What if Jesus Christ, son of God, savior of humanity...never existed? The consequences would be enormous. In this book, Dr. David Skrbina argues succinctly that the biblical Jesus was in fact a hoax, a fraud, constructed by St. Paul and others. Their purpose: to undermine the hated Roman Empire. The case is well-grounded and shocking.

An enlightening anthology by world-renowned theologians, historians and researchers that exposes and challenges misrepresentations and age-old beliefs. With an introduction by ABC Radio Talk Show Host Bill Jenkins.

Alvin Boyd Kuhn (1880 -1963) was an American Theosophist. A publisher who wrote books that he published himself, he lectured and was a proponent of the Christ myth theory. Highly influenced by the work of Gerald Massey and Godfrey Higgins, Kuhn contended that the Bible derived its origins from other Pagan religions and much of Christian history was pre-extant as Egyptian mythology. He also proposed that the Bible was symbolic and did not depict real events and argued that the leaders of the church started to misinterpret the bible at the end of the third century.

Foreword by Jordan Maxwell. This incredibly detailed book reveals the hidden meanings behind occult signs and symbols from ancient times, found in what is termed stellar theology, and then carried over into modern religions. Few people have any knowledge of the occult or hidden connections between Judaism, Christianity and the Bible with World Freemasonry. Brown, a Freemason, provides these important connections. Covers ancient astronomy and how it became incorporated into the various religions. Also explores the worlds early legends and symbols and how they were connected to ancient astronomical systems. These revealing facts form the basis for many of todays religious concepts and belief systems.

What drives you? Or what is the "motivation" or "purpose" of your life? Robert Oh has traveled to close to fifty countries in his lifetime and met hundreds of thousands of God-fearing and God-loving people who are still asking the fundamental question of life: "What does God want me to do with my life?" At the end of your life you don't want to catch yourself saying, "That was it?" You see, without God, your life will be only earthly, natural, and predictable; it won't be supernatural or godly. You reap what you sow. The Prayer Driven Life is an invitation to enter this incredible supernatural life--fashioned by God and through your own prayer. What does God want you to do with your life? Why don't you ask Him? Pray!

"UFOs do not exist" are not the words of the author, but of government authorities. The evidence revealed here should once and for all expose this long standing lie. Are alien beings capable of abducting humans and implanting objects into our bodies that we do not know about? The evidence is the implants themselves - tiny metallic objects of unusual composition, surgically removed from people who have claimed to have histories of alien abduction. Presented here is the most advanced research on the reality of alien implants, coming directly from eminent scientists. The author, an actual doctor, had originally thought such implants were nothing more than a joke - until he found the evidence. Since doing so, Roger Leir has been the only person to share these other-worldly objects with both scientists and the general public. Thousands of suspected pieces of alien craft, soil samples and trace landing evidence have been tested, but none have revealed scientific proof indicating off-world origin. For the first time, revealed in this book, scientists have made legitimate off-world claims and proven it. Also covers worldwide sightings, what they mean, and the latest findings surrounding the amazing 1996 Varginha, Brazil crash case, where the author has traveled to investigate first-hand. Includes a Foreword by Apollo 14 astronaut Edgar Mitchell, who describes what it's like to set foot on another celestial body, and shares opinions on intelligent life in the universe. This book takes the next step in the study of other life forms that may be visiting our earth and leaving evidence. From the Foreword, Edgar Mitchell says, "In spite of denials and serious efforts by many governments to deny, the evidence has continued to mount for alien presence and activities. The learned and intelligent citizenry is becoming convinced that, indeed, our Earth is being visited by an advanced technological species." Concerning Dr. Leir's discovery of implants in humans, the TV documentary *Unsealed: Alien Files* stated, "With multiple labs confirming the objects are extraterrestrial, the only question that remains is: "What's the ultimate purpose of these implants?" This groundbreaking book is a must for those seeking the answers.

Unlike many modern historians, Perry was a diffusionist who believed that modern civilization began in Egypt and was spread via ships to Indonesia, the Pacific Islands, and even to North America. Perry traces the origin of megalithic culture starting in Egypt, and then across the Pacific. Searching for gold, obsidian, and pearls, they travelled across the Pacific to the American Southwest and Mexico.

Many people think science is antagonistic to Christian belief. Science, it is said, shows that the universe is billions of years old, while the Bible says it is only thousands of years old. And some claim that science shows supernatural miracles are impossible.

These and other points of contention cause some Christians to view science as a threat to their beliefs. Redeeming Science attempts to kindle our appreciation for science as it ought to be—science that could serve as a path for praising God and serving fellow human beings. Through examining the wonderfully complex and immutable laws of nature, author Vern Poythress explains, we ought to recognize the wisdom, care, and beauty of God. A Christian worldview restores a true response to science, where we praise the God who created nature and cares for it.

In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. Brands of Faith argues that in order to compete effectively faiths have had to become brands – easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism – good and bad. Repackaging religion – updating music, creating teen-targeted bibles – is justifiable and necessary. However, when the content becomes obscured, religion may lose its unique selling proposition – the very ability to raise us above the market.

Uncover the spiritual cosmology of the ancients! Virtually all the world's sacred traditions are built upon a common esoteric system of celestial allegory. In The Undying Stars, you will see how that system works, and why the ancients thought it was so important. You will find evidence that the message that these esoteric myths were intended to convey includes a shamanic-holographic worldview of tremendous sophistication . . . and profound significance. A worldview which anticipated quantum physics by many thousands of years. And you will encounter evidence that this ancient wisdom was deliberately suppressed by forces who took over the Roman Empire and then launched a violent campaign to eradicate the ancient esoteric system, first in Europe and then in the rest of the world . . .

In this highly controversial and explosive book, archaeologist, historian, mythologist and linguist Acharya S. marshals an enormous amount of startling evidence to demonstrate that Christianity and the story of Jesus Christ were created by members of various secret societies, mystery schools and religions in order to unify the Roman Empire under one state religion. In developing such a fabrication, this multinational cabal drew upon a multitude of myths and rituals that existed long before the Christian era, and reworked them for centuries into the religion passed down to us today. Contrary to popular belief, there was no single man who was at the genesis of Christianity; Jesus was many characters rolled into one. These characters personified the ubiquitous solar myth, and their exploits were well known, as reflected by such popular deities as Mithras, Heracles/Hercules, Dionysos and many others throughout the Roman Empire and beyond. The story of Jesus as portrayed in the Gospels is revealed to be nearly identical in detail to that of the earlier savior-gods Krishna and Horus, who for millennia preceding Christianity held great favor with the people. The Christ Conspiracy shows the Jesus character as not unique or original, not "divine revelation." Christianity reinterprets the same extremely ancient body of knowledge that revolved around the celestial bodies and natural forces. The result of this myth making has been "The Greatest Conspiracy Ever Sold."

A sparkingly strange odyssey through the kaleidoscope of America's new spirituality: the cults, practices, high priests and prophets of our supposedly post-religion age. Fifty-five years have passed since the cover of Time magazine proclaimed the death of God and while participation in mainstream religion has indeed plummeted, Americans have never been more spiritually busy. While rejecting traditional worship in unprecedented numbers, today's Americans are embracing a kaleidoscopic panoply of spiritual traditions, rituals, and subcultures -- from astrology and witchcraft to SoulCycle and the alt-right. As the Internet makes it ever-easier to find new "tribes," and consumer capitalism forever threatens to turn spirituality into a lifestyle brand, remarkably modern American religious culture is undergoing a revival comparable with the Great Awakenings of centuries past. Faith is experiencing not a decline but a Renaissance. Disillusioned with organized religion and political establishments alike, more and more Americans are seeking out spiritual paths driven by intuition, not institutions. In Strange Rites, religious scholar and commentator Tara Isabella Burton visits with the techno-utopians of Silicon Valley; Satanists and polyamorous communities, witches from Bushwick, wellness junkies and social justice activists and devotees of Jordan Peterson, proving Americans are not abandoning religion but remixing it. In search of the deep and the real, they are finding meaning, purpose, ritual, and communities in ever-newer, ever-stranger ways.

Witchcraft and magic are topics of enduring interest for many reasons. The main one lies in their extraordinary interdisciplinarity: anthropologists, folklorists, historians, and more have contributed to build a body of work of extreme variety and consistence. Of course, this also means that the subjects themselves are not easy to assess. In a very general way, we can define witchcraft as a supernatural means to cause harm, death, or misfortune, while magic also belongs to the field of supernatural, or at least esoteric knowledge, but can be used to less dangerous effects (e.g., divination and astrology). In Western civilization, however, the witch hunt has set a very peculiar perspective in which diabolical witchcraft, the invention of the Sabbat, the persecution of many thousands of (mostly) female and (sometimes) male presumed witches gave way to a phenomenon that is fundamentally different from traditional witchcraft. This Special Issue of Religions dedicated to Witchcraft, Demonology, and Magic features nine articles that deal with four different regions of Europe (England, Germany, Hungary, and Italy) between Late Medieval and Modern times in different contexts and social milieus. Far from pretending to offer a complete picture, they focus on some topics that are central to the research in those fields and fit well in the current "cumulative concept of Western witchcraft" that rules out all mono-causality theories, investigating a plurality of causes.
