

Astronomy And The Bible Questions And Answers

Written by an L. A. County homicide detective and former atheist, Cold-Case Christianity examines the claims of the New Testament using the skills and strategies of a hard-to-convince criminal investigator. Christianity could be defined as a “cold case”: it makes a claim about an event from the distant past for which there is little forensic evidence. In Cold-Case Christianity, J. Warner Wallace uses his nationally recognized skills as a homicide detective to look at the evidence and eyewitnesses behind Christian beliefs. Including gripping stories from his career and the visual techniques he developed in the courtroom, Wallace uses illustration to examine the powerful evidence that validates the claims of Christianity. A unique apologetic that speaks to readers’ intense interest in detective stories, Cold-Case Christianity inspires readers to have confidence in Christ as it prepares them to articulate the case for Christianity.

Astronomy and the Bible is a 155-page paperback which answers 100 intriguing questions about astronomy and science. Written by Grace College professor Dr. Don B. DeYoung, it is subtitled Questions and Answers. The questions range across subjects such as the earth and the moon, the solar system, the stars, galaxies and the universe, and general science. Published by BMH Books, Winona Lake, Ind., the book includes a new, helpful series of seasonal star charts for the Northern Hemisphere, along with a general and a scripture index. DeYoung, who has taught at Grace College since 1972, is known internationally for his work in creation science. He is president of the Creation Research Society and is the author of 17 books, including Pioneer Explorers of Intelligent Design, also published by

Read Free Astronomy And The Bible Questions And Answers

BMH books. He and his wife, Sally, are members of the Winona Lake (Ind.) Grace Brethren church. Astronomy and the Bible's question-and-answer format makes it a practical tool for the classroom and home school. About the book, Christian Retailing magazine commented, "How refreshing and rare to find an astronomy book where God's Word, not scientific theory, finds pre-eminence." Bibliotheca Sacra described the book as "Truly a veritable goldmine of easy-to-understand information about astronomy and earth history." Scriptural Authority and Biblical Criticism in the Dutch Golden Age explores the hypothesis that in the long seventeenth century humanist-inspired biblical criticism contributed significantly to the decline of ecclesiastical truth claims. Historiography pictures this era as one in which the dominant position of religion and church began to show signs of erosion under the influence of vehement debates on the sacrosanct status of the Bible. Until quite recently, this gradual but decisive shift has been attributed to the rise of the sciences, in particular astronomy and physics. This authoritative volume looks at biblical criticism as an innovative force and as the outcome of developments in philology that had started much earlier than scientific experimentalism or the New Philosophy. Scholars began to situate the Bible in its historical context. The contributors show that even in the hands of pious, orthodox scholars philological research not only failed to solve all the textual problems that had surfaced, but even brought to light countless new incongruities. This supplied those who sought to play down the authority of the Bible with ammunition. The conviction that God's Word had been preserved as a pure and sacred source gave way to an awareness of a complicated transmission in a plurality of divergent, ambiguous, historically determined, and heavily corrupted texts. This shift took place primarily in the Dutch Protestant world of the seventeenth century.

The relationship of Christianity to science can best be handled by isolating images of science that influence Christianity. Henry defines and then reformulates those images, making science more intelligible and Christianity more biblical.

This book was written for people who would like to learn about our Solar System without evolution jammed into every paragraph. It's mostly technical information, with some discussion. Disclaimer: This book contains discussion which questions the theory of evolution and long ages associated with it. If you are a firm supporter of the theory of evolution, please save yourself some bad mood and do not buy this book. Cheers everybody!

