

Automobile Industry And Performance Of Key Players

Dr. Babar Zamaan Mohammed

Global Players and the Indian Car Industry Jatinder Singh, 2018-09-03 This book is one of the first critical analyses of the automobile industry in India. It studies the sector in general and the passenger car industry in particular, and provides valuable insights into the operation of Foreign Direct Investment (FDI) companies in a technology-intensive industry under changing economic regimes. The volume underlines the influence of the changing nature of foreign investment, the impact of economic reforms, technology regimes and industrial policy on growth, structural changes and development. It offers a detailed account of the trade performance of manufacturers in India's passenger car industry. It also looks at successful cases to draw policy lessons towards encouraging quality FDI and developing India as a base for world production. A useful addition to industry studies in India, this book with its wide coverage and contemporary analyses will interest scholars and researchers of economics, Indian economy and industrial policy, industrial economics, automobile industry and manufacturing sector, development economics and international economics. It will also appeal to policymakers, practitioners and industrial associations.

Automotive Fuel Economy National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Fuel Economy of Automobiles and Light Trucks, 1992-02-01 This volume presents realistic estimates for the level of fuel economy that is achievable in the next decade for cars and light trucks made in the United States and Canada. A source of objective and comprehensive information on the topic, this book takes into account real-world factors such as the financial conditions in the automotive industry, costs and benefits to consumers, and marketability of high-efficiency vehicles. The committee is composed of experts from the fields of science, technology, finance, and regulation and offers practical evaluations of technological improvements that could contribute to increased fuel efficiency. The volume also examines potential barriers to improvement, such as high production costs, regulations on safety and emissions, and consumer preferences. This practical book is of considerable interest to car and light truck manufacturers, policymakers, federal and state agencies, and the public.

Productivity Growth in the Manufacturing Sector Mihir Kumar Pal, 2021-06-03 The growth of manufacturing industries is one of the key sectors in helping to mitigate global recessions. Productivity Growth in the Manufacturing Sector thoroughly discusses issues and potential remedies of this sector for a range of international countries.

Decision Drivers An in-depth study of factors influencing premium car buyers Dr. Babar Zamaan Mohammed ,2021-06-23 Is it the appearance? The brand name? Performance? Or is it something much deeper? In this book, Dr. Babar Zamaan identifies the factors that influence prospective premium car buyers. A must read for marketing students, and professionals in the automobile industry.

U.S. Automotive Industry Stephen Cooney, Brent D. Yacobucci, 2007 Over one million Americans are employed in manufacturing motor vehicles, equipment and parts. But the industry has changed dramatically since the U.S. Big Three motor vehicle corporations (General Motors, Ford and Chrysler) produced the overwhelming majority of cars and light trucks sold in the United States, and directly employed many people themselves. By 2003, most passenger cars sold in the U.S. market were either imported or manufactured by foreign-based producers at new North American plants (so-called transplant facilities). The Big Three now dominate only in light trucks, and are also now being challenged there by the foreign brands. The Big Three have shed about 600,000 U.S. jobs since 1980, while about one-quarter of Americans employed in automotive manufacturing (nearly 300,000) work for the foreign-owned companies. It is clear that the U.S. automotive industry has undergone many drastic changes that have had a net adverse effect on American interests. This book examines the causes of these changes. Congressional acts, increasingly stringent emission laws, the effects of NAFTA, labour unions and globalisation are all within the scope of this book.

The Global Automotive Industry Paul Nieuwenhuis, Peter Wells, 2015-10-12 The automotive industry is still one of the world's largest manufacturing sectors, but it suffers from being very technology-focused as well as being relatively short-term focused. There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it. The Global Automotive Industry addresses this need and is a first port of call for any academic, official or consultant wanting an overview of the state of the industry. An international team of specialist researchers, both from academia and business, review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector, closely tied in with the fortunes of both established and newly emerging economies. In doing so, it covers issues related to manufacturing, both established practices as well as new developments; issues relating to distribution, marketing and retail, vehicle technologies and regulatory trends; and, crucially, labour practices and the people who build cars. In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends, as the technological, marketing and labour practice responses to those, leading in many cases to the development of new business models. Key features Provides a global overview of the automotive industry, covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry, including globalization, economic and environmental sustainability The

Global Automotive Industry is a must-have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools, governments, and graduate and undergraduate students in automotive engineering.

