Nature has been Robert Bateman's inspiration ever since he began painting birds from his bedroom window as a young boy. The wildlife he features in his paintings are expressions of his love and respect for the natural world. A passionate environmentalist who has devoted his life to documenting the awesome power of nature, Bateman is deeply worried about the state of our planet and the fate of our natural heritage. Whenever he talks about his paintings, he talks about the environmental messages they convey, and those who have heard him speak have clamoured for a book that encapsulates his philosophy. Thinking Like a Mountain is the result of many years of thinking, talking and writing about the world's growing environmental crisis. Beautifully designed and illustrated with original drawings, it is a gathering of questions, observations and ideas Robert Bateman has drawn from his own life experiences and gleaned from the writings of some of the visionaries who have influenced him. As Einstein said, "We cannot solve the problems of today with the same thinking that gave us the problems in the first place." Only a profound shift in philosophy, Bateman believes, can save our species from extinction. Thinking Like a Mountain is printed on 100 per cent ancient-forest-free paper that is 100 per cent post-consumer recycled and has been processed chlorine free.

Excerpt from A New Dictionary of Americanisms: Being a Glossary of Words Supposed to Be Peculiar to the United States and the Dominion of Canada A very dull man, and a pertinacious reader - the terms are by no means incompatible - is said to have had Johnson's Dictionary lent to him by some mischievous friend as an interesting new work, and to have read it through from beginning to end, quite unconscious that he was doing anything unusual. He observed, when he returned it, that the author appeared to him a person of considerable information, but that his style was slightly unconnected. The remark had a good deal of truth in it, for a dictionary is not bad reading on the whole. It is much more enduring than a good many of what are called lighter books, and not much more unconnected. What is an Americanism? In a good many instances the name is given to some archaism belated, or some English provincialism that has worked its way into general acceptance in the United States. It is usual to object, when expressions of either kind are classed by some one as Americanisms, that they are nothing of the kind, which, though in strictness true enough, is a little unpractical; for surely, when words that have become obsolete in the mother country, or are merely "local" here and there, find themselves in wide or universal popularity in America, it is indeed convenient to class them as what they have practically become - Americanisms. Such words, for instance, as shyster, meeching, etc., are for all practical purposes Americanisms now, and are best classed and defined therewith. If we reject them, we must reject also such characteristic words as boss, stoop, portage, etc. Carry it far enough, and we would have hardly anything left but neologisms. In this rapturous memoir, writer and activist Laura Coleman shares the story of her liberating journey in the Amazon jungle, where she fell in love with a magnificent cat who changed her life. Laura was in her

early twenties and directionless when she quit her job to backpack in Bolivia. Fate landed her at a wildlife sanctuary on the edge of the Amazon jungle where she was assigned to a beautiful and complex puma named Wayra. Wide-eyed, inexperienced, and comically terrified, Laura made the scrappy, make-do camp her home. And in Wayra, she made a friend for life. They weren't alone, not with over a hundred quirky animals to care for, each lost and hurt in their own way: a pair of suicidal, bra-stealing monkeys, a frustrated parrot desperate to fly, and a pig with a wicked sense of humor. The humans, too, were cause for laughter and tears. There were animal whisperers, committed staff, wildly devoted volunteers, handsome heartbreakers, and a machete-wielding prom queen who carried Laura through. Most of all, there was the jungle--lyrical and alive--and there was Wayra, who would ultimately teach Laura so much about love, healing, and the person she was capable of becoming. Set against a turbulent and poignant backdrop of deforestation, the illegal pet trade, and forest fires, *The Puma Years* explores what happens when two desperate creatures in need of rescue find one another.

In the late 1970s we ventured across the country from northern California to western Pennsylvania and back through Washington and Oregon in Steven's boxy old 1965 Chevy van. Those were the days, my friends. That trip had a lasting effect and over time we realized we were destined to be full time RVers. In 1995 we sold our house and a Recreational Vehicle became our home. An RV has been our home every since.

Uncover nature's best-hidden creatures in a major new book on animal camouflage. Camouflage is essential to surviving in the wild. Both a built-in defence mechanism and a cunning tactic for attack, this biological advantage helps animals hide from dangerous predators and catch unsuspecting prey. It is used in many different ways, primarily to mask one's identity, movement or location, and changes over time as animals evolve and adapt to live. This stunning photographic collection reveals 100 camouflaged creatures from around the world paired with fascinating insights from leading UK zoology author Steve Parker. Each elusive animal will have a profile of 300 words paired with striking photographic examples featuring a wealth of colour and ingenious camouflages. Examples include: THE GIRAFFE is the world's tallest mammal yet it remains tricky to detect among trees thanks to its spots. The spots also help to regulate their temperature. THE OCTOPUS can change its opacity, colour and pattern in response to threats. THE WALKING LEAF INSECT has evolved a strikingly similar shape and colour to the leaves it eats. THE ARCTIC FOX changes its fur colour to white in the winter, perfectly blending in with the snow – but climate change is disrupting this age-old adaptation. THE TURTLE uses colour and pattern to camouflage on sand, rocks and the ocean floor to escape its predators.

A classic of wood lore, this guide provides well-illustrated directions for constructing traps for large, small, and feathered game. Additional information covers animal habitats, camping, building simple shelters and canoes, and recipes.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt
