The ultimate used car guide lists the best and worst used cars, summarizes the marketplace, shares advice on web shopping, discusses author insurance, and shares tips on buying and selling. Original. This volume comprises papers from the following ?ve workshops that were part of the complete program for the International Conference on Extending Database Technology (EDBT) held in Heraklion, Greece, March 2004: • ICDE/EDBT Joint Ph. D. Workshop (PhD) • Database Technologies for Handling XML-information on the Web (DataX) • Pervasive Information Management (PIM) • Peer-to-Peer Computing and Databases (P2P&DB) • Clustering Information Over the Web (ClustWeb) Together, the ?ve workshops featured 61 high-quality papers selected from approximately 180 submissions. It was, therefore, difficult to decide on the papers that were to be accepted for presentation. We believe that the accepted papers substantially contribute to their particular ?elds of research. The workshops were an excellent basis for intense and highly fruitful discussions. The quality and quantity of papers show that the areas of interest for the workshops are highly active. A large number of excellent researchers are working on the aforementioned ?elds producing research output that is not only of interest for other researchers but also for industry. The organizers and participants of the workshops were highly satisfied with the output. The high quality of the presenters and workshop participants contributed to the success of each workshop. The amazing environment of Heraklion and the location of the EDBT conference also contributed to the overall success. Last, but not least, our sincere thanks to the conference organizers – the organizing team was always willing to help and if there were things that did not work, assistance was quickly available.

Covers all U.S. and Canadian models of Volkswagen Passat and Audi A4; 1.8L four-cylinder turbo and 2.8L V6 engines.

The third volume in the VARGReB series explores different aspects of varying argument realization in Baltic. It presents original studies on differential marking of both core and non-core verbal arguments, on argument structures of nouns and the encoding of nominal arguments, as well as on constructions reflecting the expansion of argument structure through the addition of causative, resultative or applicative predications. The discussion of phenomena of argument realization and marking often touches on fundamental problems of syntax and the syntax-semantics interface, such as the putative locality of case assignment, event-structural factors determining case marking, the inheritance of argument structure across phrase types, or the status of arguments and adjuncts. The contributions to this volume use different approaches and frameworks to analyze a wealth of authentic data from contemporary Latvian and Lithuanian.

This is the only book that completely lists accurate technical data for all cars imported into the U.S. market from 1946-2000. With many imports approaching the antique status, this book will be a big seller across all generations of car enthusiasts. From the grandiose European carriages of the late Forties to the hot, little Asian imports of the Nineties, every car to grace American roadways from across the Atlantic and Pacific is carefully referenced in this book. &#x2013;&#x2013; Foreign car devotees will appreciate the attention
