Indo-European Poetry and Myth M. L. West, 2008-11-13 The Indo-Europeans, speakers of the prehistoric parent language from which most European and some Asiatic languages are descended, most probably lived on the Eurasian steppes some five or six thousand years ago. Martin West investigates their traditional mythologies, religions, and poetries, and points to elements of common heritage. In *The East Face of Helicon* (1997), West showed the extent to which Homeric and other early Greek poetry was influenced by Near Eastern traditions, mainly non-Indo-European. His new book presents a foil to that work by identifying elements of more ancient, Indo-European heritage in the Greek material. Topics covered include the status of poets and poetry in Indo-European societies; metre, style, and diction; gods and other supernatural beings, from Father Sky and Mother Earth to the Sun-god and his beautiful daughter, the Thunder-god and other elemental deities, and earthly orders such as Nymphs and Elves; the forms of hymns, prayers, and incantations; conceptions about the world, its origin, mankind, death, and fate; the ideology of fame and of immortalization through poetry; the typology of the king and the hero; the hero as warrior, and the conventions of battle narrative.

Contemporary Approaches to Public Policy B. Guy Peters, Philippe Zittoun, 2016-05-25 This book considers a range of contemporary approaches to public policy studies. These approaches are based on a number of theoretical perspectives on decision-making, as well as alternative perspectives on policy instruments and implementation. The range of approaches covered in the volume includes punctuated equilibrium models, the advocacy-coalition framework, multiple streams approaches, institutional analyses, constructivist approaches, behavioural models, and the use of instruments as an approach to public policy. The volume concludes with a discussion of fundamental issues of democracy in public policy.

Ideas and Forms of Tragedy from Aristotle to the Middle Ages Henry Ansgar Kelly, 1993-05-13 H.A. Kelly explores meanings given to tragedy, from Aristotle's most basic notion (any serious story, even with a happy ending), via Roman ideas and practices, to the Middle Ages, when Averroes considered tragedy to be the praise of virtue, but Albert the

Medieval Law and the Foundations of the State Alan Harding, 2002 In this broad-ranging new study, Alan Harding challenges the orthodoxy that there was no state in the Middle Ages, arguing instead that it was precisely then that the

concept acquired its force.

The Oxford Handbook of Roman Law and Society Paul J du Plessis, Clifford Ando, Kaius Tuori, 2016-09-29 The Oxford Handbook of Roman Law and Society surveys the landscape of contemporary research and charts principal directions of future inquiry. More than a history of doctrine or an account of jurisprudence, the Handbook brings to bear upon Roman legal study the full range of intellectual resources of contemporary legal history, from comparison to popular constitutionalism, from international private law to law and society, thereby setting itself apart from other volumes as a unique contribution to scholarship on its subject. The Handbook brings the study of Roman law into closer alignment and dialogue with historical, sociological, and anthropological research into law in other periods. It will therefore be of value not only to ancient historians and legal historians already focused on the ancient world, but to historians of all periods interested in law and its complex and multifaceted relationship to society.

Lina Bo Bardi Cathrine Veikos, 2014 The architect, Lina Bo Bardi (1914-1992), has long been considered one of the major modern architects of the twentieth century in Brazil. The Glass House (1951), a residence for herself and her husband, gained wide acclaim, appearing in architectural periodicals throughout 1953-54. Her iconic Museum of Art of São Paulo (1968), and the bold, Social Service for Commerce Building-Pompêia, São Paulo (1986), have gained recognition in recent years and her reputation is beginning to be acknowledged internationally. Bo Bardi's major writings on architecture, however, have not been translated, and are not well known. This book contains the first English-language translation of Propeadeutic Contribution to the Teaching of Architecture Theory, (Habitat, Ltd. São Paulo, 1957), a seminal text, published in Portuguese by the Italo-Brazilian Bo Bardi. It is arguably the first published writing on architecture theory by a practicing woman architect. Accompanying the translation is an introductory essay that interprets Bo Bardi's text as a critical and constructive theory of architecture built from a collection of textual and visual artifacts. This translation clearly renders Bo Bardi's work in English, and contextualizes it theoretically, taking into account the specific historical sources and contemporaneous discourses from which it draws. With comparisons to other important architectural pedagogies and theoretical texts of the period, it is also an inquiry into the nature of architecture history and theory, its role in education and its relation to practice--

