Do you sometimes question if you are on the right path or if you are wasting your time on something you are not supposed to do? Do you repeatedly see numbers all around you? I ?m not talking about telephone numbers, area codes or price tags, but patterns that are not 'normal'? 11:11, 333, 666? Do you ever recognize certain character traits among people that are born in the same month? What if all the 'coincidences' in your life mean much more than you think on first sight? There is a 4000-year-old science based on the mathematics of the universe called numerology. Instead of 1+1, you can reveal the message behind everything that is happening in your life right now. And even more. Once you discover how to decode numbers and understand how astronomical phenomena impact a person ?s personality, you can not only predict, but also change your future for the better. Imagine you had the ability to decide your child ?s destiny? The day and month someone is born shapes who they are today and who they are going to become. There is no such thing as coincidence. People fear numbers and astrology because it ?s easier to blindly follow their fellows. Most of us live in a fake bubble of who we are and what we are doing on this planet. Looking deeper into numbers and the position of celestial objects requires strength and willpower. From now on, you can take charge of your destiny. Always remember, the universe has your back and you will receive the same energy back that you send out. In Numerology and Astrology for Beginners, you'll discover: How the flap of a butterfly's wings in Mexico cause a giant change in your life The man's name that

(page 41) And much more. If this is your first contact with astrology and numerology, you might be skeptical if this unknown science is trustworthy. We have all heard the sentence 'Only an idiot would believe that the month you are born could have effect on your personality.' But what if I tell you that science has proven: you are more likely to be diagnosed with schizophrenia if you are born in February suicide is strongest in people born in between April and June you could be suffering from dyslexia if you are a summer baby If you still think it ?s all hocus-pocus, then you must be a Gemini (they tend to be over skeptical).
