Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta. This Alfa offshoot distinguished itself by preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a 1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

As landfills are closed and new and stricter legislation enacted, the problems of waste and pollution grow ever larger. Re-engineering production lines to reduce the source of unusable by-products is one answer, and developing new technologies to make use of these materials another. Recycling provides an immediate solution, and it is one that is becoming more and more popular in a variety of industries ranging from styrene to steel to newsprint. Like the other titles in the "Encyclopedia of Environmental Control Technology" series, this volume draws on contributors from around the world who are engaged in finding ways to solve the problems of waste and devising new strategies for recycling.

Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower. This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.

This new color edition is essential for the enthusiast who wants to get the most performance out of this new engine design but is only familiar with the older Chevy small-blocks. Covered is everything you need to know about these engines, including the difficult engine removal and installation, simple engine bolt-ons, electronic controls for the Generation III engine, and detailed engine builds at four different power levels.

A riveting family saga, *The Story of Edgar Sawtelle* explores the deep and ancient alliance between humans and dogs, and the power of fate through one boy's epic journey into the wild. Born mute, speaking only in sign, Edgar Sawtelle leads an idyllic life with his parents on their farm in remote northern Wisconsin. For generations, the Sawtelles have raised and trained a fictional breed of dog whose thoughtful companionship is epitomized by Almondine, Edgar's lifelong companion. But with the unexpected return of Claude, Edgar's uncle, turmoil consumes the Sawtelle's once-peaceful home. When Edgar's father dies suddenly, Claude insinuates himself into the life of the farm – and into Edgar's mother's affections. Grief-stricken and bewildered, Edgar tries to prove Claude played a role in his father's death, but his plan backfires, spectacularly. Edgar flees into the vast wilderness lying beyond the farm. He comes of age in the wild, fighting for his survival and that of the three yearling dogs who follow him. But his need to face his father's murderer, and his devotion to the Sawtelle dogs, turn Edgar ever homeward. Wroblewski is a master storyteller, and his breathtaking scenes – the elemental north woods, the sweep of seasons, an iconic American barn, a ghost made of falling rain – create a family saga that is at once a brilliantly inventive retelling of *Hamlet*, an exploration of the limits of language, and a compulsively readable modern classic.
