No topic is more central to innovation and current practice in testing and assessment today than computers and the Internet. This timely publication highlights four main themes that define current issues, technical advances and applications of computer-based testing: Advances in computer-based testing -- new test designs, item selection algorithms, exposure control issues and methods, and new tests that capitalize on the power of computer technology. Operational issues -- systems design, test security, and legal and ethical matters. New and improved uses -- for tests in employment and credentialing. The future of computer-based testing -- identifying potential issues, developments, major advances and problems to overcome. Written by internationally recognized contributors, each chapter focuses on issues of control, quality, security and technology. These issues provide the basic structure for the International Test Commission's new Guidelines on Computer-Based Testing and Testing on the Internet. The contributions to this book have played a key role in the development of these guidelines. Computer-Based Testing and the Internet is a comprehensive guide for all professionals, academics and practitioners working in the fields of education, credentialing, personnel testing and organizational assessment. It will also be of value to students developing expertise in these areas. 'This volume addresses a very timely and important topic, and provides both broad and in-depth coverage of a number of large-scale English tests in China, including Hong Kong and Taiwan, and about the Chinese learner.' – Lyle F. Bachman, From the Foreword Building on current theoretical and practical frameworks for English language assessment and testing, this book presents a comprehensive, up-to-date, relevant picture of English language assessment for students in

China (Mainland China, Hong Kong and Taiwan) and for Chinese learners of English around the world. Written by well-recognized international scholars in language testing, it covers: the history of tests and testing systems, issues and challenges, and current research in China both test-designers' and test-users' points of view on test development and test validation within a range of political, economical, social, and financial contexts in China theoretical/conceptual perspectives on the use of the English language assessment at different levels, including societal, university, and schools empirical research related specifically to test development, curricular innovation, and test validation Given the long history of objective testing and its extensive use in Chinese society, and considering the sheer number of students taking various tests in English in China and elsewhere, an understanding of the impact of English language testing is essential for anyone involved in testing and assessment issues in China and elsewhere in the world. This is a must-read volume for testing and assessment policy makers, curriculum designers, researchers, ESL/EFL materials writers, graduate students, and English language teachers/researchers at all levels.

The Iliad and The Odyssey are the earliest works of Western literature and are the wellspring for much of Western culture. The Iliad, beginning "Sing, goddess, the anger of Peleus' son Achilles / and its devastation" describes the devastation unleashed by Achilles's rage, engulfing soldier and civilian, hero and coward, ruler and slave and even women and children. It is a story of heroes of immense pride and animal strength operating in their element. But it is much more than a great war epic. Homer creates complex human characters. A Greek and Trojan pair, Diomedes and Glaucus, meet on the battlefield, but realizing that they have an ancestral connection, they exchange conversation and

armour rather than taunts and blows. King Priam kisses the hands of Achilles, saying "I have endured what no one on earth has endured. I have kissed the hands of the man who killed my son," an act which provokes deep sympathy in Achilles, who in turn returns the body of heroic Hector which he had defiled. The nearly invincible Ajax struggles to choose between heroic glory on the battlefield and the blessing of returning to the beloved land of his fathers. The Iliad is the story of the Trojan War, but much more: it has many tender scenes, it critiques the idea of the hero and it examines the role of the Gods in history. The Odyssey, Homer's epic tale of Odysseus and his ten-year journey home after the Trojan war is a wonderful story that has entranced generations over the last two and a half millennia. The characters and events are well known, and the form - a long journey of discovery and testing - has become a standard device in storytelling. Odysseus is known as "polytropos," a man of many twists and turns and tricks, a man who lives by his wits. As the Greeks leave for Troy, it is Odysseus' cleverness that allows him to find the hero Achilles who is crucial to their victory. Then, after ten years camped outside Troy and the loss of countless lives on both sides, he brings the Trojan war to a dramatic conclusion with the now famous Trojan horse. One expects Odysseus' story to end with his returning home as a hero. Instead, Homer and the fates send him on another ten years of travels. This is the story of The Odyssey is not just about Odysseus' adventures on the way home, it is also about faithful marital love, and the love of home and country. Aristotle says that while The Iliad is about events, The Odyssey is about character. The word "odyssey" has entered the English language, and many regard The Odyssey as the world's most enduring narrative. Homer was called "the teacher of all Greece," and "the leader of Greek culture," by Plato. Indeed, in the classical age, the Greeks regarded the Iliad and Odyssey as much more than works of literature; they knew much of them by heart, and they valued them as symbols of Hellenic unity and heroism but also as sources of moral and even practical instruction. Homer's works have been studied, quoted and translated in every corner of Europe and his influence on the Western imagination is immense. This prose edition was translated by Samuel Butler, the iconoclastic English author of the Utopian satirical novel Erewhon and the semi-autobiographical novel The Way of All Flesh. The latter was published posthumously as he was afraid to publish it in his lifetime.

