It is 2033, and the world as Jim knows it is suddenly spinning wildly out of control. Sudden hyperinflation shocks everyone. As panic sets in, the value of the dollar plummets and the resulting devastation causes the United States to splinter into several countries, all of which adopt democratic rules except the Federated States, the one in which Jim Reed and girlfriend Linda Alonzo live. They find themselves citizens of a country governed by a white-supremacist dictatorship. Jim Reed joins a group of African American insurgents and finds himself involved in dangerous, bold attacks on Federated States targets. The insurrection causes the Federated States government to intern or exile the entire Federated States African American population. Reed goes into exile and as he recruits like-minded people to join together with the intent to destroy the Federated States Supremacist government, he conceives a plan that may just become the world's greatest act of terrorism.

Photographic imagery has come a long way from the pinhole cameras of the nineteenth century. Digital imagery, and its applications, develops in tandem with contemporary society's sophisticated literacy of this subtle medium. This book examines the ways in which digital images have become ever more ubiquitous as legal and medical evidence, just as they have become our primary source of news and have replaced paper-based financial documentation. Crucially, the contributions also analyze the very profound problems which have arisen alongside the digital image, issues of veracity and progeny that demand systematic and detailed response: It looks real, but is it? What camera captured it? Has it been doctored or subtly altered? Attempting to provide answers to these slippery issues, the book covers how digital images are created, processed and stored before moving on to set out the latest techniques for forensically examining images, and finally addressing practical issues such as courtroom admissibility. In an environment where even novice users can alter digital media, this authoritative publication will do much to stabilize public trust in these real, yet vastly flexible, images of the world around us.

Despite the fact that the majority of emigration today originates in the global south, most research has focused on the receiving states of Europe and North America, while very little attention has been paid to the policies of the sending states toward emigration or toward their nationals abroad. Taking the country cases of Morocco, Tunisia, Lebanon and Jordan, this work explores the relationship between the government of the sending states, the outmovement of their citizens and the communities of expatriates that have developed. By focusing on the evolution of government institutions charged with various aspects of expatriate affairs, this work breaks new ground in understanding the changing nature of the relationship between expatriates and their home state. Far from suggesting that the state is waning in importance, the conclusions indicate that this relationship provides evidence both of state resilience and of new trends in the practice of sovereignty.

It's a plain fact: regardless of how smart, creative, and innovative your organization is, there are more smart, creative, and innovative people outside your organization than inside. Open source offers the possibility of bringing more innovation into your business by building a creative community that reaches beyond the barriers of the business. The key is developing a web-driven community where new types of collaboration and creativity can flourish. When Jesus died, the veil was rent and God went public. In an ever changing world where the darkness prides itself by proclaiming they have psychic insights for every person, the church has become anemic, without as much as a sign, a miracle or a wonder. Where do we go from here? Faith is at a level the church has never known before. It is a faith being seen in the "here and now." We must understand what Jesus meant when He said, "I only do what I hear and what I see My Father do and say." You are about to enter that eternal zone, where time is losing its grip on the earth. Eternity is Invading Time.
