As the DIY movement continues to gain momentum, it's no wonder home cheesemaking is the next hot topic. And from cheesemaking authority and teacher Louella Hill comes an education so timely and inspiring that every cheese lover and cheesemonger, from novice to professional, will have something to learn. Kitchen Creamery starts with the basics (think yogurt, ricotta, and mascarpone) before graduating into more complex varieties such as Asiago and Pecorino. With dozens of recipes, styles, and techniques, each page is overflowing with essential knowledge for perfecting the ins and outs of the fascinating process that transforms fresh milk into delicious cheese.

Including more than 35 step-by-step recipes from the Black Sheep School of Cheesemaking Most DIY cheesemaking books are hard to follow, complicated, and confusing, and call for the use of packaged freeze-dried cultures, chemical additives, and expensive cheesemaking equipment. For though bread baking has its sourdough, brewing its lambic ales, and pickling its wild fermentation, standard Western cheesemaking practice today is

decidedly unnatural. In *The Art of Natural Cheesemaking*, David Asher practices and preaches a traditional, but increasingly countercultural, way of making cheese—one that is natural and intuitive, grounded in ecological principles and biological science. This book encourages home and small-scale commercial cheesemakers to take a different approach by showing them:

- How to source good milk, including raw milk;
- How to keep their own bacterial starter cultures and fungal ripening cultures;
- How make their own rennet—and how to make good cheese without it;
- How to avoid the use of plastic equipment and chemical additives; and
- How to use appropriate technologies.

Introductory chapters explore and explain the basic elements of cheese: milk, cultures, rennet, salt, tools, and the cheese cave. The fourteen chapters that follow each examine a particular class of cheese, from kefir and paneer to washed-rind and alpine styles, offering specific recipes and handling advice. The techniques presented are direct and thorough, fully illustrated with hand-drawn diagrams and triptych photos that show the transformation of cheeses in a comparative and dynamic fashion. *The Art of Natural Cheesemaking* is the first cheesemaking book to take a political stance against Big Dairy and to criticize both standard industrial and artisanal cheesemaking practices. It promotes the use of ethical animal rennet and protests the use of

laboratory-grown freeze-dried cultures. It also explores how GMO technology is creeping into our cheese and the steps we can take to stop it. This book sounds a clarion call to cheesemakers to adopt more natural, sustainable practices. It may well change the way we look at cheese, and how we make it ourselves.

Paula Deen meets Erma Bombeck in *The Pioneer Woman Cooks*, Ree Drummond's spirited, homespun cookbook. Drummond colorfully traces her transition from city life to ranch wife through recipes, photos, and pithy commentary based on her popular, award-winning blog, *Confessions of a Pioneer Woman*, and whips up delicious, satisfying meals for cowboys and cowgirls alike made from simple, widely available ingredients. *The Pioneer Woman Cooks*—and with these “Recipes from an Accidental Country Girl,” she pleases the palate and tickles the funny bone at the same time.

A resource for those interested in starting a small-scale creamery.

Cheese, is a gift to anyone interested in exploring the wonderful and wonderfully complex realities of artisan cheesemaking in the United States. Paxson deftly integrates careful considerations of the importance of sentiment, value and craft to the work of cheesemakers with vivid stories and lush descriptions of their farms, cheese plants and cheese caves. While she beguiles you with the stories and tastes of cheeses from Vermont, Wisconsin and California, she also asks you to envision a post-pastoral ethos in the making. This ethos reconsiders contemporary beliefs about America's food commerce and culture, reimagines our relationship to the natural world, and redefines how we make, eat, and appreciate food. For cheese aficionados, food activists, anthropologists and food scholars alike, reading *The Life of Cheese* will be a transformative experience." Amy Trubek, author of *The Taste of Place: A Cultural Journey into Terroir*

