The Security Industry Authority, the body which licences security guards, door supervisors and vehicle immobilisers, has secured a high level of compliance by people working in the industry with the requirement to be licensed. As at the end of May 2008, the Authority had issued over 248,000 licences and compliance is over 90 per cent. Its efficiency has, however, been hampered by poor forecasting of licensing demand and costs and difficulties with the computerised systems procured to process licence applications. When the Authority was created in 2003, the licence fee was set at £190 but it was costing the Authority £215 to process an application. As a result, the Authority needed an additional £17.4 million of public funding between 2004-05 and 2007-08 to carry out its work. In the winter of 2005-06, the Authority's original system for producing licences was unable to cope with the large number of later than planned applications the Authority received. In autumn 2007, the Authority's replacement system was not ready on time and a backlog of applications arose. These two problems resulted in the Authority incurring additional costs of £1 million. The Private Security Industry Act 2001 set up the Authority to regulate individuals, but in a number of other countries the equivalent bodies also regulate businesses. The NAO recommends that in addition to individuals all private security businesses should be registered with the Authority. The SIA has already started a feasibility study to consider the compulsory registration of private security companies.

Conducted properly, information security risk assessments provide managers with the feedback needed to manage risk through the understanding of threats to corporate assets, determination of current control vulnerabilities, and appropriate safeguards selection. Performed incorrectly, they can provide the false sense of security that allows potential threats to develop into disastrous losses of proprietary information, capital, and corporate value.

Picking up where its bestselling predecessors left off, *The Security Risk Assessment Handbook: A Complete Guide for Performing Security Risk Assessments, Third Edition* gives you detailed instruction on how to conduct a security risk assessment effectively and efficiently, supplying wide-ranging coverage that includes security risk analysis, mitigation, and risk assessment reporting. The third edition has expanded coverage of essential topics, such as threat analysis, data gathering, risk analysis, and risk assessment methods, and added coverage of new topics essential for current assessment projects (e.g., cloud security, supply chain management, and security risk assessment methods). This handbook walks you through the process of conducting an effective security assessment, and it provides the tools, methods, and up-to-date understanding you need to select the security measures best suited to your organization. Trusted to assess security for small companies, leading organizations, and government agencies, including the CIA, NSA, and NATO, Douglas J. Landoll unveils the little-known tips, tricks, and techniques used by savvy security professionals in the field. It includes features on how to Better negotiate the scope and rigor of security assessments Effectively interface with security assessment teams Gain an improved understanding of final report

Many hospital emergency departments are overcrowded and short-staffed, with a limited number of available hospital beds. It is increasingly hard for emergency departments and their staff to provide the necessary level of care for medical patients. Caring for people with psychiatric disabilities raises different issues and calls on different skills. In *Emergency Department Treatment of the Psychiatric Patient*, Dr. Stefan uses research, surveys, and statutory and litigation materials to examine problems with emergency department care for clients with psychiatric disorders. She relies on interviews with emergency department nurses, doctors and psychiatrists, as well as surveys of people with psychiatric disabilities to present the perspectives of both the individuals seeking treatment, and those providing it. This eye-opening book explores the structural pressures on emergency departments and identifies the burdens and conflicts that undermine their efforts to provide compassionate care to people in psychiatric crisis. In addition to presenting a new analysis of the source of these problems, Dr. Stefan also suggests an array of alternatives to emergency department treatment for people in psychiatric crisis. Moreover, the author proposes standards for treatment of these individuals when they do inevitably end up in a hospital emergency department. *Emergency Department Treatment of the Psychiatric Patient* presents a thoughtful and thorough analysis of the difficulties faced by people with psychiatric disabilities when seeking emergency medical care. It is essential reading for anyone working in a hospital emergency department, as well as health care policy makers, and advocates and lawyers for people with psychiatric disabilities. [T]his manual is used every day in over 20 state-licensed training centers to train pupils around the US"--Page 4 of cover.

Military wives are among the women most vulnerable to abuse in our society: isolated from friends and family in a culture that ostracizes those who speak up, they face desperate financial circumstances and lack professional support in times of crisis. Deborah Harrison and her collaborators interview more than 100 survivors of abuse and their partners in this groundbreaking study of violence against women in military communities. Despite a policy of zero tolerance, abusive behavior continues, fostered by a culture centred on constant preparation for violent conflict and covered up by an ethos that demands members protect one another at all costs. *The First Casualty* is a riveting account of how military culture contributes to abuse, keeps it secret, and attempts to silence its victims.

Drawing from a diverse range of military, policing, academic and policymakers' experiences, this book seeks to provide solutions of how national militaries and police can work together to better support future United Nations peacekeeping

operations. It addresses the growing tension between increasing non-combat related responsibilities being placed on land forces and the ability of UN peacekeeping forces to fulfil the demands of government and development tasks in fragile and conflict-affected environments. An original contribution to the debate on UN peacekeeping reforms that includes constructing an enhanced partnership for peacekeeping; building on renewed commitment to share the burden and for regional cooperation; providing peacekeepers with the necessary capabilities to protect civilians; and supporting nations in transition from conflict to stabilisation. This book offers the very latest in informed analysis and decision-making on UN peacekeeping reform.