Course Description: Taking Back Astronomy: Take a breathtaking look at the universe in this comprehensive guide to the heavens! Sit back and explore the world at your fingertips. This book explains the scale and size of the universe that is hard for our minds to imagine, yet can only indicate the Master's hand at work. Marvel at over 50 full-color, rarely seen photos of stars, nebulae, and galaxies. Study the facts that challenge secular theories and models of the universe-how it began and how it continues to amaze the scientific community. Explore numerous evidences that point to a young universe: magnetic poles of planets, the spiral shape of

galaxies, comets and how long scientists think they can last, and much more. Step out among the stars and experience the truly awesome power of God through this glimpse of His vast creation. Our Created Moon: For eons the moon has intrigued humanity. From its creation through the current issues of space exploration the moon has been both a light in the night and a protective shield of earth placed perfectly by God, regulating our seasons and keeping our atmosphere purified. Billions of dollars have been spent to reach its surface and discover its secrets; open these pages and discover those secrets for yourself. The Stargazer's Guide to the Night Sky: Explore the night sky, identify stars, constellations, and even planets. Stargaze with a telescope, binoculars, or even your naked eye. Allow Dr. Jason Lisle, a research scientist with a masters and PhD in astrophysics, to guide you in examining the beauty of God's Creation with 150 full color star-charts. Learn the best ways and optimal times to observe planets and stars with easy to use illustrations. Create or expand the hobby of stargazing; an outdoor, educational hobby to enjoy with friends or family. Our Created Moon DVD: In this illustrated presentation, Dr. Don DeYoung looks at four of the most popular ideas evolutionists have to offer regarding the moon's origin, and logically concludes that this "lesser light" could only have been placed in its orbit by an all-knowing, all-powerful Creator. Created Cosmos DVD: Our universe is truly an amazing thing. The vastness of space boggles the mind, and the beauty of diversity we find there points to a Creator. The Psalmist wrote, "When I consider Your heavens, the work of Your

fingers, the moon and the stars, which You have ordained, what is man that You are mindful of him, and the Son of man that You visit him?" Take a tour through the universe during this awe-inspiring presentation.

Written in the genre of Henry David Thoreau's travel-thinking essays, *Jesus, History, and Mount Darwin: An Academic Excursion* is the story of a three-day climb into the Evolution Range of the High Sierra Mountains of California. Mount Darwin stands among other near-14,000-foot high mountains that are named after promoters of religious versions of evolutionary thinking. Rick Kennedy, a history professor from a small college, uses the climb as an opportunity to think about general education and how both the natural history of evolution and the ancient history of Jesus can find a home in the Aristotelian diversity of university methods. Kennedy offers the academic foundations for the credibility and reliability of accounts of Jesus in the New Testament, while pointing out that these foundations have the same weaknesses and strengths that ancient history has in general. Natural history, Kennedy points out, has a different set of strengths and weaknesses from ancient history. Overall, the book reminds students and professors of the wisdom in being humble.

"Twenty-somethings once faithfully attended church. What made them stop? While most said they still believe that the Bible is God's Word, they also said that the idea that the earth is millions of years old was one thing that caused them to doubt the Bible? The crumbling foundation of the church takes a devastating toll on future generations. Therefore, churches must reclaim the

historical truth found in Genesis and apply the Bible's authority to every area of life." -Ken Ham, President Answers in Genesis

As the modern Church struggles to find a place of relevancy for a new generation that already has massive demands on its time and attention, more and more young people raised in the Church are leaving it - failing to find the answers to their questions of faith and life, beset with doubts raised by issues that the Church chooses not to address. Opting to skirt the controversy of Genesis as literal history, the biblical authority of the Holy Word is called into question and reduced to a collection of mere stories. More popularly considered an issue for schools or in the public realm, the conflicting views on the age of the earth also remain a pivotal issue within the Church - as it has for over two centuries. Was the Creation week literally six days? Does science really point to an old earth? Does the issue really matter for Christians? Should this issue even be discussed within the Church? Join authors Dr. Jason Lisle and Tim Chaffey as they put forth a case against an old-earth interpretation of Scripture. A comprehensive biblical, theological, and scientific critique of old-earth creationism, the book presents its compelling testimony in layman's terms to create a powerful debate that leads to unquestionable truth.