Lina Bo Bardi José Esparza Chong Cuy, 2020-03-13 From furniture and exhibition design to monumental domestic and public architectural projects, the breadth of Lina Bo Bardi's multidisciplinary work is showcased in this richly illustrated book. Lina Bo Bardi is regarded as one of the most important architects in Brazil's history. Beginning her career as a Modernist architect in Rome, Bo Bardi and her husband emigrated to Brazil following the end of WWII. Bo Bardi quickly resumed her practice in her adopted homeland with architecture that was both modern and firmly rooted in the culture of

Brazil. In 1951 she designed Casa de Vidro (Glass House), her first built work, where she and her husband would live for the rest of their lives. She also designed the Museu de Arte de São Paulo (São Paulo Art Museum), a landmark of Latin American modernist architecture which opened in 1968. It was for this museum she created the iconic glass easel display system, which remains radical to date. This book presents a comprehensive record of Bo Bardi's overarching approach to art and architecture and shows how her exhibition designs, curatorial projects, and writing informed her spatial designs. Essays on Bo Bardi's life and work accompany archival material such as design sketches and writings by the artist, giving new insight into the conceptual and material processes behind this radical thinker and creator's projects. Interconnection and the Internet Gregory L. Rosston, David Waterman, 2013-11-26 The Telecommunications Act of 1996 and the Federal Communications Commission's Local Competition Order are just two examples of the continuing monumental and far-reaching changes occurring throughout the telecommunications industry. At the 1996 Telecommunications Policy Research Conference (TPRC) -- an annual forum for dialogue among scholars and the policymaking community on a wide range of telecommunications issues -- leading industry and academic researchers presented results of their research and insights in key areas of activity, including: *interconnection and competition; *Internet growth and commerce; *Internet regulation and control; and *the political economy of telecommunications regulation. The best of the 1996 TPRC papers are included here, representing the forefront of research in the telecommunications industry. The third in an annual LEA series of volumes based on this important conference, this collection reflects the rapid economic, technological, and social development of telecommunications. It also reflects the current state of research thinking on this issue and provides a foundation for further telecommunications policy analysis.

Domestic Colonies Barbara Arneil, 2017 Modern colonization is generally defined as a process by which a state settles and dominates a foreign land and people. This book argues that through the nineteenth and into the first half of the twentieth centuries, thousands of domestic colonies were proposed and/or created by governments and civil society organizations for fellow citizens as opposed to foreigners and within their own borders rather than overseas. Such colonies sought to solve every social problem arising within industrializing and urbanizing states. *Domestic Colonies* argues that colonization ought to be seen during this period as a domestic policy designed to solve social problems at home as well as foreign policy designed to expand imperial power. Three kind of domestic colonies are analysed in this book: labour colonies for the idle poor, farm colonies for the mentally ill and disabled, and utopian colonies for racial, religious, and political minorities. All of them were justified by an ideology of colonialism that argued if people were segregated in colonies located on empty land and engaged in agrarian labour, this would improve both the people and the land. Key domestic colonialists analysed in this book include

Alexis de Tocqueville, Abraham Lincoln, Peter Kropotkin, Robert Owen, and Booker T. Washington. The turn inward to colony thus requires us to rethink the meaning and scope of colonization and colonialism in modern political theory and practice.

