

## Aqa Psychology Gcse Psychology

Exam Board: Edexcel Level: GCSE 9-1 Subject: Physical Education First Teaching: September 2016, First Exams: June 2018 Suitable for the 2020 autumn and 2021 summer exams

Teaching Psychology 14-19 - first published as Teaching Post-16 Psychology - is a core text for all training psychology teachers, as well as experienced teachers engaged in further study and professional development. Taking a reflective approach, Matt Jarvis explores key issues and debates against a backdrop of research and theory, and provides guidance on practical ideas intended to make life in the psychology classroom easier. With an emphasis on the application of psychology to teaching psychology, it clearly and comprehensively covers the knowledge essential to develop as a successful teacher. Key issues considered include: The appeal of psychology and what the subject can offer students The psychology curriculum and advice on how to choose a syllabus Principles of effective teaching and learning Teaching psychological thinking Differentiated psychology teaching Choosing and developing resources Using technology effectively. With a new chapter exploring the role of practical work in the post-coursework era, this second edition considers psychology teaching across the 14-19 age range and has been updated in light of the latest research, policy and practice in the field. Teaching Psychology 14-19 is an essential text for all those engaged in enhancing their understanding of teaching psychology in the secondary school.

This text aims to provide a clear introduction to the work and ideas of psychologists. It covers topics such as attachment, memory, anti-social behaviour, gender and prejudice and considers how they relate to contemporary society. The material is presented in a fresh, straightforward style with particular appeal to those new to psychology.

Bringing together the findings of psychoanalysis and social science, this book grew out of an urgent commitment to study the origins of anti-Semitism in the aftermath of Hitler's Germany. First published in 1951, it was greeted as a monumental study blazing new trails in the investigation of prejudice. As offshoots of ethnocentrism, anti-semitism and fascism cast new and dark shadows on the world, the topic again demands study and social action. The Authoritarian Personality remains an important document for our time.

AQA GCSE Psychology is the only resource to have been developed with and exclusively endorsed by AQA for AQA's new 2009 specification. With a real focus on tracking individual progress, you can improve your students a chance of exam success.

Help students to build their subject knowledge and understanding with activities, guidance and assessment preparation tailored to the 2017 OCR requirements and brought to you by subject specialist and OCR's Publishing Partner for GCSE Psychology. - Prepare students for assessment with skills-building activities and

practice questions developed for the new specification. - Progressively develop students' subject knowledge through accessible diagrams and key content summaries that aid understanding and help weaker students access the main points. - Build conceptual understanding and critical thinking skills with a wealth of targeted activities. - Extend learning and enhance responses with extension questions, stimulus material and suggestions for further reading. - Consolidate understanding of technical vocabulary and core concepts through accessible explanations of key terms. Contents Introduction 1. Criminal Psychology 2. Development 3. Psychological problems 4. Social influence 5. Memory 6. Sleep and Dreaming 7. Research Methods Answers

Intended for achieving examination success, this series replaces the former GCSE Study Guides. This book which are part of the new Revise GCSE series offers complete study and reference support for the Psychology GCSE course as well as being a revision guide for the Psychology GCSE examinations and Scottish Standard Grade. It provides a breakdown of the syllabuses and exam structure for every exam board, advice on studying, revising, coursework and exams, topic-by-topic coverage, clearly presented with many examples and diagrams, quick tests for every topic to check progress, and a bank of recent GCSE exam questions with answers to fine-tune exam techniques.

The Extending Knowledge and Skills series is a fresh approach to A Level Psychology, designed for greater demands of the new AQA specification and assessment, and especially written to stretch and challenge students aiming for higher grades. Dealing with the top of AQA's Paper 3: Relationships, this book is deliberately laid out with the assessment objectives in mind, from AO1: Knowledge and Understanding material, followed by AO2: Application material, to AO3: Evaluation and analysis material. Providing the most in-depth, accessible coverage available of individual topics in Paper 3, the text is packed full of pedagogical features, including: Question Time features to ensure that the reader is consistently challenged throughout the book. New research sections clearly distinct within each chapter to ensure readers have access to the most cutting-edge material. A clear focus on the assessment objectives for the paper topic to ensure readers know when and where to apply knowledge. The use of example answers with examiner-style comments to provide greater insight into how to/how not to answer exam questions. An engaging, relevant and challenging text which broadens student understanding beyond that of the average textbook, this is the essential companion for any student taking the AQA A Level Paper 3 in Psychology.

Written by experienced senior examiners and authors, this new edition of the UK's bestselling AQA GCSE Psychology Student Book has been completely updated for the 2017 specification. With essential information for all key studies and a strong focus on exam skills, this book is packed with activities, practical ideas and revision summaries.

This book provides simple, clear, in-depth explanations of all the topics in the AQA GCSE specification 4180 syllabus but it will prove invaluable to students at many levels on many courses and to the independent reader. It can be used as a stand-alone home study course, as a classroom text, as a reference text or just for pleasure for those who love to think about what makes people tick. Psychology describes up-to-date research as well as some classic psychology studies and even debunks one or two psychology research myths. It leads the reader through all the topics in the syllabus as a teacher would in a classroom setting. Topics are presented as a series of lessons followed by Check Your Understanding sections, which are designed to help you check and retain the information in each lesson. An assessment

record provided at the end of the book will help you keep track of your progress. Lessons are interactive with many opportunities to jot down your thoughts and reactions, reflect on how a topic relates to your own experience, discuss with other people and become more involved with the material presented. Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book. For those studying outside formal classrooms there are guidelines about how best to approach your studies. The book assumes that readers have no previous knowledge of psychology and among the topics covered are: - Conformity and Obedience - would you press a button to kill someone just because you are told to do so? Many people would, it seems. - Sex and Gender - do girls and boys, men and women behave so differently? If so, why? - Memory - how does memory work and how accurate is it? - Non-Verbal Communication - do we reveal our true feelings in our body language? - Development of Personality - what exactly is Anti-Social Personality Disorder? - Prejudice and Discrimination - are we bound to discriminate against people who are unlike us? - Learning - how to remove your fear of spiders/snakes/flying/open spaces or anything else using the principles of learning. - Aggression - is aggression born into us? Is it in our hormones? Or do we learn to fight? - Research Methods and the Ethics of Psychology - psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies?