Arguably the oldest book in the Bible, the book of Job has a surprising amount to say about some of the newest scientific discoveries and controversies. Far from a book that is just about suffering, Job is filled with rich insight into both ancient and modern questions about the formation of the world the difference between animals

Read Free Astronomy And The Bible Questions And Answers

and humans cosmology dinosaurs and the fossil record how to care for creation and more With careful consideration and exegesis, internationally known astrophysicist and Christian apologist Hugh Ross adds yet another compelling argument to the case for the veracity of the biblical commentary on the history of the universe, Earth, life, and humanity. Hidden Treasures in the Book of Job shows that the Bible is an accurate predictor of scientific discoveries and a trustworthy source of scientific information, and that both the book of Scripture and the book of nature are consistent both internally and externally.

A world list of books in the English language.

Written in the genre of Henry David Thoreau's travel-thinking essays, *Jesus, History, and Mount Darwin: An Academic Excursion* is the story of a three-day climb into the Evolution Range of the High Sierra mountains of California. Mount Darwin stands among other mountains near fourteen thousand feet high and that are named after promoters of religious versions of evolutionary thinking. Rick Kennedy, a history professor from Point Loma, uses the climb as an opportunity to think about general education and how both the natural history of evolution and the ancient history of Jesus can find a home in the Aristotelian diversity of university methods. Kennedy offers the academic foundations for the credibility and reliability of accounts of Jesus in the New Testament, while pointing out that these foundations have the same weaknesses and strengths that ancient history has in general. Natural history, Kennedy points out, has a different set of strengths and weaknesses

from ancient history. Overall, the book reminds students and professors of the wisdom in being humble.

This comprehensive guide to astronomy introduces the basic concepts, explaining what, when, and how to observe space, right through to current theories on everything from black holes to microquasars. It helps you to navigate the night sky, identify the constellations and find planets, comets, galaxies and deep-sky objects. Accessible, informative, and fully-illustrated, this is an invaluable practical companion for anyone who loves stargazing.

This work addresses scientism and relativism, two false philosophies that divorce science from culture in general and from tradition in particular. It helps break the isolation of science from the rest of culture by promoting popular science and reasonable history of science. It provides examples of the value of science to culture, discussions of items of the general culture, practical strategies and tools, and case studies. It is for practising professionals, political scientists and science policy students and administrators.

The Bible is certainly the most mysterious book ever created. The Scriptures are filled with hundreds of curious passages that have puzzled both Jews and Christians for thousands of years. In this powerful, faith-building book, respected author Grant R. Jeffrey takes the reader on a journey of mystery while uncovering deep truths found in the word of

taught that the changing stars caused the seasons to change, but unlike these pagan teachings, the Book of Job gives credit to God for both changing stars and seasons (Job 38:31-33). When Job looked at Orion, he saw about what we see today, even though he may have lived as much as 4,000 years ago. Includes a 24-inch, full-color, pull-out poster! The latest edition of this handbook provides answers to questions on astronomy and the universe and contains the answers to ten new questions.

DeYoung explains how astronomy tells much about God's vast creation and His daily care for us.

This text investigates what the Bible has to say about astronomical objects and phenomena. The Bible contains many mentions of astronomical things, beginning with creation and concluding with end-time prophecies. Besides the sun and moon, the Bible names groups of stars, Orion, the Pleiades, and the bears. In addition to what the biblical record shows about astronomical phenomena, many people think that it teaches things that it actually does not teach. These concepts are examined in depth as well. Unique among books discussing the intersection of biblical text and astronomy because of the range of questions explored and answered definitive work that explores many popular questions and misconceptions about the universe and the Bible Sorts fact from fiction and truth from popular myths as the true purpose of these enigmatic lights in the

KNOWN AND HIGHLY RESPECTED CREATION SCIENTISTS DON DEYOUNG AND JOHN WHITCOMB SHARE THEIR KNOWLEDGE IN AN EASY-TO-COMPREHEND FORMAT. NEWLY REVISED AND EXPANDED, THE BOOK IS A DEFINITIVE WORK ON EARTH'S CLOSEST NEIGHBOR AND ITS CONTINUING FASCINATION AMONG EXPLORERS AND RESEARCHERS.

