This unique volume provides new perspectives on assessing the performance of nonprofit organizations whilst meeting the information needs of decision-makers, both internal (such as resource-providers, regulators and clients), and external (including boards, managers, staff and volunteers). Whilst most discussions of accountability focus exclusively on financial accountability, this title offers a significant contribution to a relatively untouched area by combining the treatment of both evaluation and accountability from a managerial perspective. With increased interest in the concept that nonprofit organizations must be accountable, this topical volume fills a gap in the literature that postgraduates and scholars of business studies and management will find invaluable.

Auditing and Assurance Services Prentice Hall

Principles of Auditing presents auditing from the perspective of an integrated audit complying the Sarbanes Oxley Act (SOX), under the standards of the Public Companies Accounting Oversight Board. It is the first textbook completely authored after SOX, and consequently uses the integrated audit model throughout. In addition, this text also facilitates an understanding of audits of non-public companies. A primary focus is the need for auditors to understand their clients and their industries. Highlighted illustrative industries include: health care providers, retail enterprises, the automotive industry, and the land development and home building industry.

This new edition is written with two major objectives: (1) to help students understand audit decision making and evidence accumulation, and (2) to reflect changes in the profession by integrating assurance and attestation services as well as risk issues. This 6th edition introduces two new tools that practitioners use to assess risk and to identify assurance service opportunities: Client Strategy Templates and Balanced Scorecards.
