

Attendees Of The Conference Sponsored By The Mgm Resorts

Do your conference programs contain sessions you belatedly discover were of little interest or value to most attendees? If so, you're wasting significant stakeholder and attendee time and money - your conference is simply not as good as it could be. Now imagine you knew how to create conference programs that reliably include the sessions and session content attendees actually want and need. How much value would that add to your event, for your attendees, your sponsors, and your bottom line? *Event Crowdsourcing: Creating Meetings People Actually Want and Need* shows you how to create conference programs and sessions that reliably become what your attendees want and need. The product of over 25 years of participant-driven meeting design experience, *Event Crowdsourcing* clearly explains everything you need to know to successfully integrate effective real-time event crowdsourcing into your programs and sessions. Buy *Event Crowdsourcing* to learn: Why it's so important to create conference programs and sessions that attendees want and need. When to use event crowdsourcing for your meetings and sessions. How to choose the right crowdsourcing approach for your specific needs. *Event Crowdsourcing* contains: A comprehensive compendium of crowdsourcing techniques that will radically improve your meetings. Clear descriptions of the preparation and resources needed to ensure successful implementation. Detailed implementations for each technique, including sample scripts and options to cover your specific needs. "Adrian Segar's first two books - *Conferences That Work* and *The Power of Participation* - have had a resoundingly positive impact on the meeting industry. Now, meeting planners and meeting-goers can further benefit from his newest book: *Event Crowdsourcing*. This book, both a why-to and a how-to, is jam-packed with proven guidelines, techniques, and suggested scripts to help you design conferences and sessions that are what attendees want and need. It's clearly organized and beautifully written, and I'm happy to recommend it." - Naomi Karten, author of *Managing Expectations*, *Presentation Skills for Technical Professionals*, and other books "Actually giving attendees what they want and need instead of what you think they want? What a concept! Adrian Segar has done it again. *Event Crowdsourcing* is chock-full of detailed descriptions of low-tech, low-cost solutions that get to the core concerns of meeting-goers from any industry. It's a must read for any meeting planner!" -Brandt Krueger, technical producer, educator, speaker, and event technology consultant "For meeting designers like us, Adrian's work is priceless. He meticulously documents all there is to understand about crowdsourcing, participation, peer-to-peer working, and empowerment of conference audiences. His unique views on these topics make it easy to recognize his training as a former physicist, his facilitation skills, and his belief in what we humans can achieve together." -Eric de Groot and Mike van der Vijver, meeting designers with *MindMeeting*, and authors of *Into the Heart of Meetings* "Adrian Segar is a leader in crafting the future of meetings. *Event Crowdsourcing* is the go-to tactical guide for planners to allow attendees to create their own meaningful experiences. In a world where everyone is talking about why events need to generate connection and engagement, Adrian has written the how-to guide for you." -Will Curran, founder, *Endless Events*, and #EventIcons, *Event Tech*, and *Event Brew* podcast host

THE BEST RESOURCE AVAILABLE FOR FINDING A LITERARY AGENT No matter what you're writing--fiction or nonfiction, books for adults or children--you need a literary agent to get the best book deal possible from a traditional publisher. *Guide to Literary Agents 2016* is your essential resource for finding that literary agent and getting your book bought by the country's top publishers. Along with listing information for more than 1,000 literary agents who represent writers and their books, this new, updated edition of *GLA* includes: • A one-year subscription to

the literary agents content on WritersMarket.com.* • Secrets to why agents stop reading your submission. Four literary agents review writers' unpublished first pages and give honest feedback. The agents examine 10 different first-page submissions and explain if and when they would stop reading. • "New Agent Spotlights"--profiles of literary reps actively building their client lists right now. • Success stories: 13 debut authors explain their paths to publication so you can learn from their success and see what they did right. • Answers to 19 frequently asked questions about query letters and submissions. • Informative how-to articles on synopsis writing, voice and craft, characters, platform and blogging, nonfiction book proposals, and more. + Includes exclusive access to the webinar "30 Tips for Getting an Agent" by Elizabeth Kracht of Kimberly Cameron & Associates *Please note: The e-book version of this title does not include a one-year subscription to WritersMarket.com. "The first book I ever bought when I began my publishing journey was the Guide to Literary Agents. And it's one of the first things I recommend to any aspiring writer." --Renee Ahdieh, author of *The Wrath and the Dawn* (2015), the first of a two-book deal from Penguin/Putnam "I found my literary agent in *Guide to Literary Agents*. The GLA was one of the best writing investments I ever made." --Jessica Lidh, author of debut novel *The Number 7* (Merit Press)