Unfortunately, modern evolutionary thinking in astronomy has caused many people to disconnect from the Bible's view of history, as they are taught that the universe is millions or even billions of years old. This book shows that the billions of evolutionary years taught in public schools are unnecessary and that one need only to look to the Creator of the Bible to explain the origin of the stars and the universe. Dr. Jason Lisle discusses and debunks popular evolutionary concepts such as the big bang and answers biblical questions like how the speed of light affects the Bible's account of history.

As the modern Church struggles to find a place of relevancy for a new generation that already has massive demands on its time and attention, more and more young people raised in the Church are leaving it - failing to find the answers to their questions of faith and life, beset with doubts raised by issues that the Church chooses not to address. called into question and reduced to a collection of mere stories.

Details the Bible-based homeschool teaching approach for parents, and discusses Christian education, learning styles, unit studies, bible study, and more.

In May 2014, Pope Francis revealed that, if Martians wanted to be baptized, he would welcome aliens to the Church. Vatican astronomer Guy Consolmagno and science historian Father Paul Mueller agree! *Would You Baptize an Extraterrestrial?* sheds provocative light on some of the strange places where religion and science meet. So, could you really baptize an extraterrestrial? And exactly how do you reconcile the scientific version of The Big Bang with the Genesis account of creation? Is there really life after death, and will the universe eventually die? What then? Does the Vatican know something regular people don't about an imminent end of the world? Why isn't Pluto a planet, and what did the Vatican have to do with that decision? Was the Star of Bethlehem just a pious religious story or an actual description of astronomical events? What really happened with the Church and Galileo? These questions and more will be explored in a book that will certainly shock and delight readers who love science and spirituality alike.

The Ambassador of God provides exhaustive and in-depth answers to very difficult questions about our

cosmic origin and the planet earth. Almost everything to do with the Sun, Moon, Stars, Water, Mars, Jupiter, Aliens... and most importantly - God
About the book and author

_____ God is real. And for the first time, experimental and observable science reveals his existence. Throughout history, many have argued the existence of God, yet discussions of the Divine have been limited to the realm of philosophy and religion. But what if nature could reveal its creator? And what if science could provide compelling evidences that we have never seen before? What if the identity of the creator behind the origin of our universe can be known for certain? What if... This is what The Ambassador of God, a ground breaking look at our cosmic origin, has provided. In this probing book, difficult questions are answered. As renowned scientists and thinkers challenge the biblical narratives for our cosmic origin, The Ambassador of God uncovers the mysteries that have been hidden from human eyes. Using compelling evidences from astronomy to investigate the underpinnings of the Bible, The Ambassador of God provides a 'cosmic objective certainty' for the existence of a universal Creator. Additionally, it unveils a well of exhaustive insights that eliminates ambiguities in our understanding. How is it possible that God is one and three distinct persons, but not three Gods? Why is the earth and

the human body mostly water? Who created the sun, moon and stars? What about aliens and the other solar planets? What is the mystery and purpose behind human existence and other life forms on our planet earth? Why are we here and how did we first arrive on this planet? How do we come to understand divinity in the current scheme of scientific reasoning? How do we make peace with the grand designer behind it all? Readers seeking answers to these questions (and other similar questions) will find them here. They will not find dogma. Instead, they will embark on a journey-an experimental voyage through the lens of science that reveals the mind of God. In a "show" rather than "tell" fashion and a template that's more coherent than any prevailing secular science view, we shall find who God is! Who is the Author? Olumide Sanya is a contemporary poet and writer. Beside poetry and writing, Lumi, as he is affectionately known, helps others to achieve their dreams as a life coach. Unusually drawn to books between the ages of 4 - 9, Lumi neither enjoyed reading nor read books but spent his childhood years looking for abandoned tomes that he turned into a formidable collection. Despite being a non-reader, he realised the dream of becoming a writer in his tender years and for more than 12 years, he abandoned this dream. ...Until one day, God paid him a visit. But it didn't start there, it began with falling in love and writing poems about love and

