Assessment results that improve institutional effectiveness, heighten student learning, and better align resources serve to make institutions stronger for the benefit of their students, and those results also serve the institution or program well during the holistic evaluation required through accreditation." – from the foreword by Heather Perfetti, President of the Middle States Commission on Higher Education Colleges and universities struggle to understand precisely what is being asked for by accreditors, and this book answers that question by sharing examples of success reported by schools specifically recommended by accreditors. This compendium gathers examples of assessment practice in twenty-four higher education institutions: twenty-three in the U.S. and one in Australia. All institutions represented in this book were suggested by their accreditor as having an effective assessment approach in one or more of the following assessment focused areas: assessment in the disciplines, co-curricular, course/program/institutional assessment, equity and inclusion, general education, online learning, program review, scholarship of teaching and learning, student learning, or technology. These examples recommended by accrediting agencies makes this a unique contribution to the assessment literature. The book is organized in four parts. Part One is focused on student learning and assessment and includes ten chapters. The primary focus for Part Two is student learning assessment from a disciplinary perspective and includes four chapters. Part Three has a faculty engagement and assessment focus, and Part Four includes four chapters on institutional effectiveness and assessment, with a focus on strategic planning. This book is a publication of the Association for the Assessment of Learning in Higher Education (AALHE), an organization of practitioners interested in using effective assessment practice to document and improve student learning.

"There are two groups of standards that help form the basic repertory used in jazz improvisation. The first group was created by jazz musicians directly from improvisation, experimentation and the analysis of musical forms, ideas and practices that were developed through study and the natural gifts of some of the greatest musicians of the twentieth century. This group codified jazz into chronological styles and provides concrete examples of its styles and concepts. The second group of standards is comprised of compositions written as popular songs during the first

half of the twentieth century ... Every improviser is a composer who makes up melodies spontaneously. The model choruses give examples that can be studied, learned, broken into independent phrases and used to create other melodies that reflect more clearly what the improviser wants to say musically ..."--Preface.

This book presents a practical method for the construction of hexatonic scales that are useful for both the improviser and composer. Many modern piano players use hexatonic voicings by stacking the triads to create a particular harmony. Using hexatonic voicings and lines can lend a very contemporary sound.

Whether you're just starting to learn to improvise, or you've been struggling for years to make musical sense of the complex jargon typically associated with jazz education, this book will get you playing great, idiomatic straight-ahead jazz lines over chord changes by teaching you how to target the chord tones of the simple major and minor triads with 1, 2, and 3 note approaches.

Award-winning jazz educator Caleb Chapman and multiple GRAMMY(R) Award-winning saxophonist Jeff Coffin have created a highly effective approach to jazz articulation. Step by step, The Articulate Jazz Musician details Caleb's proven approach for mastering the fundamentals of jazz articulation, phrasing, and interpretation. The play-along tracks are designed for C, B flat, E flat, and bass clef instruments. Rhythm section instruments can use the play-along tracks as a "how to play it" reference. The tracks feature a world-class quartet of Jeff Coffin (tenor saxophone), Victor Wooten (bass), Roy "Futureman" Wooten (drums), and Chris Walters (piano). This method makes approaching jazz articulation easy and fun. Follow the explanations, do lots of listening, play along, practice what you have heard, and before long, you too will be an articulate jazz musician!

All the information needed to become a functional jazz pianist

The most complete method for chromatic improvising over standards! David clearly explains and demonstrates the art of superimposing chords chromatically over "standard" chord changes (using several popular jazz favorites as his vehicles) to play contemporary sounding jazz lines. Includes standard and superimposed harmony for Girl from Ipanema, Donna Lee, Autumn Leaves, Take the A Train, Satin Doll, Rhythm and Blues Changes, Impressions, India, Loft Dance, and A Love Supreme. The CD contains both verbal instruction and David soloing over the standards using the techniques described in the book. The book contains analysis for each solo and the solos on the CD are transcribed for all C, B-flat, and E-flat instruments! "How to Approach Standards Chromatically is a slightly different kind of play-along. It's packed with transcriptions of Libbman solos which are meant to be studied, as much as played, by students. The scope of this book is a bit dizzying: Libbman's approach is to provide the student with twelve songs and superimposition concepts that progress up the dissonant food chain. The material Libbman draws upon for contrasting chromatic colors include upper structure chords, tritone relationships, ii-V substitutes, "Giant Steps" movement, side slipping, moving chord cycles, purely intervallic thinking, and other advanced concepts. To benefit from this book, you do not need to play along with the CD note-for-note. Rather, use Libbman's detailed written notes to help you recognize and analyze the kinds of lines he plays on each of the superimposed progressions; then try to improvise over the progressions in a similar vein. Alto/Bari players and other instrumentalists can also get in on the action, as each solo and progression are transcribed in concert key, B-flat and E-flat." ---Down Beat Magazine

"This book seeks to establish the factors and barriers critical to the adoption of data-exchange standards, and ways to accelerate the adoption of these standards"--Provided by publisher.