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Where do you find money in today's money-tight world? If you are a producer of events, community activities, sports, parades, park and recreation activities ... Anything that attracts the general public for recreation ... You should read this book. *HOW TO BE SUCCESSFUL AT SPONSORSHIP SALES* gives you a roadmap that guarantees your success in finding money for your projects. How do you sell sponsorship? What do sponsors want? How do you determine what benefits are of greatest value to a sponsor? Where do you find sponsors? How do you talk to them? Are you a for profit or non profit organization? This book provides all the tools you need ... even gives you the words to use on a sales call! Sample contracts, how to price your event, where to find guaranteed sponsors for an event...the book them all and more. Written by a professional sponsorship salesperson, Sylvia Allen, the book takes you through the money soliciting/sales process, step by step. Discover how to maximize your selling time while ensuring that you deliver 150% to your sponsors. The book is a staple with colleges teaching event marketing and management. Make it a staple on your bookshelf too.

Create more robust applications with a test-first approach to JavaScript *Reliable JavaScript, How to Code Safely in the World's Most Dangerous Language* demonstrates how to create test-driven development for large-scale JavaScript applications that will stand the test of time and stay accurate through long-term use and maintenance. Taking a test-first approach to software architecture, this book walks you through several patterns and practices and explains what they are supposed to do by having you write unit tests. Write the code to pass the unit tests, so you not only develop your technique for structuring large-scale applications, but you also learn how to test your work. You'll come away with hands-on practice that results in code that is correct from the start, and has the test coverage to ensure that it stays correct during subsequent maintenance. All code is provided both in the text and on the web, so you can immediately get started designing more complete, robust applications. JavaScript has graduated from field-validation scripts to full-scale applications, but many developers still approach their work as if they were writing simple scripts. If you're one of those developers, this book is the solution you need to whip your code into shape and create JavaScript applications that work. Write more concise and elegant code by thinking in JavaScript Test the implementation and use of common design patterns Master the use of advanced JavaScript features Ensure your code's conformance to your organization's standards If you're ready to

step up your code and develop more complete software solutions, Reliable JavaScript is your essential resource.

Welcome to Middleware'98 and to one of England's most beautiful regions. In recent years the distributed systems community has witnessed a growth in the number of conferences, leading to difficulties in tracking the literature and a consequent loss of awareness of work done by others in this important field. The aim of Middleware'98 is to synthesise many of the smaller workshops and conferences in this area, bringing together research communities which were becoming fragmented. The conference has been designed to maximise the experience for attendees. This is reflected in the choice of a resort venue (rather than a big city) to ensure a strong focus on interaction with other distributed systems researchers. The programme format incorporates a question-and-answer panel in each session, enabling significant issues to be discussed in the context of related papers and presentations. The invited speakers and tutorials are intended to not only inform the attendees, but also to stimulate discussion and debate.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

The use of contextually aware, pervasive, distributed computing, and sensor networks to bridge the gap between the physical and online worlds is the basis of mobile social networking. This book shows how applications can be built to provide mobile social networking, the research issues that need to be solved to enable this vision, and how mobile social networking can be used to provide computational intelligence that will improve daily life. With contributions from the fields of sociology, computer science, human-computer interaction and design, this book demonstrates how mobile social networks can be inferred from users' physical interactions both with the environment and with others, as well as how users behave around them and how their behavior differs on mobile vs. traditional online social networks.

The only guide written exclusively for this specialized market, this title provides the most up-to-date marketing resource information available to beginning and advanced writers, freelancers, editors, publishers, publicists, and all others interested in, or involved with, writing.