Evaluation of Supply Chain Performance Liliana Avelar-Sosa,Jorge Luis García-Alcaraz,Aidé Aracely Maldonado-Macías,2018-06-30 This book provides some regional aspects considered by manufacturing firms in their decisions to gain competitiveness and have effects on the performance of their supply chains (SC). Some of the main aspects considered are: government's policies, fixed costs, the availability and quality of infrastructure services. This book also discusses the risks for the SC; based on a perception approach, some aspects studied are: demand, suppliers and production processes and how these are related to other elements of the SC. The authors use structural modeling to analyze the evaluation of some manufacturing practices and their impact on customer service satisfaction, agility and flexibility of the SC. The context of this study is immersed in the Mexican manufacturing industry of exportation, also known as maquiladora industry of Ciudad Juarez, México. This borderland is among the top 10 manufacturing Mexican cities. World class industries are located in this region and have been recognized around the world for their competitiveness and high performance. Therefore, the methods and results exposed in this book may be valuable and useful for readers and researchers of the SC worldwide.

195 Business Reports for Automobile Spare parts Mansoor Muallim, Airbag Manufacturing

1. Market Overview: The global airbag manufacturing industry has witnessed substantial growth in recent years, primarily due to increased awareness about vehicle safety, stringent government regulations, and a growing automotive market worldwide. Airbags are a crucial component in vehicle safety systems, as they are designed to reduce the risk of injury during accidents. The market's growth can be attributed to rising safety concerns and technological advancements in airbag manufacturing. Global Market Size (2022): The global airbag manufacturing market was valued at approximately \$18.7 billion in 2022, and it is expected to exhibit a compound annual growth rate (CAGR) of around 6.5% from 2023 to 2028.
2. Market Segmentation: The airbag manufacturing market can be segmented based on the type of airbags, vehicle type, and technology used.
 - a) Types of Airbags: • Front Airbags • Side Airbags • Curtain Airbags • Knee Airbags
 - b) Vehicle Type: • Passenger Cars • Commercial Vehicles
 - c) Technology: • Pyrotechnic Airbags • Stored Gas Airbags
3. Regional Analysis:
 - a) North America: North America, particularly the United States and Canada, has a significant market share due to strict safety regulations and high vehicle ownership. The region is characterized by well-established automotive manufacturers and a mature market.
 - b) Europe: Europe is another key market for airbag manufacturing, with countries like Germany, France, and the UK being prominent players. Stringent safety standards, coupled with a strong automotive industry, drive growth in this region.
 - c) Asia-Pacific: The Asia-Pacific region is witnessing rapid growth, driven by the increasing adoption of airbags in emerging economies like China and India. The region's robust automobile industry and the rising middle-class population contribute to market expansion.
 - d) Rest of the World: Other regions, including Latin America, the Middle East, and Africa, are also experiencing growth, albeit at a slightly slower pace. This can be attributed to the gradual adoption of safety standards and regulations.
4. Market Drivers:
 - a) Safety Regulations: Stringent government regulations mandating airbag installations in vehicles to enhance passenger safety are a major driver of the market.
 - b) Technological Advancements: Innovations in airbag technology, such as smart airbags and advanced sensors, are increasing the market's appeal.
 - c) Increasing Vehicle Ownership: The growing number of vehicles on the road, especially in emerging economies, is boosting the demand for airbags.
 - d) Consumer Awareness: Rising awareness of vehicle safety and the importance of airbags among consumers is driving demand.
5. Market Challenges:
 - a) Cost Constraints: Airbags, especially advanced ones, can be expensive to manufacture and install, which can pose a challenge in price-sensitive markets.
 - b) Counterfeit Products: The market faces challenges from counterfeit and substandard airbag products that can compromise safety.
 - c) Supply Chain Disruptions: Global supply chain disruptions, as seen during the COVID-19 pandemic, can affect production and distribution.
6. Opportunities:
 - a) Electric Vehicles: The rise of electric vehicles presents an opportunity for airbag manufacturers to develop specialized safety systems tailored to the unique needs of EVs.
 - b) Autonomous Vehicles: The development of autonomous