"Every serious home-scale artisan cheesemaker--even those just beginning to experiment--will want this book as their bible to take them from their first quick mozzarella, to a French mimolette, and ultimately to designing their own unique cheeses. This comprehensive and user-friendly guide thoroughly explains the art and science that allow milk to be transformed into epicurean masterpieces. artisan cheese on a small scale, and includes detailed information on equipment and setting up a home-scale operation. A large part of the book includes extensive process-based recipes dictating not only the hard numbers, but also the concepts behind each style of cheese and everything you want to know about affinage (aging), and using oils, brushes, waxes, infusions, and other creative aging and flavoring techniques. Mastering Artisan Cheesemaking will also prove an invaluable resource for those with, or thinking of starting, a small-scale creamery. Let Gianaclis Caldwell be your mentor, guide, and cheering section as you follow the pathway to a mastery of cheesemaking"--

Now in a fully-revised new edition, this book covers the science and technology underlying cheesemaking, as practised today in the manufacture of hard, semi-soft and soft cheeses. Emphasis is placed on the technology, and the science and technology are integrated throughout. Authors also cover research developments likely to have a commercial impact on cheesemaking in the foreseeable future within the areas of molecular genetics, advanced sensor / measurement science, chemometrics, enzymology and flavour chemistry. In order to reflect new issues and challenges that have emerged since publication of the first book, the new chapters are included on milk handling prior to cheesemaking; packaging; and major advances in

the control of the end user properties of cheese using key manufacturing parameters and variables. The volume has been structured to flow through the discrete stages of cheese manufacture in the order in which they are executed in cheese plants - from milk process science, through curd process science, to cheese ripening science and quality assessment. Overall, the volume provides process technologists, product development specialists, ingredients suppliers, research and development scientists and quality assurance personnel with a complete reference to cheese technology, set against the background of its physical, chemical and biological scientific base.

When Simon Majumdar hit forty, he realized there had to be more to life than his stable but uninspiring desk job. As he wondered how to escape his career, he rediscovered a list of goals he had scrawled out years before, the last of which said: Go everywhere, eat everything. With that, he had found his mission -- a yearlong search for the delicious, and curious, and the curiously delicious, which he names Eat My Globe and memorably chronicles in these pages. In Majumdar's world, food is everything. Like every member of his family, he has a savant's memory for meals, with instant recall of dishes eaten decades before. Simon's unstoppable wit and passion for all things edible (especially those things that once had eyes, and a face, and a mom and a pop) makes this an armchair traveler's and foodie's delight -- Majumdar does all the heavy lifting, eats the heavy foods (and suffers the weighty consequences), so you don't have to. He jets to thirty countries in just over twelve months, diving mouth-first into local cuisines and cultures as different as those of Japan and Iceland. His journey takes him from China, where he consumes one of his "Top Ten Worst Eats,"

stir-fried rat, to the United States, where he glories in our greatest sandwiches: the delectable treasures of Katz's Delicatessen in Manhattan, BBQ in Kansas and Texas, the still-rich po' boys of post-Katrina New Orleans. The meat of the story -- besides the peerless ham in Spain, the celebrated steaks of Argentina, the best of München's wursts as well as their descendants, the famous hot dogs of Chicago -- is the friends that Simon makes as he eats. They are as passionate about food as he is and are eager to welcome him to their homes and tables, share their choicest meals, and reveal their local secrets. Also a poignant memoir, *Eat My Globe* is a life told through food and spiced with Majumdar's remembrances of foods past, including those from his colorful childhood. (Raised in Northern England, he is the son of a fiery Welsh nurse and a distinguished Bengali surgeon.) A captivating look at one man's passion for food, family, and unique life experiences, *Eat My Globe* will make you laugh -- while it makes you hungry. It is sure to satiate any gastronome obsessed with globetrotting -- for now. Featuring 40 classic cheeses, including mozzarella, Cheddar, Stilton, Gouda, Brie and other popular varieties, this book tells you all you need to know about how to set up a home dairy. It covers the importance of foodsafety and hygiene; where and how to source milk; an accessible overview of the biochemical processes involved; and essential techniques such as milling, draining, pressing, salting, rind-washing, introducing moulds or yeasts, maturing and storing. With over 475 photographs and a user-friendly troubleshooting section, this volume will enable you to develop the skills