Methods presents state-of-the-art information and methodological examples from the field of survey research. Although there are other "how-to" guides and references texts on survey research, none is as comprehensive as this Encyclopedia, and none presents the material in such a focused and approachable manner. With more than 600 entries, this resource uses a Total Survey Error perspective that considers all aspects of possible survey error from a cost-benefit standpoint.

A handbook for administrative assistants and secretaries covers such topics as telephone usage, keeping accurate records, making travel arrangements, e-mail, office equipment and computers, Microsoft Office, business documents, and language usage. Evidence-Based Practice: An Integrative Approach to Research, Administration, and Practice, Third Edition focuses on how research-based evidence drives scholarly practice.

These new essays, relevant for a variety of fields--history, women's studies, STEM, and family and consumer sciences itself--take current and historical perspectives on home economics philosophy, social responsibility, and public outreach; food and clothing; gender and race in career settings; and challenges to the field's identity and continuity. The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

An energy tycoon, real estate developer, and philanthropist, George P. Mitchell is also an idealist, a big thinker who gave his time and fortune to the study of sustainability long before it became a household word. Jurgen Schmandt, who has worked for Mitchell for many years, explains and traces the idea of a sustainable society, from its origin in the eighteenth-century concept of the "commons" to its twentieth-century iteration in the 1987 United Nations report "Our Common Future." He then chronicles Mitchell's commitment to this idea from the early 1960s, when the focus was on population growth, to today, when climate change and global warming dominate the debate. Mitchell advanced his belief that humankind could create "a balance between economic and ecological well-being" by organizing and hosting conferences, awarding prizes, supporting scholars and scientists, and funding research and publications. He did it at the Aspen Institute, at The Woodlands Conferences, at the National Academy of Sciences, at the Mitchell Center for Sustainable Development, and at the Houston Advanced Research Center. (Paradoxically, he did not always do it in his own energy company.) Documenting one important man's engagement with one important idea, Schmandt has preserved a significant episode in the ongoing quest to create societies that are "capable of reaching and then sustaining a decent quality of life for their citizens."

In today's fast-paced world, with multiple demands on time and resources as well as pressures for career advancement and productivity, self-directed learning is an increasingly popular and practical alternative in continuing education. The Encyclopedia of Distributed Learning defines and applies the best practices of contemporary continuing education designed for adults in corporate settings, Open University settings, graduate coursework, and in similar learning environments. Written for a wide audience in the distance and continuing education field, the Encyclopedia is a valuable resource for deans and administrators at universities and colleges, reference librarians in academic and public institutions, HR officials involved with continuing

education/training programs in corporate settings, and those involved in the academic disciplines of Education, Psychology, Information Technology, and Library Science. Sponsored by The Fielding Graduate Institute, this extensive reference work is edited by long-time institute members, bringing with them the philosophy and authoritative background of this premier institution. The Fielding Graduate Institute is well known for offering mid-career professionals opportunities for self-directed, mentored study with the flexibility of time and location that enables students to maintain commitments to family, work, and community. The Encyclopedia of Distributed Learning includes over 275 entries, each written by a specialist in that area, giving the reader comprehensive coverage of all aspects of distributed learning, including use of group processes, self-assessment, the life line experience, and developing a learning contract. Topics Covered Administrative Processes Policy, Finance and Governance Social and Cultural Perspectives Student and Faculty Issues Teaching and Learning Processes and Technologies Technical Tools and Supports Key Features A-to-Z organization plus Reader's Guide groups entries by broad topic areas Over 275 entries, each written by a specialist in that area Comprehensive index and cross-references between entries add to the encyclopedia's ease of use Annotated listings for additional resources, including distance learning programs, print and non-print resources, and conferences This comprehensive introduction to the field represents the best of the published literature on groupware and computer-supported cooperative work (CSCW). The papers were chosen for their breadth of coverage of the field, their clarity of expression and presentation, their excellence in terms of technical innovation or behavioral insight, their historical significance, and their utility as sources for further reading. Taken as a whole, the papers and their introductions are a complete sourcebook to the field. This book will be useful for computer professionals involved in the development or purchase of groupware technology as well as for researchers and managers. It should also serve as a valuable text for university courses on CSCW, groupware, and human-computer interaction.

