The gripping, unforgettable, and deeply affecting story of a young clinical psychologist learning how she can best help her patients, *The Skeleton Cupboard* is a riveting and revealing memoir that offers fascinating insight into the human mind. In *The Skeleton Cupboard*, Professor Tanya Byron recounts the stories of the patients who most influenced her career as a mental health practitioner. Spanning her years of training—years in which Byron was forced her to contend with the harsh realities of the lives of her patients and confront a dark moment in her own family's past—*The Skeleton Cupboard* is a compelling and compassionate account of how much health practitioners can learn from those they treat. Among others, we meet Ray, a violent sociopath desperate to be shown tenderness and compassion; Mollie, a talented teenager intent on starving herself; and Imogen, a twelve-year old so haunted by a secret that she's intent on killing herself. Byron brings the reader along as she uncovers the reasons each of these individuals behave the way they do, resulting in a thrilling, compulsively readable psychological mystery that sheds light on mental illness and what its treatment tells us about ourselves.

The Extending Knowledge and Skills series is a fresh approach to A Level Psychology, designed for greater demands of the new AQA specification and assessment, and especially written to stretch and challenge students aiming for higher grades. Dealing with the AQA's Paper 3: Forensic Psychology, this book is deliberately laid out with the assessment objectives in mind, from AO1: Knowledge and understanding material, followed by AO2: Application material, to AO3: Evaluation and analysis material. Providing the most in-depth, accessible coverage available of individual topics in Paper 3, the text is packed full of pedagogical features, including: Question Time features to ensure that the reader is consistently challenged throughout the book. New research sections clearly distinguished within each chapter to ensure readers have access to the most cutting-edge material. A clear focus on the assessment objectives for the Paper topic to

ensure readers know when and where to apply knowledge. The use of example answers with examiner style comments to provide greater insight into how to/how not to answer exam questions. An engaging, relevant and challenging text which broadens student understanding beyond that of the average textbook, this is the essential companion for any student taking the AQA A Level Paper 3 in Psychology.

This book provides simple, clear, in-depth explanations of all the topics in the AQA GCSE specification 4180 syllabus but it will prove invaluable to students at many levels on many courses and to the independent reader. It can be used as a stand-alone home study course, as a classroom text, as a reference text or just for pleasure for those who love to think about what makes people tick. Psychology describes up-to-date research as well as some classic psychology studies and even debunks one or two psychology research myths. It leads the reader through all the topics in the syllabus as a teacher would in a classroom setting. Topics are presented as a series of lessons followed by Check Your Understanding sections, which are designed to help you check and retain the information in each lesson. An assessment record provided at the end of the book will help you keep track of your progress. Lessons are interactive with many opportunities to jot down your thoughts and reactions, reflect on how a topic relates to your own experience, discuss with other people and become more involved with the material presented. Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book. For those studying outside formal classrooms there are guidelines about how best to approach your studies. The book assumes that readers have no previous knowledge of psychology and among the topics covered are: - Conformity and Obedience - would you press a button to kill someone just because you are told to do so? Many people would, it seems. - Sex and Gender - do girls and boys, men and women behave so differently? If so, why? - Memory - how does memory work and how accurate is it? - Non-Verbal Communication - do we reveal our true feelings in our body language? - Development of Personality - what exactly is Anti-Social Personality Disorder? - Prejudice and Discrimination - are we bound to discriminate against people who are unlike us? - Learning - how to remove your fear of spiders/snakes/flying/open spaces or anything else using the principles of learning. - Aggression - is aggression born into us? Is it in our hormones? Or do we learn to fight? - Research Methods and the Ethics of Psychology - psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies? Exam Board: Edexcel Level: GCSE 9-1 Subject: Physical Education First Teaching: September 2016, First Exams: June 2018 Suitable for the 2020 autumn and 2021 summer exams

Hugely influential study of the psychology of authoritarianism What makes a fascist? Are there character traits that make someone more likely to vote for the far right? The Authoritarian Personality is not only one of the most significant works of social psychology ever written, it also marks a milestone in the development of Adorno's thought, showing him grappling with the problem of fascism and the reasons for Europe's turn to reaction. Over half a century later and with the rise of right-wing populism and the reemergence of the far-right in recent years, this hugely influential study remains as insightful and relevant as ever. This new edition includes an introduction by Frankfurt School scholar Peter E. Gordon and contains the first-ever publication of Adorno's subsequent critical notes on the project.