This publication highlights the need for test developers to provide clear explanations of the ability constructs which underpin tests offered in the public domain. An explanation is increasingly required or if the validity of test score interpretation and use are to be supported both logically and with empirical evidence. The book demonstrates the application of a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components which reflect the practical nature and quality of an actual testing event. It examines

Cambridge ESOL writing tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.

A fresh, new edition of the classroom-proven listening skills favourite.

"These Practice Materials are intended to give IELTS candidates an idea of what the test is like. They also give candidates the opportunity to test themselves to see whether their English is at the level required to take IELTS. These practice materials are approved by the British Council, Cambridge ESOL and IDP: IELTS Australia" -- Introd.

This volume describes how ESOL tests and test users have changed greatly in the past few decades. Some widely used ESOL tests have been revised, with a number of new tests incorporating advances in computer technology. In addition, many more ESOL practitioners than in the past are responsible for selecting and using tests. Stephen Stoyhoff and Carol A. Chapelle introduce teachers and administrators to the principles, methods, and vocabulary of language assessment. Twenty-one reviewers of ESOL tests consider test purpose, methods, and justification of their use in particular situations.

"One of the great adventures of our time." —Life "Am going to cross Pacific on a wooden raft to support a theory that the South Sea islands were peopled from Peru. Will you come? . . . Reply at once." That is how six brave and inquisitive men came to seek a dangerous path to test a scientific theory. On a primitive raft made of forty-foot balsa logs and named "Kon-Tiki" in honor of a legendary sun king, Thor Heyerdahl and five companions deliberately risked their lives to show that the ancient Peruvians could have made the 4,300-mile voyage to the Polynesian islands on a similar craft. For three months, the bold young men made their way across the pacific at the complete mercy of the ocean. They encountered storms that threatened to tear their raft apart, whales large enough to sink them in the blink of an eye, and sharks ready to feast on any man unfortunate enough to fall overboard. In the true spirit of adventure, they held on until finally making landfall on a remote Polynesian island, proving Heyerdahl's theory possible after all. On every page of this true chronicle—from the actual building of the raft through all the dangerous and comic adventures on the sea, to the spectacular crash landing and the native islanders' hula dances—each reader will find a wholesome and spellbinding escape from the twenty-first century.

A critical examination of the ways in which English is conceptualised for learning, teaching, and assessment in a range of domains, from both social and cognitive perspectives. Researchers and postgraduates working on English in L1 and L2

educational contexts will find it valuable for research and collaboration.

Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the judgments of one hundred teachers on the English language proficiency of the learners in their classes.

Not many would dare to take challenging decisions in life when life itself is full of uncertainties and confusions. But I had to; may be because of my birth as the eldest daughter to a typical Indian middle class family which was surmounted by a variety of problems and the responsibilities attached therewith. But the Way I tread never deceived me, rather I was led to a glorious place called the Parliament of India about which I have never dreamt of. The Way is the inspiring account of my life which vividly portrays the struggles I had to face to reach this place from a humble beginning. Though circumstances were not in my favour, faith in God and willingness to move on with optimism helped me to achieve success in life. Jesus had been my counselor during the difficult period of life and set my Way because He Himself is the Way. My life is a wakeup call for the readers to move on in life in spite of various unfavorable situations and to assure that all the sorrows and uncertainties will be transformed into joy and peace soon.

