Structural and system health monitoring; 7. Durability, fatigue and fracture; 8. Corrosion technology for metal and R/C structures; 9. Concrete materials and concrete structures.

Traditional reliance on chemical analysis to understand the direction and extent of treatment in a bioremediation process has been found to be inadequate. Whereas the goal of bioremediation is toxicity reduction, few direct, reliable measures of this process are as yet available. Another area of intense discussion is the assessment of market forces contributing to the acceptability of bioremediation. Finally, another important component is a series of lectures and lively exchanges devoted to practical applications of different bioremediation technologies. The range of subjects covers a wide spectrum, encompassing emerging technologies as well as actual, full-scale operations. Examples discussed include landfarming, biopiling, composting, phytoremediation and mycoremediation. Each technology is explored for its utility and capability to provide desired treatment goals. Advantages and limitations of each technology are discussed. The concept of natural attenuation is also critically evaluated since in some cases where time to remediation is not a significant factor, it may be an alternative to active bioremediation operations.

Bringing together leading experts, this book presents effective practices for helping people with autism spectrum disorders (ASD) to thrive in adulthood. As individuals with ASD mature, their needs change as well. The book reviews the growing research base and describes ways to support adolescents and adults in succeeding in higher education and work, living independently, enjoying leisure activities, navigating meaningful personal relationships, and more. Specific behavioral and instructional interventions--such as functional communication training, positive behavior support, and applied behavior analysis--are discussed. Case examples illustrate practical aspects of applying the strategies in real-world school and community settings.

Offering the wisdom that only experience and expertise in the field can bring, this book takes a critical look into the present and the future of literacy as envisioned by leading reading researchers. The lead author of each chapter, and in some cases more than one, of the authors, is a distinguished reading researcher elected by their peers into the Reading Hall of Fame. In this book these distinguished literacy leaders extend their role as researchers to speak directly to issues of practice and policy. All chapters address the theme of literacy and the teaching of literacy as being in a constant state of change. The authors are theoretical as they describe literacy, literacy acquisition, and the teaching of literacy; they are practical as they examine the issues that classroom teachers and reading specialists engage with on a daily basis; and they are political as they advocate for informed policy at the local, state and national levels. A key message in this book is that literacy professionals must take an active role to shape change.

"Introduction to Financial Statements Knowing the numbers is sometimes even a matter of corporate survival. Consider the story of Columbia Sportswear Company, headquartered in Portland, Oregon. Gert Boyle's family fled Nazi Germany when she was 13 years old and then purchased a small hat company in Oregon, Columbia Hat Company. In 1971, Gert's husband, who was then running the company, died suddenly. Gert took over the small, struggling company with help from her son Tim, who was then a senior at the University of Oregon. Somehow, they kept the company afloat. Today, Columbia has more than 4,000 employees and annual sales in excess of \$1 billion. Its brands include Columbia, Mountain Hardwear, Sorel, and Montrail. Employers such as Columbia Sportswear generally assume that managers in all areas of the company are "financially literate." To help prepare you for that, in this text you will learn how to read and prepare financial statements, and how to use key tools to evaluate financial results using basic data analytics."--

First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

This timely volume explores the multiple domains where Behavior Analysts can provide meaningful assessment and interventions. Selecting clinical areas in which behavior analysts already are active, chapters will describe unique features of the setting as well as the skills and competencies needed to practice in these areas. While providers of behavior analytic services have substantially increased in number, the field of behavior analysis itself has narrowed. Reimbursement policies and name recognition as a treatment specific to autism have raised concerns that other areas where it is helpful, such as behavioral gerontology or integrated behavioral health, will be de-emphasized. This volume aims to promote workforce development and support broad behavior analytic training, considering the Behavior Analyst Certification Board's 5th edition task list (effective in 2020).

The award-winning "lively and excellent collection" (Los Angeles Times) about the South and its legacy, about African-American griefs and passages, from the author of Jelly Roll and Black Maria, a poet who has "set himself apart from his peers with his supple, variable, blues-inflected lines" (Publishers Weekly).