vehicles may open new avenues for airbag manufacturers, as safety remains a paramount concern in autonomous driving. c) Emerging Markets: Further penetration into emerging markets offers significant growth prospects. 7. Future Outlook: The airbag manufacturing industry is poised for steady growth in the coming years. With the ongoing focus on vehicle safety, technological advancements, and expanding automobile markets in emerging economies, the market is expected to reach new heights. As more governments implement stringent safety regulations and consumers become increasingly safety-conscious, the demand for airbags is likely to surge. Additionally, innovations in airbag technology, such as adaptive airbags and autonomous vehicle integration, will continue to shape the industry's future. Conclusion: The global airbag manufacturing industry is on a growth trajectory, with a bright future ahead. Market players should continue to invest in research and development to create advanced, cost-effective airbag solutions. Moreover, they should explore opportunities in emerging markets and stay vigilant against challenges such as counterfeit products and supply chain disruptions. As the world continues to prioritize safety on the roads, airbag manufacturing is set to remain a vital component of the automotive industry and an integral part of vehicle safety systems worldwide.

Textile Advances in the Automotive Industry Roshan Shishoo,2008-10-20 Automotive textiles represent one of the most valuable international markets for technical textiles. Textile advances in the automotive industry provides an in-depth review of the design and development of automotive textiles and the recent advances made in technical textiles for a variety of automotive applications. Part one discusses issues such as automotive textile requirements from a car producer's perspective, mapping the automotive textile supply chain, advances in textile fabrics including nonwoven fabrics, and recycling issues. Part two focuses on automotive interiors with chapters on performance and style of interior textiles, materials and design for car seats, and the reduction of interior noise in vehicles. Part three discusses the important safety applications of automotive textiles, including airbags and tyres. Part four concludes by assessing how textiles can be used in automotive bodywork. With its distinguished editor and a team of contributors from both academia and industry, this book is an essential reference for a broad spectrum of readers, ranging from scientists, designers, product development staff to company strategists. - Provides an in-depth review of recent advances in the design and development of automotive textiles - Comprehensively examines the automotive textile industry covering key requirements, the supply chain, fabrics and recycling - Addresses important safety considerations in automotive textiles including airbags and tyres

People and Performance Peter Drucker,2013-05-13 What is management? What is a manager? How is a business organized, and how can managers use people's strengths more effectively? What is the relationship between management today and the society and culture it seeks to direct? These and many more questions are discussed in Peter Drucker's classic

survey of management thought and practice. **People and Performance** is the ideal volume for those who want the essence of Drucker's thinking, but with limited time at their disposal. It spans all the main dimensions of management and its themes are based on Drucker's direct experience as an adviser to businesses, government departments, public institutions, and as a widely sought lecturer.

The Sustainable Development Goals Martin Wynn, Peter Jones, 2019-12-09 In 2015, the United Nations launched the Sustainable Development Goals (SDGs) to define and coordinate global priorities and aspirations up to 2030 in response to the economic, social and environmental challenges faced by the planet. Many governments across the world signed up to these goals. United Nations Secretary-General Ban Ki-Moon noted at the outset that business would be a vital partner in achieving the SDGs. This easy-to-digest book provides a critical evaluation of how a range of multinational companies from across different commercial sectors are currently addressing the SDGs and the challenges they are facing in contributing to them. The private sector has thus been set the challenge of responding positively in support of the SDGs whilst at the same time acting in the shorter-term interests of its stakeholders. Using a wealth of illustrative materials drawn from company reports and other sources, this book looks at the response of 80 companies and organisations from eight different industry sectors. It examines the different approaches taken, discusses how far the SDGs are actively supported and reviews how progress is being assessed against related targets and objectives. In addition to an analysis of each industry sector, the book provides a summary overview of all industry sectors studied, identifying the most and least supported SDGs overall. This book will be of interest to the fast-growing body of academics studying and researching sustainability, as well as to industry managers and public-sector operators involved in sustainability management and reporting. It provides detailed commentary and insights, and identifies both key themes from the research and critical issues for the successful implementation of the SDGs in the period up to 2030.
