“Dr. Phil,” Canada’s best-known automotive expert, invites another driver to come aboard. After forty-six years and almost two million copies sold, Phil Edmonston is joined by a co-pilot for the Lemon-Aid Guide — George Iny, along with the editors of the Automobile Protection Association. The 2017 Lemon-Aid has everything: an encyclopedic lineup of the best and worst cars, trucks, and SUVs sold since 2007; secret warranties and tips on the “art of complaining” to help you get your money back; and new-car buying tips that will save you tons of money by revealing the inflated cost of fancy and frivolous add-ons. Lemon-Aid is an essential guide for careful buyers and long-time gear-heads who don't know as much as they think.

La contabilizzazione dei costi del personale rappresenta, anche per gli addetti ai lavori, un'operazione non sempre facile e spesso fonte di dubbi: la presente guida ha l'obiettivo di illustrare, in maniera semplice e mediante l'ausilio di esempi pratici, come contabilizzare il costo del personale, evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio – soprattutto in presenza di eventi particolari, come la malattia, gli infortuni e così via – e alle conseguenti ripercussioni, in termini di imposizione fiscale. In virtù di questa considerazione, al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte, è necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi, al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina, alle cui fondamentali soggiacciono i principi contabili, si caratterizza per il gran numero di esempi – che, di fatto, rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda – volti a consentire un rapido approccio al lettore, soprattutto in quelle situazioni di particolare urgenza, come nel caso di dover calcolare il costo per esigenze di budget. Viene, infine, proposto un caso concreto di contabilizzazione del costo, partendo dal cosiddetto “cedolone”, vale a dire il riassunto avvenuto nel periodo di lavoro considerato. Going green is the new black for big business. But how real is the climate-friendly revolution that's being advertised? Toyota reckons Mother Nature drives a Prius, Ford wants us to 'Join the Green Revolution', and McDonald's has painted its famous golden arches green. Facebook has even 'friended' Greenpeace. But are big brands and the celebrities endorsing them really as green as they claim? In Greenwash, in the tradition of Fast Food Nation and No Logo, Guy Pearse looks behind the corporate façade - and what he finds will startle you. Nothing is sacred and no one is safe from scrutiny in this exposé of carbon scams: not the Prius or the Nissan LEAF, not the World Wildlife Fund or Earth Hour, not Oprah or Leonardo DiCaprio. For consumers trying to shop the planet green, Greenwash is a wake-up call. It's also an entertaining and practical book that helps consumers to pick the truly green businesses from the greenwashers and to demand a higher environmental standard from all. 'Guy Pearse travels the sewers of misinformation to show us exactly how, from banks to airlines, there's a growth industry in green horseshit. But, after hosing himself off, Pearse also presents us with a far more thoughtful analysis than I've read in other exposés of greenwashing.' --Raj Patel, author of Stuffed and Starved and the New York Times bestseller The Value of Nothing 'Before I read Greenwash I thought I could no longer be shocked by the skulduggery of the marketers. How wrong I was. Read Greenwash to be reminded why advertising is called the dark art and how marketing has become the most destructive force on the planet.' --Clive Hamilton, author of Affluenza and Requiem for a Species '[Greenwash] contains some brilliant exposés of capital scamming the unwary consumer, giving them a green hoodwink while continuing opposite practices elsewhere.' --Adelaide Review 'Guy Pearse's welcome book reveals the difficulty of judging the benefits and real environmental costs of the way we live.' --David Suzuki 'If you want to know how to pick the true greenies from the fakers, this book is for you.' --Green Lifestyle

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

Toyota would like us to think that Mother Nature drives a Prius, Ford wants us to "Join the Green Revolution," and McDonald's has painted its golden arches green. Facebook has even "friended" Greenpeace. All across the globe big corporations are spending big bucks trying to convince us that their policies, actions, and products are earth friendly.