The First Oration Against C. Verres Marcus Tullius Cicero, 2023-07-18 The First Oration Against C Verres is a classic work of Roman oratory by the famous statesman and philosopher Marcus Tullius Cicero. The speech was delivered in 70 BCE in defense of the Sicilian people against the corrupt practices of the governor Verres. The speech is a masterpiece of rhetorical persuasion and a scathing indictment of Verres' crimes. The book provides a fascinating glimpse into the politics, law, and culture of ancient Rome. How to Read Greek Vases Metropolitan Museum of Art (New York, N.Y.), Joan R. Mertens, 2010 This handsomely illustrated volume is aimed at giving a broad audience deeper insight into the extensive collection of the Metropolitan Museum of Art. The museum is famed for its Greek vases, of which 35 notable examples are detailed in this book. They reveal the variety and vitality of the refined forms and masterfully rendered scenes that characterize these works. And they demonstrate the interrelation of function, shape, technique, and subject matter that is key to understanding the rich language of Greek vases. The introduction provides valuable background information, and the entries delve into the features of each vase, incorporating brilliant color illustrations and many arresting details. Greek vases served specific utilitarian functions, and they also afforded outstanding artists, some of whom signed their work, a medium for depicting both the details of daily existence and aspects of their gods, goddesses, and heroes. We see the garments, implements, athletic competitions, and marriages and funerary rituals of Greeks who lived from the seventh through the fourth century B.C.. We also see their mythological figures and stories. The exceptional group of works assembled in this volume conveys the extent to which the culture of ancient Greece is still apparent today. This book is sure to inspire closer scrutiny of these remarkable works of art, which have survived for over two millennia to offer viewers an enlightening look into the ancient heritage of the Western world. -- from inside Front Cover.

From Columbus to Castro Eric Williams, 1983 The first of its kind, From Columbus to Castro is a definitive work about a profoundly important but neglected and misrepresented area of the world. Quite simply it's about millions of people scattered across an arc of islands -- Jamaica, Haiti, Barbados, Antigua, Martinique, Trinidad, among others -- separated by the languages and cultures of their colonizers, but joined together, nevertheless, by a common heritage.

The Book Trade in the Italian Renaissance Angela Nuovo, 2013-06-17 This work offers the first English-language survey of the book industry in Renaissance Italy. Whereas traditional accounts of the book in the Renaissance celebrate authors and literary achievement, this study examines the nuts and bolts of a rapidly expanding trade that built on existing economic practices while developing new mechanisms in response to political and religious realities. Approaching the book trade from the perspective of its publishers and booksellers, this archive-based account ranges across family ambitions and warehouse fires to publishers' petitions and convivial bookshop conversation. In the process it constructs a nuanced picture of trading networks, production, and the distribution and sale of printed books, a profitable but capricious commodity. Originally published in Italian as *Il commercio librario nell'Italia del Rinascimento* (Milan: Franco Angeli, 1998; second, revised ed., 2003), this present English translation has not only been updated but has also been deeply revised and augmented.

Scholarship, Commerce, Religion Ian Maclean, 2012-03-20 A decade ago in the *Times Literary Supplement*, Roderick Conway Morris claimed that “almost everything that was going to happen in book publishing—from pocket books, instant books and pirated books, to the concept of author’s copyright, company mergers, and remainders—occurred during the early days of printing.” Ian Maclean’s colorful survey of the flourishing learned book trade of the late Renaissance brings this assertion to life. The story he tells covers most of Europe, with Frankfurt and its Fair as the hub of intellectual exchanges among scholars and of commercial dealings among publishers. The three major religious confessions jostled for position there, and this rivalry affected nearly all aspects of learning. Few scholars were exempt from religious or financial pressures. Maclean’s chosen example is the literary agent and representative of international Calvinism, Melchior Goldast von Haiminsfeld, whose activities included opportunistic involvement in the political disputes of the day. Maclean surveys the predicament of underfunded authors, the activities of greedy publishing entrepreneurs, the fitful interventions of regimes of censorship and licensing, and the struggles faced by sellers and buyers to achieve their ends in an increasingly overheated market. The story ends with an account of the dramatic decline of the scholarly book trade in the 1620s, and the connivance of humanist scholars in the values of the commercial world through which they aspired to international recognition. Their fate invites comparison with today’s writers of learned books, as they too come to terms with new technologies and changing academic environments.

The Nearly Man J. S Nearey, 2015-03 At eleven years old a young boy is told that God has chosen him to become a Catholic missionary monk and priest; the choice is not his to make. He joins the Redemptorist Order and spends the next 11 years being schooled in the way he is expected to live for the rest of his life. He must leave his family to lead a secluded monastic life, making no close friendships and taking vows of poverty, chastity and obedience. When doubts arise in his mind he strives to overcome them, studying all the harder, but eventually he realises that he is not happy in the only life he knows.

When he spends time in hospital and falls in love his thoughts crystallise. Only then is he able to make his final decision about the life he wants to live. This autobiographical work brings Stephen's story to life and its moving narrative comes to a truly emotional conclusion.
