The General Aptitude and Abilities Series provides functional, intensive test practice and drill in the basic skills and areas common to many civil service, general aptitude or achievement examinations necessary for entrance into schools or occupations.

"Poor test preparation and lack of test-wiseness results in test scores that do not accurately reflect the students' knowledge and aptitude." (Scruggs and Mastropieri, 2000) The IAAT is a timed test consisting of 60 items divided evenly into four subtests. The time limit of each subtest is 10 minutes. The four subtests are: Pre-Algebraic Number Skills and Concepts. This subtest measures student's computational skills, understanding of mathematical concepts, and the ability to solve mathematics problems. Using Symbols. This section measures how well students understand some of the important symbols of algebra. Representing Relationships. For each of the exercises in this part of the test, the student must find the rule that represents the given numerical relationship. Some of the items present the relationship in table form while others present the relationship in verbal form. Interpreting Mathematical Information. The items on this part are based upon information presented in graphs or upon definitions of mathematical terms or operations. The items assess how well a student can learn new material presented in graphs or text. For diagnostic tests, private tutoring and IAAT Prep