Covers cutting-edge techniques for small and large businesses alike. Author is an in-demand consultant with strong media connections.

This book will get librarians writing by dispelling the mythos surrounding "scholarly writing" by providing practical tools and advice. Though the authors have extensive experience as scholars, this book is written in a friendly, approachable, non-intimating manner.

This guidebook will help airport managers with small or minimal budgets to develop a marketing program for their general aviation or commercial service airport. The Guidebook discusses the basics of marketing, takes the reader through the process of developing and implementing a plan, presents approaches to marketing and public relations, provides worksheets and concludes with a selection of instructive case studies. The Guidebook provides ideas about how to regularly communicate with tenants and the community, how to effectively position the airport in the region, and how to develop and retain airport activity. Airport managers and those responsible for marketing and working with communities will find many useful worksheets and tools to assess their individual situation, set goals, and select from low cost strategies to deliver their message. This well-researched guidebook, with its easy to use techniques and worksheets along with real-world examples, will help those in the airport community to

create and sustain a positive and persuasive airport identity and message. The seven-volume set LNCS 12261, 12262, 12263, 12264, 12265, 12266, and 12267 constitutes the refereed proceedings of the 23rd International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2020, held in Lima, Peru, in October 2020. The conference was held virtually due to the COVID-19 pandemic. The 542 revised full papers presented were carefully reviewed and selected from 1809 submissions in a double-blind review process. The papers are organized in the following topical sections: Part I: machine learning methodologies Part II: image reconstruction; prediction and diagnosis; cross-domain methods and reconstruction; domain adaptation; machine learning applications; generative adversarial networks Part III: CAI applications; image registration; instrumentation and surgical phase detection; navigation and visualization; ultrasound imaging; video image analysis Part IV: segmentation; shape models and landmark detection Part V: biological, optical, microscopic imaging; cell segmentation and stain normalization; histopathology image analysis; ophthalmology Part VI: angiography and vessel analysis; breast imaging; colonoscopy; dermatology; fetal imaging; heart and lung imaging; musculoskeletal imaging Part VI: brain development and atlases; DWI and tractography; functional brain networks; neuroimaging; positron emission tomography

The Long Road Home is a companion work to the recently published book on the prisoner of war experience in Southeast Asia-Honor Bound by Stuart I. Rochester and Frederick Kiley. The two books were prepared at the request of former Deputy Secretary of Defense William P. Clements, Jr. Some of the early research and drafts of a few chapters are the contribution of Wilber W Hoare, Jr., and Ernest H. Giusti, former JCS historians who helped initiate the project. Davis carried forward the research and writing to completion over a period of many years and is entitled to the fullest credit for production of the final text and documentation. This history of Washington's role in shaping prisoner of war policy during the Vietnam War reveals the difficult, often emotional, and vexing nature of a problem that engaged the attention of the highest officials of the U.S. government, including the president. It examines frictions and disagreements between the State and Defense Departments and within Defense itself as a sometimes conflicted organization struggled to cope with an imposing array of policy issues: efforts to ameliorate the brutal conditions to which the American captives were subjected; relations with families of prisoners in captivity; the proper mix of quiet diplomacy and aggressive publicity; and planning for the prisoners' return. At a pivotal juncture the Department of Defense exerted a major influence on overall policy through its insistence in 1969 that the government "Go Public" with information about the plight of prisoners held by the North Vietnamese and the Viet Cong. There is evidence that this powerful campaign contributed to the gradual improvement in the treatment of the prisoners and to their safe return in 1973. The detailed account of negotiations with the North Vietnamese for the withdrawal of American forces from South Vietnam makes clear how important in all U.S. calculations was securing the release of the prisoners. Identifies approximately one thousand markets for Christian writers, including book publishers and periodicals, each with contact information and submission guidelines, and includes listings of literary agents, poetry, greeting card, music, and photography markets, and contests.

This book constitutes the refereed proceedings of the 15th International Conference
