Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop

eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'!

How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child.

BEE CLEVER SERIES: - Colouring 1 - Colouring 2 - Join the Dots 1 - Join the Dots 2 Matching - Mazes 1 - Mazes 2 - Numbers 1 - Numbers 2 - Odd One Out - Opposites 1 - Opposites 2 - Pattern & Letter Writing 1 - Pattern & Letter Writing 2 - Phonics 1 - Phonics 2 - Shapes 1 - Shapes 2 - Story Sequence - What's Different? - What's Next? - What's Wrong? This book explores the puzzling phenomenon of new veiling practices among lower middle class women in Cairo, Egypt. Although these women are part of a modernizing middle class, they also voluntarily adopt a traditional symbol of female subordination. How can this paradox be explained? An explanation emerges which reconceptualizes what appears to be reactionary behavior as a new style of political struggle--as accommodating protest. These women, most of them clerical workers in the large government bureaucracy, are ambivalent about working outside the home, considering it a change which brings new burdens as well as some important benefits. At the same time they realize that leaving home and family is creating an intolerable situation of the erosion of their social status and the loss of their traditional identity. The new veiling expresses women's protest against this. MacLeod argues that the symbolism of the new veiling emerges from this tense subcultural dilemma, involving elements of both resistance and acquiescence.

Inviting readers to examine schools and teaching with a critical lens, this visually and conceptually captivating graphic novel advocates for arts education in schools. At the center of this work is the author's memoir as a young high school art teacher in the public school system. Through engaging (and frequently funny) anecdotes centered on classroom life, mixed with discussions of education policy and reform, readers explore teacher/student relationships, testing and accountability, 21st-century learning, and the history and purpose of art education. Branham's personal narrative of challenges and triumphs demonstrate why art education should be preserved as a core subject if students are to understand the connection between creativity, critical thinking, and other higher-order skills. "What's So Great About Art, Anyway?" is a refreshing book for everyone—particularly for in-service teachers—and is a smart foundational text in arts education and introduction to teaching courses. "This delightful graphic novel will challenge all teachers and prospective educators to think more deeply about their practice—the craft, the science, and, yes, the art of teaching." —From the Foreword by William Ayers, author of *To Teach: The Journey, in Comics* (with Ryan Alexander-Tanner) "With a contagious passion, a dynamic pen, and a generous wit, Rachel Braham returns art to its rightful place in our schools—the beating heart of the education our children deserve. 'What's So Great About Art, Anyway?' isn't just for art educators; it's for all of us." —Adam

Bessie, Diablo Valley College, co-author of graphic report *The Disaster Capitalism Curriculum* (with Dan Archer) “This visually and conceptually captivating book blazes new territory in the tradition of teacher memoirs, while reminding us of the vital importance of art education in our schools.” —Gregory Michie, Chicago teacher, author of *Holler If You Hear Me* “This book is refreshing! Branham's ideas are purposefully provocative, and she expresses them through a popular medium.” —Laurel Campbell, Indiana University-Purdue University Fort Wayne

*Teaching in the Art Museum* investigates the mission, history, theory, practice, and future prospects of museum education. In this book Rika Burnham and Elliott Kai-Kee define and articulate a new approach to gallery teaching, one that offers groups of visitors deep and meaningful experiences of interpreting art works through a process of intense, sustained looking and thoughtfully facilitated dialogue.--[book cover].

How can community art build connection in diverse communities? Where is the art in contemporary libraries? How do you bring subway art into the classroom? Drawing on an abundance of examples from Finland, Italy, New Zealand, Spain and the USA, including the NYC 2nd Ave Subway, the Detroit's Heidelberg Project, the Favel Painting Foundation and bicycle rack sculpture, Szekely inspires readers to look beyond the classroom walls to develop meaningful art experiences for students. She shows the myriad art forms, media expressions, and design professions that have the influence and potential to shape the local environment, reaching far beyond the traditional museum and gallery venue. Underpinned by a clear philosophical foundation, the field-tested approaches show readers how to go beyond the study of reproductions or dwelling on of the masters who are framed in art museums, instead having meaningful art experiences using everyday objects and diverse collective experiences. She also shows that innovative and exciting art lessons don't need large amounts of funding, transportation or even a museum within the local community. Each chapter includes photographs, talking points and key lesson ideas along with links to further resources. Suggests methods of teaching young children about the visual arts.