"Behind every traditional type of cheese there is a fascinating story. By examining the role of the cheesemaker throughout world history and by understanding a few basic principles of cheese science and technology, we can see how different cheeses have been shaped by and tailored to their surrounding environment, as well as defined by their social and cultural context. Cheese and Culture endeavors to advance our appreciation of cheese origins by viewing human history through the eyes of a cheese scientist. There is also a larger story to be told, a grand narrative that binds all cheeses together into a single history that started with the discovery of cheese making and that is

still unfolding to this day. This book reconstructs that 9000-year story based on the often fragmentary information that we have available. Cheese and Culture embarks on a journey that begins in the Neolithic Age and winds its way through the ensuing centuries to the present. This tour through cheese history intersects with some of the pivotal periods in human prehistory and ancient, classical, medieval, renaissance, and modern history that have shaped western civilization, for these periods also shaped the lives of cheesemakers and the diverse cheeses that they developed. The book offers a useful lens through which to view our twenty-first century attitudes toward cheese that we have inherited from our past, and our attitudes about the food system more broadly. This refreshingly original book will appeal to anyone who loves history, food, and especially good cheese"--Provided by publisher.

Making cheese at home is one of the joys of a self-sufficient lifestyle, along with gardening, canning, and raising chickens. Author Janet Hurst is a twenty-year-veteran home cheesemaker, who shows you how to easily craft your own cheddar, feta, chèvre, mozzarella, and 50 more cheeses. Included are profiles of 20 artisan cheesemakers—from Cypress Grove, Vermont Butter and Cheese, Shelburne Farms, Does Leap, Pure Luck, and more—and their favorite recipes.

The author of the popular Nourished Kitchen website shares 175 recipes based on the "traditional foods" philosophy of eating that emphasizes nutrient-rich whole grains, dairy, red meat, organ meats and fermented foods. Original. 12,000 first printing. It's a DIY cook's dream come true: It's pizza night, and you've made not only the crust and sauce but

the mozzarella, too. Or you're whipping up quesadillas for a snack, using your homemade Triple Pepper Hack. Or the dinner party's in high gear and out comes the cheese plate—and yes, you've made all the cheeses on it. Even better—you made them all earlier that day. In a cookbook whose results seem like magic but whose recipes and instructions are specific, easy-to-follow, and foolproof, Claudia Lucero shows step by step—with every step photographed—exactly how to make sixteen fresh cheeses at home, using easily available ingredients and tools, in an hour or less. The approach is basic and based on thousands of years of cheesemaking wisdom: Heat milk, add coagulant, drain, salt, and press. Simple variations produce delicious results across three categories—Creamy and Spreadable, Firm and Chewy, and Melty and Gooney. And just as delicious, the author shows the best ways to serve them, recipes included: Squeaky “Pasta” Primavera, Mozzarella Kebab Party, and Curry in a Hurry Lettuce Wraps.

The beloved Instant Pot can be used to do just about anything: caramelize onions, boil eggs, steam rice . . . and now, make cheese! Cheesemaking in a multicooker is not only time- and money-saving, but the cooker's accurate and consistent temperatures make it an ideal tool for the craft. Claudia Lucero, author of the best-selling *One-Hour Cheese*, presents the cheesemaking basics, then covers

classics such as paneer, ricotta, goat cheese, and easy cottage cheese before introducing more sophisticated options like burrata and feta, and even dairy-free alternatives. For multicookers with a “Yogurt” function, there are recipes for cultured dairy products such as buttermilk, ghee, and sour cream, too.