Read Free Astronomy And The Bible Questions And Answers

heartbreaks but that's another story for another year. "God has a sense of humor," says Lumi. "It's not hard to see that if you know my story-where I've been, where I'm at, and what God has planned for my tomorrow. What is most important to recognize is what God can do with a 'nobody' like me." The Ambassador of God, he notes, is not just about answers to large existential questions "It is also a road map that offers optimism and guidance in today's confused and increasingly complex modern world." You don't have to be a physics professor or a philosopher to understand Sanya's work. The Ambassador of God aims to open discussion and understanding at the broadest possible level. It is written for everyday people.

The author provides his perspective on the inerrancy of the Bible and the idea of a young universe. Are we alone in the Universe? Was there anything before the Big Bang? Are there other universes? What makes stars shine? Where does Earth's water come from? Why is the night sky dark? Was there ever life on Mars? How do telescopes work? This engaging guide book answers all these questions and hundreds more, making it a practical reference for anyone who has ever wondered what is out in the cosmos, where it all comes from, and how it all works. Richly illustrated in color throughout, it gives simple yet rigorous explanations in non-technical language, summarizing current astronomical

Read Free Astronomy And The Bible Questions And Answers

knowledge, without overlooking the important underlying scientific principles. This second edition includes substantial new material throughout, including the latest findings from the New Horizons, Rosetta, and Dawn space missions, and images from professional telescopes such as the Hubble Space Telescope and the Atacama Large Millimeter Array.

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 edition. Excerpt: ... ditions of things, like the telegraph wires and their conditions. From 1871 to 1884 the writer was in a great quandary about a name. He had a force, --had found a power, --but had no name for it. What are the sun and moon and planetary force to be called? For a better answer we call it Repulsion, as proposed by Prof. Norton; and now after thirteen years we find this repulsive force to be a good, and perhaps the best name for it. Newton's force is the Centripetal Force. Smith's force is the Centrifugal Force. But let us pass on to notice the positive in Celestial Mechanics. POSITIVE POLAR ECCENTRICITIES. Why does the South Pole drop so low and the North Pole rise so high? This question is one of the philosophical questions of the centuries past, and many presumptions have been proposed. But up to 1871 it stood in the

Read Free Astronomy And The Bible Questions And Answers

physical sciences as one of the most profound questions. Why, oh why, these Polar Eccentricities? WE ANSWER. In answer to this absorbing and philosophical question, we would say that it is a Physical Pressure on that part of the earth's surface, and so far south of its Equator that it holds the South Pole as with an iron positive Magnetic Power. That power is the Sun's Power. THE SUN'S POWER. A New Power Discovered in the Sun. In presenting this New Discovery, we are aware that we shall antagonize the accepted theories of preceding teachers, the early conception theories of scientific inquirers, and the published statements in the text books in the schools. To assail and to attempt to overthrow this triple wall, so to speak, may seem presumptuous; but we feel assured that our New Discovery is more than a theory --it is to us an established fact. And if we show that it is a fact, then it is more than a Theory. Yes, a Theorem....

Intended as a companion book to *The Created Cosmos: What the Bible Reveals About Astronomy*, the new book, *The Expanse of Heaven: Where Creation and Astronomy Intersect*, is a comprehensive treatment of astronomy, interpreted within the biblical model of creation. It begins with a chapter on ancient cosmologies, and concludes with a chapter on modern cosmology. In between are chapters on the appearance of astronomical bodies in the sky, discussions of the moon, the earth and