Written by two experienced psychology teachers and examiners, this textbook provides thorough coverage of both the AQA and OCR GCSE Psychology specifications. The user-friendly layout clearly identifies which sections are pertinent to each specification. The book is produced in attractive full colour with plenty of photographs, pictures and cartoons, and provides a variety of student-friendly features, including: A list of the AQA and/or OCR specification requirements for each topic An everyday-life case study to introduce each chapter Numerous classroom activities Key terms highlighted and defined throughout the text Aims and Learning Outcomes, which highlight the general themes and processes (including why psychology matters, how psychology works, everyday life, ethical issues, diversity, critical thinking and methodology) Research studies with evaluations Clear and concise chapter summaries Exam hints and tips Exam-style questions. This new edition is accompanied by a set of online multimedia resources, including powerpoint lecture courses and multiple-choice questions tests, available free-of-charge to schools who adopt this book as their text.

Equip your students with the knowledge and skills to study for AQA A-level Psychology with clear, comprehensive coverage, guidance on assessment objectives and updated practice questions that consolidate understanding, develop evaluative skills and ensure progression. This all-in-one textbook covers the Year 1 and Year 2 specifications. - Engage your students through extensive real-life contemporary research, including evaluation points at the end of each research section to develop their analytical skills. - Test knowledge and support exam preparation with updated practice questions, based on past assessments. - Ensure progression and encourage independent thinking with extension suggestions and activities. - Help your students understand the assessment objectives and develop their examination skills with assessment guidance throughout. - Ensure students learn and understand content for all the key topics with the clear, accessible style, written by Jean-Marc Lawton and Eleanor Willard. Please note: The following topics will not be included in the printed book but will be available to download online as part of your purchase: addiction, cognition and development, eating behaviour.

This is a comprehensive student revision guide for those taking the GCSE AQA Psychology exam. It summarises the specification material clearly and attractively, enabling students to easily digest and retain the information. Packed full of revision tips and techniques, the book includes a number of unique and helpful features: Overviews of the AQA specification content Summaries of the major research studies Practical and innovative suggestions for revision

techniques at the end of each chapter Example exam questions and model answers A separate chapter dedicated to preparing for the exam, giving practical advice on getting organised, techniques for maximising revision time, and advice on structuring exam time appropriately for optimum performance A comprehensive glossary of important terms and their definitions, to aid understanding of the material. Revise Psychology for GCSE Level gives excellent guidance, not only on how to pass the exam, but also on how to avoid the panic and pitfalls that so many students face at exam time. Although a companion to the bestselling Psychology for GCSE Level, 2nd edition by Dwyer and Roberts, this revision guide can be used alongside any GCSE psychology textbook.

GCSE Psychology Letts & Lonsdale

Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book. For those studying outside formal classrooms there are guidelines about how best to approach your studies. The book assumes that readers have no previous knowledge of psychology and among the topics covered are:

- á Conformity and Obedience - would you press a button to kill someone just because you are told to do so? Many people would, it seems.
- á Sex and Gender - do girls and boys, men and women behave so differently? If so, why?
- á Memory - how does memory work and how accurate is it?
- á Non-Verbal Communication - do we reveal our true feelings in our body language?
- á Development of Personality - what exactly is Anti-Social Personality Disorder?
- á Prejudice and Discrimination - are we bound to discriminate against people who are unlike us?
- á Learning - how to remove your fear of spiders/snakes/flying/open spaces or anything else using the principles of learning.
- á Aggression - is aggression born into us? Is it in our hormones? Or do we learn to fight?
- á Research Methods and the Ethics of Psychology - psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies? How do we know right from wrong, good from bad, help from hindrance, and how can we judge the behaviour of others? Ethics are the rules and guidelines that we use to make such judgements. Often there are no clear answers, which make this subject both interesting and potentially frustrating. In this book, the authors offer readers the opportunity to develop and express their own opinions in relation to ethics in psychology. There are many psychological studies that appear to have been harmful or cruel to the people or animals that took part in them. For example, memory researchers carried out studies on a man who had no memory for over forty years, but because he had no memory he was never able to agree to the studies. Is this a reasonable thing to do to someone? Comparative psychologist Harry Harlow found that he could create severe and lasting distress in monkeys by keeping them in social isolation. Is this a reasonable thing to do even if we find out useful things about human distress? If you were able to use psychological techniques to break someone down so that they revealed information that was useful to your government, would you do it? If so, why? If not, why not? These ethical issues are not easy to resolve and the debates continue as we encounter new dilemmas. This book uses examples from psychological research to look at: key ethical issues ethical guidelines of psychologists socially sensitive research ethics in applied psychology the use of animals in research This book is essential reading for undergraduate and pre-undergraduate students of psychology and related subjects such as philosophy and social policy.

Exam Board: AQA Level: AS/A-level Subject: Psychology First Teaching: September 2015 First Exam: June 2016 AQA Approved Equip your students with the knowledge and the skills that they need for the new AQA Psychology AS and A-level; guidance on
