This title offers a clear overview for masters level students and those new to transnational commercial law, examining the process for transnational transactions in practical terms. It begins by discussing how the jurisdiction for legal rules is chosen in commercial conflict of laws situations, considering questions of forum, applicable law and recognition of judgments. It then moves on to questions of harmonisation and unification, looking at whether it is possible to introduce legal rules specifically for transnational transactions which are agreed between different jurisdictions and which would be substituted for the diverse provisions of national laws.

Contract as Promise is a study of the philosophical foundations of contract law in which Professor Fried effectively answers some of the most common assumptions about contract law and strongly proposes a moral basis for it while defending the classical theory of contract. This book provides two purposes regarding the complex legal institution of the contract. The first is the theoretical purpose to demonstrate how contract law can be traced to and is determined by a small number of basic moral principles. At the theory level the author shows that contract law does have an underlying, and unifying structure. The second is a pedagogic purpose to provide for students the underlying structure of contract law. At this level of doctrinal exposition the author shows that structure can be referred to moral principles. Together the two purposes support each other in an effective and comprehensive study of contract law. This second edition retains the original text, and includes a new Preface. It also includes a substantial new essay entitled Contract as Promise in the Light of Subsequent Scholarship--Especially Law

Atiyah's Introduction to the Law of Contract is a well-known text through which thousands of university students have first encountered the law of contract, and the new edition has long been eagerly awaited by university teachers and students. This sixth edition, updated by Stephen Smith, continues to provide readers with an introduction to the theories, policies, and ideas that underlie the law, placing an equal emphasis on the law and critical analysis. In particular, the discussion of recent cases and legislation is centred on why contract law is the way it is, whether it can be justified, and, if not, what should be done to improve it. The sixth edition has been revised to place the law of contract in a modern context and to account for recent developments in the law, as well as those in academic thinking and writing. Addressing European influences and including perspectives from comparative law, this remains a stimulating and authoritative exposition of the modern law of contract.

A man slips on a dance floor and breaks his leg. He recovers damages. A child has both legs amputated as a result of meningitis and is awarded nothing. The law's justification for awarding damages in the first case is that the man's injury was the fault of someone else, while in the second case damages are denied because nobody was at fault. In this searching critique of the present law and practice relating to damages, Professor Patrick Atiyah shows that this system is in fact a lottery. He contends that the public are paying far too much for an unfair and inefficient insurance system and that reform is long overdue. His conclusion

is that actions for damages for injuries should be abolished and replaced with a new no-fault road accident scheme, and actions for other injuries should be dealt with by individual or group insurance policies.

Goods (CISG) and its role in the unification of global sales law. It reviews the substance of CISG rules and analyzes alternative interpretations. A comparative analysis is given of how countries have accepted, interpreted, and applied the CISG. Theoretical insights are offered into the problems of uniform laws, the CISG's role in bridging the gap between the common and civil legal traditions, and the debate over good faith in CISG jurisprudence. The book reviews case law relating to the interpretation and application of the provisions of the CISG; analyzes how it has been recognized and implemented by national courts and arbitral tribunals; offers insights into problems of uniformity of application of an international sales convention; compares the CISG with the English Sale of Goods Act and places it in the context of other texts of UNCITRAL; and analyzes the CISG from the practitioner's perspective.

Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages

with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

First published in 1952, professor Strawson's highly influential Introduction to Logical Theory provides a detailed examination of the relationship between the behaviour of words in common language and the behaviour of symbols in a logical system. He seeks to explain both the exact nature of the discipline known as Formal Logic, and also to reveal something of the intricate logical structure of ordinary unformalised discourse.

"Once more, we were delighted to take on the task of updating this text for its 14th edition, having taken over editorial responsibilities from the late John Adams from the 13th edition. In our preface to the previous edition, we recorded the sudden passing of Professor Adams. Sadly, in this preface, we must note another passing: on 30 March 2018, Patrick Atiyah, who wrote the 1st-8th editions of this book and continues to give the book its name, passed away at the age of 87. Patrick was one of those giants of academic contract law whose contributions continue to be read and to inspire scholars everywhere. We are both mindful of our task to

maintain the scholarly rigour which he gave to this book as we take it into the future. This edition is also the first time since the 9th edition without a Scottish editor. Professor Hector MacQueen had been responsible for adding Scottish content since the 10th edition (2001), but decided that he would discontinue this role after the 13th edition was published in 2016. We are very grateful for Hector's contributions to the work. On the advice of the book's publishers, this edition has been put together without the benefit of a Scottish editor, although we have, of course, continued to take decisions from the Scottish courts into account in updating the various chapters. Since the last edition was published, there have been few major developments in the law on the sale of goods, aside from the difficult ruling by the Supreme Court in *PST Energy 7 Shipping LLC v OW Bunker Malta Ltd* [2016] UKSC 23 (which arrived too late for proper consideration in the previous edition). We have updated the text in light of recent cases and academic writings where appropriate. Furthermore, we have continued our task of streamlining the running order of the chapters, and we have sought to make gentle updates to the language of the book, preserving its rigour but ensuring it remains accessible to a contemporary audience. In some instances, we have curtailed or removed altogether the detailed discussion of the pre-1994 case-law which had become redundant as a result of the changes made to the Sale of Goods Act at that time. The rise of digital technology and new business models in the digital economy will invariably have an impact on the law concerning the sale of goods, but at this point, the real impact is not yet known. In some places, we have alluded to the possible significance of digital technology, and this could well become a more significant theme in future editions"--

systems. Leading scholars from both sides of the Atlantic provide works of original scholarship focusing on current debates and trends from the two dominant common law systems. The chapters approach the subject areas from a variety of perspectives - doctrinal analysis, law and economic analysis, and social-legal studies, as well as other theoretical perspectives. The book covers the major themes that underlie the key debates relating to commercial contract law: role of consent; normative theories of contract law; contract design and good faith; implied terms and interpretation; policing contract behavior; misrepresentation, breach, and remedies; and the regional and international harmonization of contract law. Contributors provide insights on the many commonalities, but more interestingly, on the key divergences of the United States and United Kingdom's approaches to numerous areas of contract law. Such a comparative analysis provides a basis for future developments and improvements of commercial contract law in both countries, as well as other countries that are members of the common law systems. At the same time, insights gathered here should also be of interest to scholars and practitioners of the civil law tradition.
