Land degradation reduces food productivity and security, disrupts vital ecosystem functions and increases carbon emissions and vulnerability to climate change. 52 percent of the land used for agriculture worldwide is estimated to already be affected. Studies indicate that land degradation directly affects 1.5 billion people around the world. Despite the seriousness of the issue, there is still limited access to resources and planning tools for sustainable land management. Between 2015 to 2019, FAO implemented the project "Decision support for mainstreaming and scaling up of sustainable land management (DS-SLM)" at a global level across 15 countries. The aim of the project was to improve access to information on land management best practices. The final evaluation examines the impacts and sustainability of the project results. What has contributed to, or hindered, the implementation of the planned activities? What has been the effect of linkages and partnerships between the project and other major country initiatives? Developed for the AQA Specification, revised for the new National Curriculum and the new GCSE specifications. The Teacher File contains detailed support and guidance on advanced planning, points of emphasis, key words, notes for non-specialist, useful supplementary ideas and homework sheets.

The quality of the macroeconomic statistics for Malta has improved significantly in recent years, particularly as a result of the legal and institutional restructuring of the National Statistics Office (NSO). These changes were made in an effort to respond more

effectively to the needs of users and to comply with new data-reporting requirements of the European Union (EU). These improvements have brought Malta's statistical practices in line with internationally accepted standards and practices in a number of statistical areas.

Contains activities based on 8 popular children's books designed to enhance emergent literacy skills and promote growth across other areas of the curriculum as well.

Practical, effective, evidence-based reading interventions that change students' lives
Essentials of Understanding and Assessing Reading Difficulties is a practical, accessible, in-depth guide to reading assessment and intervention. It provides a detailed discussion of the nature and causes of reading difficulties, which will help develop the knowledge and confidence needed to accurately assess why a student is struggling. Readers will learn a framework for organizing testing results from current assessment batteries such as the WJ-IV, KTEA-3, and CTOPP-2. Case studies illustrate each of the concepts covered. A thorough discussion is provided on the assessment of phonics skills, phonological awareness, word recognition, reading fluency, and reading comprehension. Formatted for easy reading as well as quick reference, the text includes bullet points, icons, callout boxes, and other design elements to call attention to important information. Although a substantial amount of research has shown that most reading difficulties can be prevented or corrected, standard reading remediation efforts have proven largely ineffective. School psychologists are routinely called upon to evaluate students with reading difficulties and to make recommendations to address such difficulties. This book provides an overview of the best assessment and intervention techniques, backed by the most current research findings. Bridge the gap between research and practice
Accurately assess the reason(s) why a student struggles in reading
Improve reading skills using the most highly effective evidence-based techniques
Reading may well be the most important thing students are taught during their school careers. It is a skill they will use every day of their lives; one that will dictate, in part, later life success. Struggling students need help now, and Essentials of Understanding and Assessing Reading Difficulties shows how to get these students on track.

An annual prize is awarded for the best paper appearing in Accounting Education: an international journal, and this book contains the prize-winning papers for every year from 1992 to 2012. The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice, and all the papers in this book relate to that mission. These papers, reporting on research studies undertaken by accounting education scholars from around the world, build

on research findings from the broader domain of education scholarship and embrace a wide array of topics – including: curriculum development, pedagogic innovation, improving the quality of learning, and assessing learning outcomes. Of particular interest are three themes, each of which runs through several of the papers: students' approaches to learning and learning style preferences; ethics and moral intensity; and innovation within the accounting curriculum. Accounting educators will find many ideas in the book to help them in enriching their work, and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report – whether comparatively or longitudinally. This book is a compilation of papers originally published in *Accounting Education: an international journal*.