Language typology is concerned with the construction of theoretical frameworks capable of delimiting the range of human languages and of capturing constraints on cross-linguistic variation. This text offers accounts of the theoretical foundations and

findings of leading scholars in this field.

This book is designed for anyone taking the British Council's Aptis Advanced test. It is intended equally for teachers, students in class and those studying alone. There is advice for the exam in general and for each section covered in the book. There are more than ninety exercises to help candidates prepare for the exam. The questions follow, in content and format, those used in the actual exam. The book also includes a useful section with phrases and words for the speaking and writing tasks. All skills except for listening are covered: grammar and vocabulary, reading, writing and speaking. With answer key. This edition incorporates some corrections to the Answers section of the August 2020 edition.

The Council of Europe released a preliminary version of the Manual for Relating Language Examinations to the Common European Framework of Reference for Languages (CEFR) in 2003. Over the next 5 years a wide range of institutions and individuals undertook case studies to pilot this draft version. Towards the close of the piloting phase, a two-day colloquium was held in Cambridge, UK enabling practitioners and academics to reflect on and share their experiences of applying the Manual procedures. Insights from this colloquium informed the Manual revision project during 2008/2009. This volume features selected case studies presented at the Cambridge Colloquium in December 2007. They include the linking of a single test to the CEFR, the CEFR-linking of suites of examinations at different levels and large scale national projects undertaken by examination boards and specialist research institutes. Some studies focus on part of an examination, while others involve all test components. Some apply one or two of the procedures - familiarisation, specification, standardisation, and empirical validation. As well as describing their studies and reporting their findings, contributors reflect and comment on their experience of using the draft Manual. A clear and comprehensive introductory chapter explains the development of the CEFR and the draft Manual for linking tests, and discusses its relevance for the future. The volume will be of interest to examination boards, language test developers and educational policy-makers, as well as academic lecturers, researchers and graduate students interested in the principles and practice of aligning tests to the CEFR.

The field of language testing and assessment has recognized the importance and underlying theoretical and practical underpinnings of language assessment literacy (LAL), an area that is gradually coming to prominence. This book addresses issues that promote the concept of LAL for language research, teaching, and learning, covering a range of topics. It brings together 14 chapters based on high-stakes and classroom-based studies authored by academics, professionals and researchers in the field. The text examines diverse issues through a multifaceted approach, presenting high-quality contributions that fill a gap in a research area that has long been in need of theoretical and empirical attention.

This is the overprinted teachers edition of the title of the same name. Combines systematic training in exam techniques and thorough development of advanced level language skills.

Compact Preliminary for Schools is a focused, 50 - 60 hour course for Cambridge English: Preliminary for Schools, also known as Preliminary English Test (PET). The Student's Book features eight topic based units with focused exam preparation to maximise the performance of school-age learners. Units are divided in the order of the exam with pages on Reading, Writing, Listening and Speaking. A Grammar

reference covers key areas in the syllabus and unit based wordlists include target vocabulary with definitions. The Student's Book also features a revision section and full practice test. The accompanying CD-ROM provides interactive grammar, vocabulary and exam skills tasks including listening. Course users also have exclusive access to a further practice test with audio via a URL in the Student's Book. This book advocates that teachers should play an active role in high-stakes language testing and that more weight should be given to teacher judgement. This is likely to increase the formative potential of high-stakes tests and provide teachers with a sense of ownership. The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices. The book also considers the arguments against teacher involvement, e.g. the contention that teacher involvement might entrench the practice of teaching to the test, or that teachers should not be actively involved in high-stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts, the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high-stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover, teacher involvement empowers them to play a role in reforming high-stakes language testing so that it is more equitable and more likely to enhance classroom practices. High-stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers, which ultimately benefits all their students.
