Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.

Investigates charges by Gen. James A. Van Fleet that a critical shortage of ammunition hindered the war effort in Korea.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses
- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive your startup to repeatable, scalable profits.

The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

Home Missions ... Annual Report of the Presbyterian Board of Home Missions
...Minutes of the ... General Assembly of the United Presbyterian Church in the United States of America

In September 2010, James G. Pierce, a retired U.S. Army colonel with the Strategic

Studies Institute at the U.S. Army War College in Carlisle Barracks, Pennsylvania, published a study on Army organizational culture. Pierce postulated that "the ability of a professional organization to develop future leaders in a manner that perpetuates readiness to cope with future environmental and internal uncertainty depends on organizational culture." He found that today's U.S. Army leadership "may be inadequately prepared to lead the profession toward future success." The need to prepare for future success dovetails with the use of the concepts of mission command. This book offers up a set of recommendations, based on those mission command concepts, for adopting a superior command culture through education and training. Donald E. Vandergriff believes by implementing these recommendations across the Army, that other necessary and long-awaited reforms will take place.

Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

Contains stories previously published in Bleating about the bush and Back at sundown, as well as new material.

Here is the fascinating story of the rise and fall of the Arrow, the legendary interceptor jet aircraft, developed by A.V. Roe Canada in the fifties. The Arrow was an unprecedented success story for Canada's fledgling aviation industry. It was conceived by its builders as the culmination of an impressive string of world firsts. Faster than any previous aircraft, it represented the leading edge of technology and an achievement of the highest calibre. Then came the dramatic decision whose rationale was not made public at the time and which remains hard to fathom even today. The Diefenbaker government cancelled the Arrow, and everything was destroyed, including the planes themselves. Nothing was to remain. Working from official documents, archives, interviews and a wide range of unofficial sources, James Dow presents the authoritative story of A.V. Roe Canada and its projects. He describes how the Arrow was developed and why it was killed. Dow takes us behind the scenes to the real dynamics and rivalries which were a part of the Arrow from the beginning and which explain its fate. This edition of the definitive book on the subject has been updated with a new introduction.

The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

Popular Science gives our readers the information and tools to improve their

technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
